

DEDEEPIYA SAI PALACHERLA

PDEDEEPIYASAI@GMAIL.COM | +1 (919) 904-5314 | Cary, NC 27519

Career Objective

- Detail-oriented professional with 4+ years of experience in business systems analysis, data validation, and technical support. Skilled in SQL, Power BI, JIRA, and job scheduling tools, with hands-on experience in Python and Boomi. Eager to contribute to process improvement and deliver data-driven solutions in a collaborative, Agile environment.

Technical Skills

- Programming and scripting: Python, Java (basic), Shell scripting, Linux, Perl (basic)
- Databases and data handling: SQL Server, MySQL, and MS Access
- Data visualization and reporting: Power BI, Tableau, Excel (pivot tables, charts, formulas)
- Tools and platforms: JIRA, Confluence, SkyBot Scheduler, OpsView, Postman, GitHub, SharePoint, Microsoft Office Suite

Work Experience

Business Systems Analyst /Data Analyst | Pike Corporation - Raleigh, NC | 09/2020 - Current

- Collaborated with stakeholders to gather, analyze, and document business requirements, translating them into user stories, use cases, and process flow diagrams.
- Led daily scrum meetings and worked with cross-functional teams to ensure timely project delivery and agile alignment.
- Designed and executed test suites; logged and tracked defects in JIRA to ensure software met functional and quality standards.
- Coordinated UAT testing, defect triage, and post-release validation to ensure smooth product rollouts.
- Developed Python scripts to automate data validation and API testing, increasing testing accuracy and efficiency.
- Performed backend data validation using complex SQL queries to ensure data accuracy for reporting and analytics.
- Supported Boomi integration processes and performed log analysis to debug and maintain data automation workflows.
- Scheduled and managed automated jobs using SkyBot Scheduler to support business operations.
- Monitored infrastructure health and resolved system alerts using Nagios OpsView.
- Created and maintained shell scripts to automate recurring support tasks.
- Familiar with Perl scripting for lightweight automation and maintenance tasks.
- Created interactive dashboards and reports using Power BI and Excel, enabling data-driven decision-making.
- Administered JIRA for issue tracking, workflow customization, and user access management.
- Managed user access and security provisioning across multiple systems, ensuring policy compliance.
- Delivered user training and authored system documentation to support adoption and minimize support issues.

Graduate Teaching Assistant | NIU - Dekalb, IL | 01/2019 - 05/2020

- Automated grading and performance reports with Excel to enhance efficiency.
- Provided internal technical support, resolving file system and basic networking issues.
- Collaborated with cross-functional teams to address system-level challenges and improve documentation.
- Acquired hands-on experience in SQL reporting and automation of scheduled jobs.
