

Pavan Kumar Reddy Pulla

Dallas, TX (open to relocate) | <https://www.linkedin.com/in/pavan-kumar-reddy-pulla> 469-756-5310 | pavan.tendu@gmail.com

SUMMARY

Data Analyst with 2.6 years of experience in SQL, Power BI, Tableau, and data pipeline optimization. Skilled at transforming raw datasets into actionable insights and building dashboards that guide business decision-making. Experienced in applying **AI tools (ChatGPT, Grok)** to accelerate analysis, A/B test design, and reporting efficiency. Passionate about **marketing analytics, customer insights, and digital engagement**, with strong communication skills to translate complex findings into compelling business narratives.

EDUCATION

University of Texas at Dallas

Dallas, TX

MS in Information Technology and Management (GPA: 3.63)

Graduation Date: December 2025

- Relevant Coursework: Python, Advanced Statistics, Visualization, Databases, and Systems

WORK EXPERIENCE

Infosys Limited

Hyderabad, India

Senior Systems Engineer

July 2023 – December 2023

- Designed and deployed **Tableau dashboards**, and **SQL pipelines**, improving reporting efficiency by **40%** and enabling real-time workforce planning insights.
- Automated reporting pipelines in **Azure DevOps**, reducing latency by **40%** and strengthening data reliability across business-critical processes.
- Improved data accuracy by **15%** through **post-migration validation** and reconciliation of large-scale SQL datasets.
- Partnered with cross-functional teams to build **workforce utilization dashboards**, enabling managers to optimize resource allocation and improve project delivery timelines.
- Streamlined **data preparation and cleaning workflows**, ensuring high-quality datasets for analytics and executive decision-making.
- Created **Tableau prototypes/mock-ups** to demonstrate data insights, effectively presenting findings to non-technical stakeholders for better decision-making.

Infosys Limited

Hyderabad, India

Systems Engineer

July 2021 - June 2023

- Built and optimized **SQL queries** for business reporting, reducing manual data preparation time by **30%**.
- Collaborated with business, **QA**, and IT teams to design **survey-driven metrics and validation checks**, safeguarding 95% of reports from data integrity issues
- Performed **ETL operations** on large datasets to maintain accuracy and consistency across enterprise data systems.
- Documented reporting processes and trained junior team members, improving team efficiency and knowledge transfer.
- Built **Power BI** dashboards and **SSAS** cubes, **tabular** models with Row-Level Security, enabling secure, role-based access and self-service analytics for business teams. Applied AI techniques to identify key data insights and improve report responsiveness

ACADEMIC PROJECTS

COVID-19 Impact Analysis on Wheat Production and Labor Markets

May 2025

- Utilized AI prompting techniques throughout the project lifecycle, from requirements gathering to final report development, to analyze and visualize the COVID-19 impact on wheat production, imports/exports, and employment trends, enabling deeper insights and novel perspectives on pandemic-related disruptions.
- Leveraged AI prompting (**Chart GPT, Grok**) and visualization tools (**Tableau, Excel**) to translate raw data into actionable insights for stakeholder decision-making.

Corruption control through budget management

May 2021

- Created a Web Application to monitor the flow of budget released in a respective financial year, where a citizen can create an account and see how that money is utilized closely.
- Developed a functionality in the web application where a user can complain about any suspicious actions in the development that involve money, so that the government can investigate it.

SKILLS

Tools: Microsoft Office (Excel, PowerPoint, Word), Salesforce, SSAS, DevOps, Power BI, Tableau, SQL, SSMS, SSRS, Advanced Excel (PivotTables, Power Query)

Programming Languages: SQL, Python, R, HTML, CSS, JavaScript, DAX, Java, C, C++, MongoDB

Certifications: IBM Python for Data Science, Salesforce Certified Administrator, Oracle Cloud Infrastructure 2023 Certified Foundations Associate, actively pursuing HRCI Human Resource Associate Professional certification
