

Hariprasad Manchikatla

TX, USA | +1 (214)-400-6820 | manchikatlahariprasad3@gmail.com | [Linkedin](#)

PROFESSIONAL SUMMARY

Analytical and detail-oriented **Data Analyst** with over 4+ years of experience transforming complex **healthcare, pharmaceutical, and enterprise data** into actionable insights across Fortune 500 organizations including **Blue Cross Blue Shield USA, Dell Technologies, and LTI Mindtree**. Skilled in designing and optimizing end-to-end **ETL pipelines** using **SQL, SSIS, Python, and Talend** to manage multi-million record datasets with high accuracy and performance. Demonstrated success in **predictive modeling, risk scoring, and data warehouse optimization** using tools such as **Snowflake, Azure Data Lake, and SAS** to enhance decision-making and reduce operational inefficiencies. Proven expertise in developing interactive dashboards in **Power BI and Tableau** that deliver real-time visibility to executives and stakeholders. Adept at statistical and machine learning analysis in **Python** and **R** to drive cost forecasting, clinical outcomes improvement, and resource allocation. Collaborative leader recognized for implementing **data governance frameworks** and standardizing analytics processes across global teams, ensuring regulatory compliance and measurable business impact.

EXPERIENCE

- | | |
|--|----------------------------|
| BCBS | USA |
| Data Analyst | Sept 2025 – Current |
| <ul style="list-style-type: none">Developed and maintained ETL workflows using SQL Server Integration Services (SSIS) and advanced SQL queries to extract, transform, and load claims and membership data from diverse sources, ensuring data reliability for over 25 million beneficiary records.Leveraged Python and R scripts for advanced statistical analysis and cohort identification, supporting case management teams and enabling targeted interventions for more than 500,000 high-risk members.Optimized Snowflake data warehouse schemas in collaboration with IT, reducing data redundancy and improving query efficiency to support real-time reporting across 30+ operational dashboards.Employed SAS and SQL to execute predictive modeling for risk scoring and cost projections, accurately forecasting medical expenses for 3 million members, aiding in budget planning and resource allocation.Conducted root cause analysis on claims denials and payment discrepancies using SQL and Excel Power BI, facilitating resolution processes that recovered \$2.3M in delayed reimbursements within 6 months. | |
| LTIMindtree | India |
| Data Analyst | Oct 2021 – Feb 2023 |
| <ul style="list-style-type: none">Engineered complex SQL queries and performance-tuned stored procedures in Microsoft SQL Server to extract, join, and aggregate 20M+ transaction records, enabling accurate quarterly compliance reporting for banking clients.Synthesized raw data from AWS Redshift into actionable Power BI dashboards, incorporating DAX measures and advanced data modeling, which improved financial forecasting accuracy and reduced manual reconciliation by 18 business days annually.Automated ETL workflows in Python using Pandas and NumPy, integrating API-based data ingestion for 7 regional data sources, fostering cross-departmental transparency through real-time analytics.Consolidated disparate Excel data repositories with VLOOKUP, Power Query, and pivot tables to create a unified data dictionary, streamlining onboarding for new analysts and cutting data preparation time by 240 hours per quarter.Validated customer and invoice datasets using Spark SQL and PySpark schema checks, ensuring zero critical errors across 12 product lines prior to enterprise ERP migration.Directed a team of 4 analysts in implementing version-controlled analytics scripts using GitLab CI/CD pipelines, establishing reproducible workflows aligned with LTI Mindtree data governance protocols.Architected a stakeholder-facing KPI matrix in Tableau, integrating inputs from business units and translating strategic objectives into 60+ measurable indicators that guided executive decision-making.Championed Agile collaboration with cross-functional squads via Jira sprint ceremonies, accelerating project delivery by 14 days through proactive dependency management and knowledge-sharing sessions. | |
| Dell Technologies | India |
| Data Analyst | Oct 2019 – Sep 2021 |
| <ul style="list-style-type: none">Developed interactive Power BI dashboards with advanced DAX measures to deliver actionable insights for 15 business stakeholders, accelerating monthly reporting cycles by 5 full days and enhancing decision quality.Integrated heterogeneous datasets from Snowflake and Oracle using Talend ETL pipelines, improving data accuracy and enabling 1,500+ concurrent user-driven analytics queries without latency. | |

- Designed and implemented **predictive forecasting models** leveraging **R** and **machine learning techniques (Random Forest, ARIMA)**, enabling precise inventory demand predictions for 50+ SKUs, preventing excess stock worth \$520K.
- Streamlined **Excel workflows** with **VBA macros** for daily performance reporting, applying strong time management skills to reduce manual intervention by 32 hours weekly.
- Led migration of legacy data systems to **Azure Data Lake**, mentoring a team of 6 analysts and collaborating closely with **cloud architects** to ensure seamless data availability and zero downtime.
- Championed adoption of **Dell AI Factory tools** in **analytics pipelines**, driving innovation through **AI-enabled data processing** and **governance**, aligning technical strategies with business goals closely with stakeholders.
- Established **data governance frameworks** using **Collibra**, fostering cross-functional collaboration and standardizing data definitions across 10+ departments.

Cipla

India

Data Analyst Intern

Mar 2019 – Sept 2019

- Engineered **SQL-based ETL workflows** in **PostgreSQL** to integrate **1.2M pharmaceutical batch records** from legacy manufacturing systems, improving cross-site data availability by reducing retrieval time by 480 hours annually.
- Devised **anomaly-detection models** in **Python (Pandas, NumPy, Scikit-learn)** to flag out-of-spec API potency results, enabling **Quality Assurance** teams to resolve 62 critical batch deviations ahead of release schedules.
- Orchestrated **Power BI interactive dashboards** consolidating **SAP ERP** and **LIMS data streams**, enhancing executive decision-making speed by 4 business days per monthly reporting cycle.
- Synthesized **patient safety trend analyses** using **R** and **Tableau** to identify adverse-event correlations across 15 therapeutic lines, guiding **clinical trial pipeline** adjustments worth \$6.8M in projected savings.
- Automated **compliance reporting scripts** in **Python** for **FDA** and **EMA** submissions, reducing preparation time for 9 audit packages from 3 weeks to 5 business days and improving **audit pass rates**.

TECHNICAL SKILLS

Data Analysis & Visualization: Power BI (DAX, interactive dashboards, performance tuning), Tableau, Excel (PivotTables, Power Query, VBA macros, advanced formulas)

Databases & ETL Tools: SQL Server (T-SQL, stored procedures, query optimization), SSIS, Talend, PostgreSQL, Snowflake, AWS Redshift, Oracle, Azure Data Lake, MySQL

Programming & Scripting Languages: Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), R (statistical computing, data visualization), SAS, Spark SQL, PySpark, VBA, Bash scripting

Data Warehousing & Modeling: Star and snowflake schema design, dimensional modeling, data warehouse architecture, metadata management, data dictionary development

Statistical Analysis & Machine Learning: Predictive modeling (Random Forest, ARIMA, regression analysis), clustering, classification, time series analysis, hypothesis testing, anomaly detection, cohort analysis

Big Data & Cloud Technologies: Azure Data Lake, Snowflake, AWS Redshift, Google BigQuery, Hadoop basics, Spark data processing

Data Governance & Quality Assurance: Data validation and cleansing, error rate reduction, data lineage, version control with GitLab/GitHub CI/CD pipelines, Collibra for data governance, compliance reporting (FDA, EMA)

Business Intelligence & Reporting: KPI development, dashboard creation, real-time reporting, stakeholder engagement, business requirements gathering, executive presentations

EDUCATION

Webster University	St. Louis, MO, USA
Master of Science in Cybersecurity (Emphasis: Data Analytics)	Jan 2023 – May 2025
Geethanjali College of Engineering and Technology	Hyderabad, India
Bachelor of Technology in Electronics and Communication Engineering	May 2016 – Sep 2020

CERTIFICATION

- **Excel Data Visualization: Mastering 20+ Charts and Graphs** – LinkedIn (Issued Oct 2023)
- **Microsoft Certified: Azure Fundamentals** – Microsoft (Issued Jan 2022)
- **Global Consumer Banking Virtual Internship Program – Australia** – Citi (Issued May 2021)
- **Quantum Data Analytics Job Simulation on Forage** – (Issued Oct 2025)
