

DARSHALI PATEL

DATA ANALYST

Champaign, IL

(217) 249-1266 • darshalipatel484@gmail.com

Work Authorization: Green Card Holder (Sponsorship not required)

CAREER SUMMARY

- Versatile, high-energy, and collaborative **DATA ANALYST** with hands-on IT Experience and broad-based knowledge of database types; data gathering process, developing and documenting internal procedures, conducting special studies, quantitative and qualitative research methodologies; and big data capture, curation, manipulation and visualization.
- Proficient in advanced statistical and data analysis programs, including RStudio and Power BI, utilized to conduct in-depth analyses of trends and business cases; developed custom scripts and algorithms in RStudio to automate data processing tasks, significantly enhancing efficiency and accuracy in analysis.
- Strong ability to furnish insights, analytics and business intelligence used to advance opportunity identification, process re-engineering and business growth; collaborative team player, adept at working with cross-functional teams to provide valuable data insights and support strategic decision-making.
- Sound educational grounding with a Master of Computer Science Engineering, equipped with the latest methodologies and tools to deliver data-driven solutions.

CORE SKILLS

- | | | |
|--|---|----------------------------------|
| ◆ Data Analysis and Interpretation | ◆ Report Generation and Presentation | ◆ Predictive Analytics |
| ◆ Data Mining & Processing | ◆ SQL and Database Management | ◆ Business Intelligence |
| ◆ Research Methodologies | ◆ Project Management and Prioritization | ◆ Collaboration and Teamwork |
| ◆ Statistical Modeling | ◆ Advanced Statistical Techniques | ◆ Engaging Communicator |
| ◆ Data Visualization (Power BI, RStudio) | ◆ Problem Solving and Critical Thinking | ◆ Excellent Interpersonal Skills |

PROFESSIONAL EXPERIENCE

FXIS.AI, Remote

Jul 2023 – Jun 2024

Data Analyst

- Serve as a Data Analyst for Fxis.ai, a leading provider of innovative AI solutions that empower businesses to thrive in a competitive digital landscape.
- Analyzed extensive datasets to uncover actionable patterns and insights that drive strategic decision-making and operational efficiency.
- Enhanced critical thinking and problem-solving skills through the interpretation and analysis of complex data trends.
- Extracted, cleaned, and validated data from various systems, ensuring accuracy and reliability for comprehensive analysis.
- Employed advanced data gathering techniques to manage and process large volumes of structured data effectively.
- Developed and established robust data and reporting infrastructure using Tableau and SQL, delivering real-time insights into product performance, marketing funnels, and key business performance indicators (KPIs).
- Implemented long-term testing experiments that resulted in a 12% increase in company growth, demonstrating the value of data-driven strategies.
- Created operational reporting dashboards in Tableau to identify areas for contractor improvement, leading to an additional \$250K in annual incremental revenue.
- Designed and maintained data pipeline architectures tailored to stakeholder requirements, ensuring data accessibility and usability.
- Provided ongoing support for existing integration solutions, including modifying, testing, validating, and documenting system changes in Confluence.
- Maintained thorough documentation and records for knowledge transfer on Confluence, promoting continuity and scalability of data solutions.
- Actively engaged in team meetings and brainstorming sessions to optimize data processes and foster collaborative problem-solving.
- Supported presales activities by conducting needs analysis, project scoping, and data review to ensure alignment with client objectives.
- Successfully identified and implemented data-driven strategies that contributed to a 15% reduction in operational costs over a six-month period.
- Conducted detailed analysis of sales data, uncovering opportunities that facilitated a 18% boost in upsell conversion rates.
- Streamlined data validation processes, reducing errors by 40% and significantly improving data quality for reporting and analysis.

Data Analyst

- Analyzed and cleaned large datasets to create comprehensive dashboards, effectively visualizing core business KPIs and facilitating data-driven decision-making across the organization.
- Developed a logistic regression model that enabled the SEO team to strategically target high-impact keywords, achieving a 15% increase in year-over-year site visitors in 2021.
- Collaborated with product managers to conduct in-depth cohort analyses, uncovering opportunities to optimize pricing strategies by 22% for specific user segments, resulting in a projected annual revenue increase of \$730K.
- Designed and maintained automated reporting for a nationwide retention program using Python, SQL, and Excel, streamlining data processes and enhancing reporting efficiency.
- Created dynamic data visualizations with SQL and Tableau, which reduced the time spent on manual reporting by 8 hours weekly, allowing the team to focus on higher-value tasks.
- Applied predictive analytics and modeling techniques to assess and forecast repair costs for consumer electronics, effectively communicating actionable insights to stakeholders for informed decision-making.
- Generated customized forms and reports tailored to stakeholder requirements, ensuring alignment with business objectives and enhancing communication of key metrics.
- Provided initial network security incident response support, efficiently escalating critical issues to ensure robust security measures and minimize potential risks.

Intel India Pvt Ltd, City

Jul 2019 – Jun 2020

Data Engineer in DCG

- Spearheaded the integration of innovative Intel technologies, including advanced processors and accelerators, to bolster the capabilities and performance of data centers, both cloud-based and on-premise.
- Implemented Intel's Xeon Scalable processors, resulting in significantly improved computational efficiency, enabling enterprises to handle increasing workloads with ease.
- Leveraged Intel's AI technologies and libraries to develop and refine robust machine learning models, enhancing their training, inference, and deployment processes, ultimately driving business intelligence and insights.
- Enhanced data security protocols by incorporating Intel's Software Guard Extensions (SGX), ensuring secure data handling and promoting confidential computing practices across enterprise environments.
- Utilized Intel Ethernet adapters and programmable infrastructure solutions to optimize data flow and enhance network reliability, leading to reduced latency and improved overall performance in data transmission.
- Designed modular and scalable data systems that adapt to the growing demands of enterprise workloads, providing businesses with the agility needed to respond to evolving market conditions.
- By integrating cutting-edge Intel innovations into data center frameworks, the initiative revolutionized organizational data handling capabilities, enhanced computational power, and contributed to achieving sustainability objectives through efficient resource management.

EDUCATION**Master of Computer Science Engineering, 2019***Institute of Technology, Nirma University***Bachelor of Computer Science Engineering, 2016***Gujarat Technology University***Business English Course (BEC): Business English, 2013***University of Cambridge***TRAINING, CERTIFICATIONS, AND PROFESSIONAL DEVELOPMENT****Masters Program - Data Scientist, Simplilearn Certified in collaboration with IBM, 2023****(Coursework completed:** Data Science with Python, R, Advance Machine Learning, Tableau 10, Big Data Hadoop & Spark Developer, SQL Training)**TECHNICAL SKILLS****Languages:** Python, SQL, Bash Scripting, R, Java.**Tools:** Tableau, Power Bi, Dreamweaver, Visual Studio, R Studio, MySQL, Excel, Microsoft Office
