SUMMARY

Full Stack Developer with 3+ years driving robust, high-throughput payment and web applications. Expert in Java, Spring Boot, Angular/React, and database optimization, delivering scalable microservices and secure APIs. Adept at accelerating performance, enhancing reliability, and orchestrating CI/CD pipelines. Proven ability to innovate financial systems, streamline operations, and implement agile solutions that maximize efficiency, reduce latency, and elevate user experience.

TECHNICAL SKILLS

Languages: Java (8/11/17), SQL, JavaScript, TypeScript

Backend: Spring Boot, Spring MVC, Spring Security, Hibernate/JPA, Microservices, REST APIs, Kafka, Multithreading

Frontend: Angular / React.js, HTML5, CSS3, Bootstrap

Databases: Oracle, PostgreSQL, MySQL, MongoDB

Financial Domain: Payment Systems, Transaction Processing, Reconciliation, KYC/AML, Ledger Systems

API & Integration: REST, SOAP, JSON, XML, Swagger/OpenAPI, Banking & Payment Gateway Integration

DevOps & Tools: Git, Maven, Gradle, Jenkins, Docker, Kubernetes (Basics), CI/CD

Testing: JUnit, Mockito, Integration Testing, TDD

Cloud: AWS (EC2, S3, RDS – Basics)

Security: OAuth2, JWT, SSL/TLS, OWASP Practices

Monitoring: ELK Stack, Splunk, Prometheus, Grafana

Methodologies: Agile (Scrum), SDLC, Design Pattern

EXPERIENCE

Full Stack Developer | *Berkshire Hathaway, USA*

January 2025 – Present

- Engineered microservices-driven payment platforms with Spring Boot and Kafka, processing over one million daily transactions at sub-200 millisecond latency.
- Fortified RESTful APIs with OAuth2 and JWT, enabling more than fifty banking integrations while reducing security breaches by thirty percent.
- Accelerated backend performance through Hibernate and JPA with SQL optimization, cutting query execution time by forty percent and increasing throughput by twenty-five percent.
- Architected interactive dashboards using Angular and React, improving operational transparency and reducing reconciliation cycles by thirty-five percent.
- Streamlined payment gateway integrations, improving transaction success rates from ninety-two percent to ninety-eight percent and minimizing retries by twenty percent.
- Led Agile teams and DevOps initiatives through continuous integration and deployment pipelines using Jenkins, Docker, and Kubernetes, reducing deployment time by sixty percent and doubling release frequency.

Full Stack Developer | *Citus Infotech, India*

August 2021 – July 2023

- Developed scalable web applications with Spring Boot and Angular/React, supporting over ten thousand active users per month with ninety-nine-point five percent uptime.
- Integrated and orchestrated REST APIs, handling more than one hundred thousand requests daily with optimized JSON and XML processing.
- Redesigned MySQL and PostgreSQL database schemas, enhancing query performance by thirty percent and reducing latency across key endpoints.
- Applied MVC architecture and design patterns, removing redundant code by twenty-five percent and improving maintainability.
- Created unit and integration tests using JUnit and Mockito, achieving over eighty-five percent coverage and reducing post-release defects by twenty percent.
- Contributed to Agile delivery and CI/CD automation, increasing build reliability by fifteen percent and achieving ninety-eight percent deployment success rate.

EDUCATION

Masters in Computer Science | *Missouri University of Science and Technology, MO, USA*

May 2025
