PROFESSIONAL SUMMARY

Strategic and results-driven Healthcare and SaaS Operations Leader with 15+ years of experience enhancing processes, strengthening cross-functional alignment, and driving configuration excellence across complex product ecosystems. Currently serving as a Product Configuration Manager, where I establish scalable workflows, partner closely with Engineering, Product Management, and Client Support, and lead operational improvements across multiple product lines. Known for creating clarity in complex workflows, improving team efficiency, and identifying knowledge gaps that elevate product quality and client outcomes. Proven ability to lead high-performing teams, implement data-driven improvements, and optimize configuration quality at scale. Seeking a leadership opportunity with a mission-driven organization focused on innovation, impact, and operational excellence.

CORE COMPETENCIES

Product Configuration & Operations • Process Improvement • SOP Development • Cross-Functional Collaboration • Operational Excellence • KPI Development & Dashboarding • Configuration Quality Frameworks • Team Leadership & Coaching • Root Cause Analysis • Workflow Optimization • Healthcare Operations • Data Analysis (SQL, SPSS) • Salesforce Reporting • EMR Systems • Remote & Distributed Team Management • Stakeholder Communication

PROFESSIONAL EXPERIENCE

Press Ganey — Remote

Product Configuration Manager | Nov 2021 – Present

- Lead end-to-end configuration operations across five enterprise and consumer-facing products, partnering with Engineering, Product Management, Implementation, and Client Support to ensure accurate, high-quality, and timely configuration delivery.

- Co-created and co-lead the cross-functional **Product Operations POD**, uniting Configuration, Technical Support, Engineering, and Product Managers to resolve escalations, align on product updates, standardize processes, and drive continuous improvement.
- Manage and develop a high-performing team of six, overseeing hiring, onboarding, workload allocation, coaching, and long-term performance development.
- Build and maintain data-driven Salesforce dashboards tracking **first-response time, task completion time, SLA performance, and workload distribution**, increasing transparency and accountability across the team.
- Monitor team proficiency by product, establishing structured frameworks to identify knowledge gaps, strengthen skill retention, and drive targeted training and knowledge-sharing.
- **Improved on-time task completion from 85% to 98%** by designing SLAs, creating a standardized SOP, and refining configuration workflows—consistently exceeding the **95% SLA target**.
- **Led a cross-functional workshop** to redesign the DataManager initial upload workflow, clarifying ownership across Implementation, Configuration, Product, and Technical teams and streamlining data collection and validation.
- Developed and launched a new SOP for DataManager imports, resulting in **zero failed client imports** and significantly improving the quality of source-of-truth client data.
- Design and implement configuration quality frameworks that reduce rework, enhance stability, and support scalable growth across product ecosystems.
- Develop and maintain comprehensive SOPs, process documentation, and internal knowledge assets; conduct root-cause analyses to resolve recurring issues and inform product and operational enhancements.
- Serve as a cross-functional liaison providing actionable insights to Product and Engineering teams during feature releases, UI updates, and technical changes to ensure configuration readiness.
- Champion remote team engagement by organizing quarterly virtual team-building events. Review annual engagement survey results, identify key focus areas, and implement targeted plans that strengthen culture, communication, and team morale.

Femwell Group Health — Miami, FL

Data Scientist | May 2021 – Oct 2021

- Analyzed multi-source datasets to uncover insights supporting Business Development strategies.
- Developed financial forecasting models and automated analytics templates.
- Built dashboards and reports using SQL, Python, and Excel.
