SUMMARY

Business analyst with a Master's in Computer Science and a path that runs from software development to e-commerce operations. Comfortable on both sides of the table: eliciting requirements from business stakeholders and translating them into specifications a technical team can build. Recently cut order processing time 25% at a jewelry e-commerce business by mapping the fulfillment workflow and reworking its bottlenecks. Skilled in SQL, Excel, Power BI, and Agile delivery.

CORE COMPETENCIES

Requirements Elicitation & Documentation • Process Mapping & Optimization • Stakeholder Management • Data Analysis & Reporting • KPI Tracking • Agile/Scrum • User Stories & Acceptance Criteria • Gap Analysis

PROFESSIONAL EXPERIENCE

E-commerce Operations Specialist | Dvik Jewels — New York, NY *November 2025 – Present*

- Cut average order processing time from 24 to 18 hours by mapping the 8-step fulfillment workflow end to end, identifying bottlenecks at the supplier-handoff and packaging stages, and redesigning the handoff process — now sustaining a 98% on-time delivery rate
- Gather and document requirements from suppliers, logistics partners, and customers, translating recurring pain points into process changes; serve as the single point of contact between business and technical stakeholders
- Track order volume, fulfillment time, and customer satisfaction weekly in Excel dashboards, and use the trends to decide which improvements to tackle next
- Analyze listing and conversion data for the company's Etsy storefront to prioritize product-page changes, contributing to measurable conversion improvement quarter over quarter

Flutter Developer | EbizzInfotech — Remote *July 2023 – January 2025*

- Sat between product managers and the development team across two years of Agile delivery: gathered business requirements, wrote user stories with acceptance criteria, and turned ambiguous requests into buildable technical specifications
- Improved application performance 15% by profiling the app systematically, documenting findings, and working with QA to verify each fix

Flutter Developer Intern | TechnoYuga Soft. Pvt. Ltd. — India *December 2022 – May 2023*

- Joined requirements discussions and sprint planning; documented technical requirements and built app features with real-time Firebase data

BUSINESS ANALYSIS PROJECTS

Sales Analytics Dashboard (Power BI) | Independent BA Project *2026*

End-to-end business analysis engagement for a five-store jewelry retailer moving from manual Google Forms reporting to real-time analytics — from stakeholder analysis through a working dashboard and final recommendations.

- Produced a full BA document set: stakeholder register for 7 stakeholders (influence/interest matrix, MoSCoW-prioritized engagement), a BRD with 12 functional and 5 non-functional requirements, an as-is process map exposing 4 pain points including a 5-day reporting delay, and a 20-field data dictionary
- Designed the dashboard wireframe, then built the working Power BI dashboard on a 1,200-row dataset — surfacing that diamond products drive 61% of revenue and that December and February bring +40% seasonal spikes
- Presented a business case with 4 strategic recommendations projecting an 18% revenue uplift to the project sponsor

EDUCATION

M.S. Computer Science | Pace University, New York — GPA 3.53/4.0 *May 2025*

B.Tech. Computer Engineering | Uka Tarsadia University, India *May 2023*

SKILLS & CERTIFICATIONS

Analysis & BI: SQL, Microsoft Excel (dashboards, pivot tables), Power BI, JIRA, Confluence, draw.io • Agile/Scrum, SDLC, BRD & user story writing, MoSCoW prioritization, gap analysis

Technical background: Flutter, JavaScript, REST APIs, Firebase, Git **Certification:** Google Data Analytics (in progress, 2026)
