SOFTWARE EXPERIENCE

Chevron - Solution Architect (Houston, Tx)

Oct 2024 - Current

- Adopted, designed, and implemented software architecture during organizational restructuring and ensuring smooth transition of workload between 3 product teams and 18 developers.
- Collaborated with business stakeholders to develop a web application integrating **SaaS** solution, **Azure Databricks** for machine learning and data engineering, **Angular** for UI development, **ADO.Net** for API's, and **Power BI** for data visualizations. Optimizing production flow of liquid natural gas in midland facilities by **100,000** barrels per day.
- Directed development efforts by breaking down technical and business requirements, prioritizing features, balancing workload between development team members, and ensuring seamless integration between software components.
- Collaborated with enterprise architects to build out Chevron's **master data management** model to build data alignment between 4 different IT platforms and teams.

Sundance Construction - Senior Software Engineer (Remote)

July 2024 - Current

- Designed and implemented an **IOS mobile application** to track and manage construction milestones, time logs, and reports.
- Utilized **Flutter** for the UI and **Google Firebase** for a "low code" management solution so admins can manage their spend.
- Integrated Google's weather API, LinkedIn, a location API so project managers to find their construction site, and AI image recognition tools to automatically generate weekly reports.
- Rebuilt their website in **HTML**, **CSS**, and **Typescript**, and built a dashboard to track website analytics.

Chevron - Technical Lead (Remote)

Jan 2023 - Oct 2024

- Developed a data management system to aid users in decommissioning \$2B Dollars' worth of oil rigs off the Australian coast.
- Designed and built the UI in Angular 16 utilizing bootstrap and material angular components totaling 35 different views.
- Built API endpoints using **.Net 7** and **EF Core** and exposed them in **Swagger** to expose out data to the enterprise data model.
- Maintained a system of record in **Azure SQL** to manage monthly forecast of decommissioning efforts cost and status.
- Utilized **Azure DevOps** to make **CI/CD** deployments, track and optimize database spend and manage security through role-based permissions.
- Facilitated system demos to 90 business users following **Agile** practices to gather feedback, prioritize features, and iterate on development cycles.

Chevron - Software Engineer I (Houston, Tx)

May 2022 - Jan 2023

- Compiled \$500M+ in monthly forecast data using **Azure Databricks**, **Azure Data Factory**, and **Azure Data Lake Storage** for Chevron's Environmental Management Company.
- Utilized Python machine learning models to predict acceleration in company spend based on 15 years of historical data.
- Combined PowerBI reports related to environmental sites, spend, management teams, and lifecycle into one web application that attracts over **400 users** a month. The collective effort has resulted in cost savings exceeding \$5 million dollars across the Chevron enterprise.

Web Surfing Studios - Full Stack Software Engineer (Remote)

Oct 2021 - Jan 2023

- Designed the Virginia Tech Career fair registration portal with over 4000 yearly users.
- Used **ASP.Net** to build the registration views, built models using **C#**, stored the data in **azure SQL**, and made API endpoints to post the data.
- Trained interns in using Azure resources, providing technical guidance so they could develop their own application for this startup company.

TECHNICAL SKILLS & CERTIFICATES

- Languages: Git, C# / .NET, HTML, CSS, JavaScript, Python, MATLAB, C++, YAML, Verilog, C, Fortran
- Frameworks: .NET Core, .NET 5-8, .NET Framework, ASP.NET MVC
- Front-End: React, Angular, Bootstrap, Material UI, PowerApps
- Databases: Microsoft SQL, MySQL, Cosmos, Dataverse
- Certificates: Python Institute Certified Entry Level Python Programmer, .NET Pluralsight Course, Pragmatic Microsoft Azure Fundamentals, Angular Pluralsight Course, C# Fundamentals

EDUCATION

Texas A&M University, College Station, Tx

Graduated Bachelor of Science, Computer Engineering
