

Fadilulahi Popoola

Houston, Texas | (346) 807-3585 | www.linkedin.com/in/fadilulahipopoola | popoolafadilulahi@gmail.com

PROFESSIONAL PROFILE

Detail-oriented and analytical Computer Science graduate with a Udacity Data Analyst Nanodegree and hands-on project experience in data wrangling, analysis, and visualization. Currently pursuing a Master's in Computer Science with completed coursework in Artificial Intelligence. Adept in Python, SQL, Excel, and data visualization tools. Eager to contribute analytical and technical skills to real-world data challenges in an entry-level or internship role.

TECHNICAL SKILLS

Languages & Tools: Python, SQL, Excel, Jupyter Notebook
Libraries & Frameworks: Pandas, NumPy, Matplotlib, Seaborn
Databases: SQLite, PostgreSQL
Concepts: Data Cleaning, Exploratory Data Analysis (EDA), Data Visualization, Statistics, AI Fundamentals
Other: GitHub, Tableau, Linux command line

EDUCATION

Masters of Science in Computer Science GPA: 4.0
University of North Texas
Expected Graduation Date: July 2027
Bachelor of Science in Computer Science GPA: 3.8
Fountain University

PROJECTS

Investigating a Dataset – TMDb Movie Data
Technologies: Python, Pandas, NumPy, Matplotlib, Seaborn

- Explored a real-world dataset to identify trends in movie popularity, profitability, and runtime
- Cleaned and prepared data using Pandas and NumPy, visualized insights with Matplotlib and Seaborn
- Derived data-driven conclusions and presented findings in a Jupyter Notebook

Data Wrangling population dataset with Kaggle's Api

- Programmatically and manually collected, assessed, and cleaned multiple population dataset from kaggle
- Performed detailed EDA and created visual reports to highlight trends in population density and air quality index.
- Demonstrated ability to manage real-world data pipelines and complex data transformations

SQL Data Exploration – Movie Rental Database
Technologies: PostgreSQL, SQL, Excel

- Explored a relational database containing movie rental data to uncover business insights and customer behavior patterns.
- Wrote SQL queries to answer key questions related to rental frequency, customer segmentation, film popularity, and payment trends.
- Developed visualizations to effectively present query results, highlighting data trends and supporting data-driven decision-making.
- Demonstrated proficiency in SQL joins, aggregations, subqueries, and filtering techniques for real-world business analysis.

EXPERIENCE

TECH 365 April 2023 – Sept 2024(ended)
Frontend Intern Lagos, NG

- Designed, developed, and deployed 6+ scalable web features across multiple products, improving reliability and usability.
- Enhanced application performance, leading to a 25% reduction in load time and improved responsiveness on both desktop and mobile.
- Implemented cross-functional improvements that increased system reliability and reduced crash rates by 40%.
- Led optimization efforts that cut server response times by 30%, minimizing resource consumption and improving user experience.
- Collaborated with cross-functional teams (Product, UX/UI, QA) to define and deliver new features, troubleshoot issues, and integrate customer feedback, improving overall user satisfaction.

SURVEYOR GENERAL June 2021 – Dec. 2021
Networking Intern Lagos, NG

- Assisted in installation and configuration of 15+ network devices (routers, switches, firewalls) across office locations under senior supervision.
- Diagnosed and resolved 10+ weekly network issues, improving internal connectivity and minimizing downtime.
- Performed routine maintenance tasks, supporting network uptime of 99.5% during internship period.

CERTIFICATION

Udacity Data Analyst Nanodegree
Completed: June, 2025

- Focused on data wrangling, exploratory data analysis, statistics, and data visualization
- Built end-to-end data projects using Python, Pandas, NumPy, Matplotlib, and SQL
