Data Analyst

TX, USA | Mobile: 9408433209 | daneeshgali9@gmail.com | [linkedin.com/in/daneesh-g-808a2936a](https://www.linkedin.com/in/daneesh-g-808a2936a)

SUMMARY

Data Analyst with 4+ years of experience to delivering actionable insights in healthcare and financial domains. Expert in **SQL, Snowflake, AWS, Python (Pandas, NumPy), Tableau, and Power BI** for data integration, cleaning, and feature engineering. Skilled in **exploratory data analysis, statistical testing, A/B testing, and predictive modeling** to drive business decisions. Proven ability to develop automated ETL pipelines, interactive dashboards, and KPI-driven reporting while ensuring data accuracy, governance, and compliance. Adept at translating complex requirements into insights that improve operational efficiency and support strategic initiatives.

TECHNICAL SKILLS

Core Data Analytics: Data Analysis, Advanced SQL, Python Analytics, Business Intelligence (BI), Data Modeling, Dimensional Modeling, KPI Development, Metrics Standardization, Data Quality & Validation, Ad-hoc Analysis, Executive Reporting, Self-Service Analytics

Statistical & Analytical Methods: Exploratory Data Analysis (EDA), Hypothesis Testing, Chi-Square Test, t-Test, ANOVA, Regression Analysis, Correlation Analysis, Time Series Forecasting, A/B Testing, Predictive Analytics

Programming & Query Languages: Python, SQL, R

Analytics Libraries: Pandas, NumPy, SciPy, scikit-learn, statsmodels, Prophet, Matplotlib, Seaborn

Data Visualization & BI: Tableau, Power BI, Microsoft Excel (Advanced Excel, Pivot Tables, Power Query), SSRS

Databases & Data Warehousing: SQL Server, Oracle, MongoDB, Snowflake, Amazon Redshift, Azure Synapse Analytics

Cloud & Analytics Platforms: AWS (S3, Glue, Lambda, SageMaker), Microsoft Azure

ETL / Data Engineering: AWS Glue, SSIS, Apache Airflow, dbt, Data Pipelines, Data Transformation, Data Integration

Governance & Regulated Analytics: Data Governance, Data Privacy, HIPAA, SOX, Healthcare Analytics, Financial Analytics

Delivery & Collaboration: Agile, SDLC, JIRA, Git, GitHub

Soft Skills: Problem-Solving, Stakeholder Management, Communication, Critical Thinking, Team Collaboration, Adaptability

WORK EXPERIENCE

Data Analyst | Tenet Healthcare, TX, USA

Aug 2024 – Present

- Partner with clinicians and care management teams to define project requirements and translate healthcare objectives into **measurable KPIs**, including risk stratification accuracy, care-gap closure rates, and patient outreach effectiveness.
- Extracted, cleaned, & integrated 20M+ **EHR**, claims, pharmacy, and device records from **Teradata** and **Snowflake** using advanced **SQL (joins, subqueries, CTEs, window functions)**, creating a centralized analytics-ready dataset and reducing manual preparation by 30%.
- Conduct **Exploratory Data Analysis (EDA)** in **Python (Pandas, NumPy)** to uncover trends, validate distributions, and detect anomalies, ensuring high-quality input for predictive models.
- Engineer clinical and utilization features—adherence scores, chronic condition indicators, and prior admissions—boosting predictive risk model accuracy to 85% and enabling early identification of high-cost patients.
- Perform **statistical testing, including A/B testing**, to evaluate interventions, confirming an 18% reduction in inpatient admissions and \$12M in annual medical cost savings.
- Build interactive **Tableau dashboards** and **Excel (PivotTables, Macros) scorecards** to track engagement trends, care-gap closures, and provider performance, improving reporting efficiency by 25% and provider compliance by 20%.
- Automate daily **ETL workflows** with **SSIS** and deploy pipelines via **CI/CD tools** (GitHub Actions/Jenkins) to **Snowflake** and **AWS Redshift**, cutting data refresh times from 48 to 12 hours while maintaining **HIPAA compliance**.
- Maintain documentation, track tasks, and coordinate via **Jira and Confluence**, producing monthly reports on model drift, ROI, and KPIs to drive continuous improvement and achieve a 15% year-over-year increase in care-gap closures.

Data Analyst | Cognizant, India

Jan 2021 – Jul 2023

- Partnered with Finance, Risk, and Compliance to translate GAAP reporting requirements into technical specs and automated ETL pipelines with **Apache Airflow** into **AWS S3**, cutting reconciliation time from 2 hours to 45 minutes.
- Built a version-controlled **AWS S3** staging framework and **dbt models** with **SQL transformations** (joins, window functions, aggregations, CTEs) to standardize data across 6 financial systems, reducing reconciliation issues by 30%.
- Designed and deployed a **Snowflake** cloud data warehouse integrating structured ledger data with semi-structured market feeds, enabling **SQL-based KPI aggregations**, faster queries for dashboards, and improving **Power BI** responsiveness by 50%.
- Conducted **EDA on 50M+ transactions** using **Python (pandas, NumPy)** and **SQL**, performing cohort analysis, trend detection, and pattern mining to identify fraud-prone clusters, improving fraud detection accuracy by 15%.
- Developed **time-series forecasting models** and applied **statistical analysis (regression, ANOVA, hypothesis testing)** to project liquidity, interest income, and cost drivers, increasing forecast accuracy by 20% and supporting CFO initiatives saving \$1.5M annually.
- Designed and executed **A/B testing** and performed cohort and variance analyses using **Python** and **Power BI**, providing actionable insights on market reactions to FOMC announcements and guiding investment strategies in real time.
- Developed interactive dashboards and automated reporting using **Power BI** and **Excel Power Query**, creating dynamic reports to track NAV fluctuations, fund performance, and regulatory metrics, replacing 10+ manual templates and saving 60+ hours per month.
- Implemented **Python QA scripts** to validate pipeline outputs and standardized **Git** version control for analytics scripts and dashboards, ensuring **data consistency, audit-ready documentation**, and reliable delivery across global agile teams.
- Performed **ad-hoc analyses** on financial transactions and market data to answer urgent business questions, support strategic decisions, and provide real-time insights for stakeholders, enhancing responsiveness to emerging trends.

EDUCATION

M.S., Data Engineering - University of North Texas, Denton, TX, USA

B.Tech., in Computer Science and Engineering - QIS College of Engineering and Technology, India
