SUMMARY

Data analyst with experience in statistical modeling, data processing, and automation. Proficient in **Python**, **SQL**, and **Excel**, with a foundation in statistical analysis and a focus on deriving actionable insights. Applies analytical methods to support marketing performance evaluation and experimental design.

WORK EXPERIENCE / PROJECTS

Automated Sales Metrics Analyzer (C# & Excel)

- Developed a C# application to analyze sales data by reading **Excel** files and automating report generation
- Implemented data parsing algorithms to determine key metrics, such as identifying the highest sales product.
- Applied knowledge of **Excel** data manipulation and C# programming to streamline the reporting process

COMAP 2023 Competition: Predicting Wordle Results

- Collaborated with a team to develop a statistical model using probabilistic analysis to predict Wordle result frequencies, applying techniques relevant to time-series and marketing trend forecasting
- Developed an application to simulate the model by predicting how many report results on a specific date
- Achieved a structured and innovative approach to solve real-world prediction problem within tight competition deadlines

Data Extraction & Filtering (MySQL)

- Utilized MySQL to extract specific IP address data, leveraging advanced queries such as aggregations and subqueries
 - Retrieved and filtered data based on predefined criteria to support analytical insights
 - Applied data manipulation techniques to ensure the accuracy and relevance of the extracted information
-

EDUCATION

Bachelor of Science: Computer Science

Winthrop University, Rock Hill, SC

Aug 2020 - May 2024

GPA: 3.881

Honor: Magna Cum Laude

Relevant Coursework: Statistical Methods, Advanced Mathematical Problem Solving, Data Structures and Algorithm Analysis, and Database Processing, Information Security

SKILLS

Programming Languages: JavaScript, Python, C#

Hard Skills: MySQL, MongoDB, Excel, Git, GitHub, Power BI

Soft Skills: Communication, Teamwork, Problem-Solving, Time Management
