PROFESSIONAL SUMMARY

Data science graduate experienced in ML, data analysis, and applied research (clinical data internship; ML capstone on large-scale survey data). Seeking entry-level/full-time roles focused on rigorous analysis, statistical reasoning, model evaluation, and data-driven decision-making.

TECHNICAL SKILLS

Languages: Python, SQL, R, MATLAB, C++
Data & Analysis: Pandas, NumPy, Excel (Data Analysis), Tableau Desktop
Machine Learning: scikit-learn, Neural Networks, Random Forest, XGBoost
Tools & Dev: LangChain, API development, Git, Jupyter, Vue.js / Vue CLI

EDUCATION

Arizona State University Tempe, AZ
Bachelor of Science in Data Science | GPA: 3.35 / 4.0 Aug. 2021 – Dec. 2025
– **Merit Scholarship Recipient**, Arizona State University
– **Relevant Coursework:** Machine Learning, Statistical Learning, Natural Language Processing, Linear Algebra

EXPERIENCE

Clinical Data Intern Jun. 2025 – Aug. 2025
Johnson & Johnson Philadelphia, PA
– Built a Text-to-SQL system enabling non-technical users to query clinical datasets using a LangChain backend, Vue frontend, and custom model APIs.
– Achieved over 90% error-free query generation, reducing query turnaround from multi-hour manual workflows to approximately 30 seconds for business users.
– Designed schema-aware prompts, validation logic, and multi-turn query handling to improve reliability and reduce invalid queries.
– Documented workflows and collaborated with data engineers to support reproducibility and downstream analysis.

Selected Internships May 2024; Jun. 2021 – Oct. 2021
Red Panda Games ; Mitra Jyothi NGO Bangalore, India
– Red Panda Games — Game Design Intern (May 2024 – Jul. 2024): performed structured testing, synthesized bug reports, and supported cross-functional issue resolution.
– Mitra Jyothi — NGO Intern (Jun. 2021 – Oct. 2021): coordinated operational timelines and improved Braille press workflows, increasing throughput.

PROJECTS

Stellar Classification (Capstone Project) | *Python, ML, SDSS DR17/DR18* Aug. 2025 – Dec. 2025
– Led a team project applying machine learning to Sloan Digital Sky Survey (SDSS) Data Releases 17 and 18 to classify celestial objects as stars, galaxies, or quasars.
– Developed and evaluated supervised models including Random Forest, XGBoost, and neural networks, achieving up to 88.6% accuracy on DR17 test data and 96.5% accuracy under DR18 cross-validation.
– Served as team lead and domain lead, guiding feature selection, model comparison, and interpretation of results in an astrophysical context.

Global Career Accelerator Program | *Tableau, Excel* Jan. 2025 – Mar. 2025
– Analyzed website audience data and produced visualizations to summarize key metrics for stakeholder reporting.

Hotel Reservation System | *C/C++* Jul. 2024 – Aug. 2024
– Designed a reservation engine using hash-based data structures to support constant-time operations and dynamic resizing.

PROGRAMS & LEADERSHIP

NASA L'SPACE NPWEE Academy: Completed Dec. 2025 — Selected participant; served as principal investigator and team lead for project work. Participated in formal proposal review boards, evaluating and providing feedback on peer submissions.

CERTIFICATIONS

Alteryx Designer Core Certification — Alteryx
