

Rohith Konakati

DATA ANALYST

Phone: 312-358-5511 | rohithkonakati4@gmail.com

PROFESSIONAL SUMMARY

- 4+ years of experience in Data Analytics and Business Intelligence with a strong focus on healthcare, patient services, and operational reporting.
- Skilled in SQL, Power BI, Tableau, and Python for developing interactive dashboards, KPI scorecards, and analytical models that transform raw data into actionable insights.
- Hands-on experience with EHR/EMR systems such as Epic and Cerner, including integration of patient access, claims, and satisfaction data for advanced reporting.
- Strong understanding of healthcare KPIs, patient satisfaction, service turnaround time, claims resolution rate, and process efficiency metrics.
- Proficient in Snowflake, Airflow, and ETL automation for data ingestion, transformation, and validation pipelines that support large-scale analytics.
- Designed ETL/ELT workflows using Informatica and Snowflake.
- Applied data governance and quality validation frameworks ensuring over 98% accuracy and compliance with HIPAA and PHI standards.
- Experienced in analyzing payer and provider datasets, identifying service gaps, and delivering insights to improve patient outcomes and reduce operational costs.
- Proven ability to communicate complex analytics to non-technical stakeholders through Power BI and Tableau dashboards that drive decision-making.
- Worked cross-functionally with clinical, business, and operations teams to design data-driven improvement strategies in patient-service delivery.
- Adept at working in Agile environments using Jira and Confluence, with strong problem-solving and collaboration skills for continuous improvement initiatives.
- Recognized for automating manual reports using Python and SQL, cutting report generation time by 80% and increasing insight delivery speed.
- Passionate about using analytics to improve patient experience, enhance healthcare efficiency, and support value-based care initiatives.
- Experience working with Customer Data Platform (CDP) concepts, including customer identity resolution, audience segmentation, and activation-ready datasets for marketing and analytics use cases.
- Strong background in customer behavior analysis, segmentation, churn analysis, and personalization insights using SQL and Python.
- Supported churn and behavior analysis using Python-based statistical and ML techniques.

TECHNICAL SKILLS

- Data Analytics & Visualization Tools:** Power BI, Tableau, Excel (Power Query), Business Objects, ServiceNow Reporting
- Programming & Scripting:** SQL (Advanced Joins, CTEs, Window Functions), Python (Pandas, NumPy, Matplotlib, Scikit-Learn), R (basic for statistical analysis)
- Healthcare & Domain Tools:** EHR/EMR Systems (Epic, Cerner – familiarity), Claims & Payer Data Analysis, Patient Satisfaction Surveys (HCAHPS, Press Ganey), Healthcare KPIs
- Data Engineering & ETL:** Snowflake, Apache Airflow, ETL Pipelines, Data Wrangling, Data Cleaning, Data Quality Checks, Data Governance Frameworks
- Database & Storage Technologies:** Snowflake, SQL Server, MySQL, Hive, Delta Lake, AWS S3
- Cloud Platforms & Services:** AWS (S3, EMR, EC2), Azure Synapse (basic familiarity), Databricks
- Analytics & Reporting Areas:** Operational Efficiency Metrics, Patient Experience Analytics, Claims & Billing Data Insights, Process Improvement Reporting, SLA Tracking
- Tools & Collaboration:** Jira, Confluence, Git, Agile Methodologies, Documentation & Workflow Automation
- ETL Tools:** Informatica PowerCenter, Informatica IICS
- Customer Analytics:** Audience Segmentation, Customer Journey Analysis, Churn Analysis, Personalization Metrics, Campaign Analytics
- CDP Platforms (Familiarity):** Segment, Salesforce CDP, Adobe Real-Time CDP

CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate
- Snowflake Data Warehouse Practitioner
- AWS Certified Solutions Architect – Associate

PROFESSIONAL EXPERIENCE

Blue Cross Blue Shield, SC
Project Role: Data Analyst
Responsibilities

Jan 2025 - Present

- Used SQL to extract, transform, and analyze patient service and claims data from Snowflake and ServiceNow to identify patterns and service delays.
- Developed Power BI dashboards to monitor patient satisfaction, call center performance, and service turnaround time.
- Created Tableau reports visualizing healthcare KPIs such as claim resolution, patient experience scores, and process efficiency trends.
- Automated ETL and data refresh processes using Python and Airflow, reducing manual reporting effort by 80 percent.
- Designed SQL views and stored procedures in Snowflake to streamline healthcare data aggregation and performance tracking.
- Partnered with operations and care management teams to analyze patient support metrics and recommend process improvements that reduced issue resolution time by 25 percent.
- Applied data governance and quality validation checks to ensure 98 percent accuracy across all operational and claims datasets.
- Conducted root cause analysis on recurring service issues and developed dashboards to highlight improvement opportunities.
- Delivered weekly executive summaries highlighting patient experience metrics, claim processing times, and satisfaction survey insights.
- Ensured HIPAA compliance and patient data confidentiality throughout all reporting and analytics activities.
- Performed customer and member segmentation analysis using SQL to support targeted communication and engagement strategies.
- Built customer-level datasets enabling behavioral analysis, churn indicators, and personalization insights.
- Analyzed multi-source customer interaction data to support campaign effectiveness and experience optimization.

Technologies: Tableau, Snowflake, ServiceNow Reporting, Python, Power BI, Advanced SQL, Business Objects, Keynote, Jira, Confluence, ETL Pipelines, ITSM Metrics, Data Governance.

Turbito Infotainment Pvt Ltd
Project Role: Data Engineer / Data Analyst
Responsibilities

August 2019 - Dec 2022

- Designed and developed ETL pipelines using Python and Informatica to extract, transform, and load large healthcare and operational datasets.
- Wrote complex SQL queries and created views for data aggregation, validation, and performance reporting across multiple systems.
- Built Power BI and Tableau dashboards to track service performance, claim volumes, and workflow efficiency metrics.
- Automated data ingestion and quality validation scripts using Python, improving data accuracy and reducing manual effort by 70 percent.
- Integrated data from Hive, MySQL, and Snowflake to build a unified analytics layer supporting operational and patient-service reporting.
- Created data quality checks and alerts to detect anomalies, ensuring reliability in executive-level reports.
- Implemented data partitioning and indexing techniques to improve query performance and scalability.
- Collaborated with cross-functional teams to gather reporting requirements and deliver insights on service-level adherence and process improvements.
- Documented data pipelines, dashboards, and workflows in Confluence to support agile delivery and faster onboarding.
- Supported data governance initiatives by maintaining metadata, tracking data lineage, and validating source-to-target mappings.
- Integrated customer and interaction data from multiple systems to build unified customer analytics datasets.
- Supported segmentation and behavior-based analytics using SQL and Python to enable data-driven personalization use cases.

Technologies: Hive, Hadoop, Spark, Sqoop, Talend, Informatica, Avro, ORC, Parquet, MySQL, Impala, Python, SQL. Python, Snowflake, Tableau, Power BI, ServiceNow, Advanced SQL, Apache Airflow, ETL Pipelines, Data Quality Frameworks, Jira, Confluence, Agile, Change Management Reporting.

EDUCATION
Master of Science: Computer Science
Governors State University – Chicago, Illinois

Jan 2023-Dec 2024
