

Rahul Lankalapalli

Data Analyst | Analytics Engineer | BI Developer | Business Analyst | Data Researcher | Marketing Analyst | Product Analyst | AI/ML Analyst | AI Data Specialist
l.rahul0698@gmail.com | (850) 861 9141 | USA | [LinkedIn](#)

Summary

Results-driven Data Analyst with 4+ years of experience delivering insights through data engineering, visualization, and statistical modeling. Proficient in SQL, Python, R, and cloud platforms (AWS, Azure, GCP), with expertise in BI tools (Power BI, Tableau, QlikView, Looker), ETL automation, big data processing, and machine learning. Skilled at turning complex datasets into actionable business decisions.

Technical Skills

- Data Visualization & BI Tools:** Power BI (advanced DAX, Power Query), Tableau (LOD expressions, calculated fields, parameters), Excel (Power Query, Pivot Tables, VLOOKUP, Conditional Formatting), Google Data Studio, QlikView, Looker
- Data Engineering & ETL:** Informatica, Talend, Apache NiFi, Azure Data Factory, Synapse Analytics, SSIS, Airflow, Tableau Prep, Alteryx, Data Profiling & Wrangling, Anomaly Detection, Deduplication, ETL Automation
- Big Data & Streaming:** Apache Spark, Hive, Kafka, AWS Kinesis, Hadoop, Flink, Storm, Databricks, Spark Streaming (batch and real-time data processing for analytics), Risk Monitoring & fraud detection
- Cloud Platforms & Data Warehousing:** AWS (Athena, Glue), Azure SQL & Synapse, GCP, Snowflake, Redshift, Cloud Data Architecture, Governance & Metadata Management
- Statistical & Predictive Analytics:** Regression (linear, logistic), Clustering (K-means, hierarchical), Time Series Forecasting (Prophet), A/B Testing, Survival Analysis, PCA, ANOVA, Hypothesis Testing
- Machine Learning & AI:** Python & R frameworks (Scikit-learn, XGBoost, LightGBM, CatBoost, Statsmodels, TensorFlow), Predictive Modeling, Feature Engineering, Model Explainability (SHAP), Deep Learning (PyTorch), NLP (Transformers, spaCy), Time Series Forecasting (Prophet, ARIMA), AutoML (H2O.ai, Google AutoML), Gen AI, LLM
- Programming & Soft Skills:** Python (Pandas, NumPy, SciPy, Plotly, Seaborn, Matplotlib), SQL (Advanced queries, CTEs, Window functions), SAS, SPSS, Data Storytelling, Business Acumen, Cross-functional collaboration, Problem-solving, Critical thinking

Professional Experience

Data Analyst, Stripe, Inc.

01/2025 – Present | Remote, CA

- Spearheaded the AI-Driven Transaction Insights Platform, deploying a GPT-based AI model for fraud detection and transaction risk scoring, collaborating with Risk, Compliance, and Data Science teams using Agile methodology and requirement documentation to enhance KPIs by 12%.
- Engineered advanced SQL queries using window functions and CTEs and streamlined ETL pipelines in AWS Athena, Redshift, and Snowflake, integrating structured and semi-structured payment datasets including CSV JSON and Parquet while maintaining data dictionaries and metadata documentation, reducing data errors by 15%.
- Conducted large-scale payment risk segmentation and fraud pattern analysis with Apache Spark and Kafka streams, applying statistical sampling and cohort analysis methods and preparing methodology documentation, achieving a 10% increase in accurate fraud identification.
- Leveraged Python NumPy Pandas and SciPy for time series modeling correlation analysis and hypothesis testing, creating reproducible Jupyter notebooks and maintaining version-controlled code repositories, improving transaction anomaly detection by 8% across merchant portfolios.
- Implemented automated data validation and ETL workflows using AWS Glue Lambda and Redshift, defining schema checks reconciliation rules and logging standards, maintaining full ETL runbooks, reducing audit preparation time by 2 business days and lowering data discrepancies by 14%.
- Developed executive Power BI dashboards with drill-through slicers and bookmarks, applying DAX for dynamic KPIs to track payment volume fraud trends and merchant acquisition metrics, maintaining dashboard documentation and user guides, improving actionable insights delivery by 11%.

Graduate Assistant, Southern University and A&M College

02/2024 – 12/2024 | Baton Rouge, LA

- Processed and validated institutional datasets using Python and Pandas, improving academic data integrity by 31%, while creating accurate, interactive Power BI visualizations that strengthened informed decision-making across university departments.
- Automated ETL workflows with Power Query and maintained optimized SQL databases, reducing manual report preparation by 26%, improving query efficiency by 34%, and ensuring reliable, timely semester-level academic reports for ongoing research projects.

Data Analyst & Research Analyst, Tata Consultancy Services

05/2020 – 06/2023 | Hyderabad, India

- Executed the Financial Insights Dashboard project, collaborating with finance and operations teams, gathering requirements, documenting KPIs, workflow, and reports, enhancing transparency and decision-making accuracy by 15%, while applying SQL, Power BI, and Excel.
- Engineered SQL databases and ETL pipelines using Azure Data Factory, integrating MySQL, PostgreSQL, and cloud sources, optimizing queries by 12% and ensuring automated refresh cycles with proper version-controlled documentation for reproducible data workflows.
- Performed exploratory and predictive analysis for Customer Segmentation project, using clustering, regression, and correlation, improving targeted marketing engagement by 17%, documenting methodology and sharing insights with cross-functional research and analytics teams.
- Developed Python scripts using NumPy and Pandas to clean, preprocess, and aggregate large datasets, enhancing data quality and reporting accuracy by 14%, while maintaining detailed code documentation for enterprise-wide reuse.
- Applied Decision Tree models in R to optimize marketing segmentation, improving campaign targeting precision by 16%, and prepared comprehensive methodology documentation for reproducibility across research and operational analytics teams.
- Validated data and automated ETL workflows in Azure Data Factory, ensuring synchronized datasets and high-integrity data, maintaining process documentation, supporting accurate reporting and consistent analytical outputs across Financial Insights and Customer Segmentation projects.
- Designed Tableau dashboards with dynamic filters and LOD expressions, summarizing complex, multi-source data, enabling drill-down analytics, and improving executive decision-making efficiency by 13%, while documenting dashboard architecture for operational and research use.

Education

Southern University and A&M College – Baton Rouge – Baton Rouge, LA, USA

Master of Science (MS), Computer Science

01/2024 – 05/2025

Guru Nanak Institutions Technical Campus – Hyderabad, India

Bachelor of Technology (BTech), Electronics and Communications Engineering (ECE)

08/2016 – 09/2020

Certificates

- Data Analysis and Visualization with Power BI – Microsoft
