Email: fansocollins@gmail.com | Mobile: +1 (531) 248-1151 | UNITED STATES

PROFESSIONAL SUMMARY

Cybersecurity professional with extensive experience in Security Operations Center (SOC) monitoring, threat detection, and incident response. Skilled in using SIEM solutions like Splunk, IBM QRadar, and Microsoft Sentinel to identify and mitigate security threats. Proficient in forensic analysis, malware investigation, and threat hunting, leveraging tools such as Wireshark, Volatility, and FTK. Strong background in risk assessment, vulnerability management, and compliance frameworks, including NIST, ISO 27001, PCI DSS, GDPR, and HIPAA. Adept at coordinating with cross-functional teams to enhance security posture, develop incident response playbooks, and provide security awareness training.

CYBER SECURITY TRAINING/SKILLS/STANDARDS/SOFTWARE

Splunk | IBM QRadar | ArcSight | Microsoft Sentinel | LogRhythm | CrowdStrike Falcon | Microsoft Defender for Endpoint | Sentinel One | Palo Alto Cortex XDR | Snort | Suricata | Cisco Firepower | Zeek | VirusTotal | Any.Run Sandbox | MITRE ATT&CK | YARA Rules | Open Threat Exchange (OTX) | Wireshark | NetFlow | PCAP Analysis | Autopsy | Volatility | FTK | The Sleuth Kit | AWS Security Hub | Azure Security Center | Google Chronicle | CloudTrail | CloudWatch | Palo Alto | Fortinet | Cisco ASA | Check Point | Sigma Rules | Elastic Security | ThreatConnect | Nessus | Qualys | OpenVAS | Okta | CyberArk | Microsoft Active Directory | Python | PowerShell | Bash | Regex for Log Parsing | Ghidra | IDA Pro | Radare2 | Graylog | Elastic Stack (ELK) | Syslog | Security Monitoring & Incident Detection | Incident Response & Handling | Threat Intelligence Analysis | Forensic Analysis | SOC Process & Workflow Management | SIEM Tuning & Optimization | Risk Assessment & Vulnerability Management | Cloud Security Monitoring | Network Security & Traffic Analysis | Threat Hunting | Compliance & Regulatory Knowledge (NIST, ISO 27001, PCI DSS, GDPR, HIPAA) | Security Awareness & Training | Strong Analytical & Problem-Solving Skills | Collaboration & Communication

EMPLOYMENT HISTORY

Pitch Technologies LLC, Dallas, TX

October 2019 to Present

IT SECURITY (SOC) ANALYST

- Monitored and responded to security threats using tools like Splunk, FireEye, and CrowdStrike.
- Detected, analyzed, and responded to security incidents leveraging SIEM solutions.
- Investigated phishing alerts, malware incidents, and network traffic to identify vulnerabilities.
- Conducted vulnerability assessments using Nessus and recommended actionable solutions.
- Performed threat hunting and forensic analysis to identify potential security breaches.
- Utilized open-source intelligence (OSINT) tools to investigate and mitigate suspicious activities.
- Collaborated with teams to resolve escalated security incidents and refine incident response procedures.
- Developed and maintained incident response playbooks, ensuring effective remediation strategies.
- Analyzed DLP alerts and ensured compliance with industry best practices to protect sensitive data.
- Managed security logs, reviewed firewall alerts, and investigated potential Indicators of Compromise (IoCs).

- Conducted security awareness training for employees to strengthen cybersecurity posture.
- Supported compliance efforts related to SOC 2, NIST, ISO 27001, and other industry frameworks.
- Coordinated with law enforcement and third-party vendors for advanced threat intelligence sharing.
- Researched and stayed updated on emerging threats, attack vectors, and cybersecurity trends.

Pitch Technologies LLC, Dallas TX

December 2017 – October 2019

DESKTOP SUPPORT ANALYST

- Provided reliable technical support for network systems, servers, and endpoints.
- Identified and resolved hardware and software issues to minimize downtime for users.
- Used SCCM for software deployment and kept systems up to date with security patches.
- Supported and educated end users to ensure smooth IT operations.
- Installed, configured, and maintained desktops, laptops, printers, and other peripherals.
- Managed user accounts, permissions, and group policies using Active Directory.
- Diagnosed and troubleshoot network connectivity issues, including VPN and Wi-Fi problems.
- Assisted with the setup and maintenance of VoIP systems and conference room technology.
- Resolved incidents and service requests through ticketing systems such as ServiceNow and Jira.
- Provided remote and on-site technical support to ensure timely issue resolution.
- Configured and maintained Microsoft 365 applications, including Outlook, Teams, and OneDrive.
- Assisted in asset management, tracking IT inventory, and ensuring proper documentation.
- Implemented security best practices, including endpoint protection and user access controls.
- Collaborated with IT teams to improve system performance and end-user experience.
- Assisted with Windows OS and macOS upgrades, ensuring minimal disruption to business operations.
- Configured and supported mobile device management (MDM) solutions such as Intune and AirWatch.
- Provided basic troubleshooting for SaaS applications and cloud-based services.
- Created and maintained knowledge base articles and user guides to enhance self-service support.
- Collaborated with IT teams to improve system performance, automate routine tasks, and streamline IT workflows.

EDUCATION

- Master's in Business Administration, Istanbul Aydin University, Istanbul, Turkey
- Bachelor's in Computer Science, University of Yaoundé, Yaoundé, Cameroon

CERTIFICATIONS

- CompTIA (Security+)
- Splunk Fundamentals
- CISSP (In Progress)
