## SKILLS

**Analytics & Querying:** SQL, Python, Power Query, Excel, Exploratory Data Analysis, Inferential Analytics, Databricks

**Data Processing:** Data Cleaning, Data Wrangling, Data Transformation, Clustering, Statistical Analysis

**Visualization & Reporting:** Power BI, Tableau, Dashboard Development, KPI Reporting, Interactive Dashboards

## EXPERIENCE

**Data Analyst (Contract), Mom's Meals - Palmer Group** | 05/2026 - Present

- Standardized **documentation** for 10 recurring reports using **SQL** and **Power Query**, covering data sources, refresh steps, owners, and QA checks, reducing new-user onboarding time by 32% and improving team continuity.
- Designed and built 3 interactive **Power BI** dashboards consolidating billing and delivery metrics into a single view, cutting ad hoc reporting requests by 25% and giving stakeholders real-time visibility into **KPIs**.
- Designed a relational **database schema** to centralize inputs from 4 disparate data sources, reducing duplicate entry and improving **query performance** by 20% for recurring reporting workflows.

**Junior Data Scientist - Intone Networks Inc.** | 07/2025 - 04/2026

- Developed 4 **predictive models** that improved **reporting efficiency** by 18%, translating business questions into predictive analytics workflows using Python, feature engineering, and structured evaluation.
- Built and validated 3 forecast models using **hyperparameter tuning** and **cross-validation**, improving prediction precision by 11% and establishing a repeatable evaluation process for analysis.
- Investigated output discrepancies across 2 production models by auditing **feature inputs** and transformation logic, uncovering **data quality** gaps that cut post-delivery revision requests by 20%.

**AI & Trend Analysis Extern (Part-Time), Wayfair - Extern** | 03/2026 - 05/2026

- Designed **automated data collection** workflows that reduced research time by 20%, improving scalability through scheduled **scraping**, parsing, and structured **data wrangling** pipelines.
- Processed 2,400+ product records and identified emerging patterns, improving **data quality** and **trend detection** using clustering and structured feature extraction.

**Consumer Insights and Data Extern (Part-Time), Beats by Dr. Dre - Extern** | 11/2025 - 03/2026

- Cleaned and transformed over 5,000 records by standardizing inputs and applying structured preprocessing, improving data wrangling efficiency and **signal quality** by 30%.
- Performed **sentiment analysis** across 4,300 entries, improving insight generation by applying **NLP techniques** and grouping feedback into actionable clusters.

**Data Analytics Intern - SKR IT Techno Solutions** | 04/2022 - 09/2022

- Maintained documentation of data sources, inputs, and field definitions across 6 active client datasets, improving **data traceability** and reducing **stakeholder** clarification requests by 25%.
- Compiled **data summaries** and visual outputs for 4 stakeholder-led executive presentations, synthesizing findings across multiple datasets into decision-ready formats that cut presentation **prep time** by an estimated 20%.

## PROJECTS

**Thyroid Cancer Risk Prediction System - Bradley University** | 01/2025 - 05/2025

- Designed **predictive models** achieving 94.3% accuracy, improving decision support through structured data preparation, **feature selection**, and **cross-validation** across healthcare datasets.
- Developed reusable pipelines that reduced experimentation time by 40%, improving **scalability** through standardized preprocessing, evaluation, and model deployment workflows.

**Chicago Crime Visualization Dashboard - Personal Project** | 08/2024 - 12/2024

- Processed and standardized 250,000 records through large-scale **data wrangling** and transformation workflows, improving the **analytical readiness** of the dataset by 15%.
- Built an **interactive dashboard** enabling trend detection across 53 regions, supporting **exploratory analysis** and actionable insights through visualization and filtering tools.

## EDUCATION

Master of Science (M.S.) in **Data Science and Analytics** | Bradley University

Bachelor of Science in **Computer Science** | CVR College of Engineering
