

# Nikhil Doye

Boston, MA | [doye.n@northeastern.edu](mailto:doye.n@northeastern.edu) | <https://www.linkedin.com/in/nikhil-doye/> | <https://github.com/Nikhil-Doye/>

## TECHNICAL SKILLS

**Languages:** Advanced - Python, JavaScript, SQL (3 yrs) | Intermediate - Java (2 yrs) | Foundational - C++, C# (0.5 yrs)

**Softwares:** Langchain, LangGraph, AWS (EC2, ECR/ECS), Power BI, MLflow, Apache Airflow, Databricks, MongoDB, Docker, Kubernetes, GCP (BigQuery, Cloud Compose, Cloud Run), Cursor, FastAPI, Jira, Bash, Git, TensorFlow, Flask, NodeJS

## WORK EXPERIENCE

### AI Engineer

May 2025 - Present

*IpserLab LLC*

*Austin, TX*

- Built a multi-agent LLM travel planner (LangGraph + RAG over flight/hotel APIs) that generates itineraries 60% faster.
- Productionized a FastAPI stack (Redis, Pinecone, Airflow) with tool-use guardrails, eval harness, and telemetry, lifting CSAT to 4.6/5.
- Automated OTA search→filter→book with function-calling + Playwright; -45% E2E time, +18% booking success.

### Software Engineer Intern

Jul 2024 - Dec 2024

*Fix-It 24/7 Group LLC*

*Denver, CO*

- Designed and developed 3 production RESTful APIs using Java and Spring Boot, serving 10K+ monthly users with 99.9% uptime and reducing average response time by 35% through clean, maintainable code following industry best practices
- Built responsive React and TypeScript interfaces, increasing customer satisfaction scores by 20% and enabling seamless user experience through efficient component architecture and reusable design patterns
- Implemented CI/CD pipelines with Docker and Kubernetes on AWS, cutting deployment time from 2 hours to 15 minutes and eliminating 90% of manual deployment errors through automated testing frameworks

### Software Engineer II

Jul 2021 - Jun 2023

*LTI-Mindtree*

- Developed scalable Java microservices with MongoDB for high-throughput platform processing 500K+ weekly records, reducing incident resolution time by 25% through efficient algorithm implementation and performance optimization
- Researched and implemented new NLP frameworks to enhance ticket classification system, achieving 90%+ precision and demonstrating ability to recommend new tools and technologies for product quality improvement
- Built interactive data visualization dashboard using JavaScript and modern frameworks, enabling analysis of 1M+ records and reducing reporting time by 40% through optimized query algorithms
- Participated in peer code reviews and Agile ceremonies, helping reduce production bugs by 25% through collaborative development and knowledge sharing within development team

## PROJECTS

### AI Workflow Builder(~60 hrs) | [GitHub Link](#)

Oct 2025 - Present

- Built AI-powered visual workflow automation platform with React Flow, drag-and-drop interface, and real-time execution
- Developed AI copilot that generates workflows from natural language with 95%+ accuracy and automatic validation
- Architected execution engine with parallel processing, error handling, and integrations for AI, databases, and external services

### AI-Powered Voice Browser Automation(~50 hrs) | [GitHub Link](#)

Sep 2025 - Sep 2025

- Built voice-controlled browser automation system with React, Node.js, Deepgram, and OpenAI GPT-4
- Developed universal web automation engine using Playwright and Browserbase with intelligent selector strategies
- Architected microservices system converting speech to structured browser actions with safety controls

### Auto-ML Agent(~40 hrs) | [GitHub Link](#)

Aug 2025 - Sep 2025

- Automated end-to-end ML pipeline from data ingestion to deployment.
- Integrated LLM-based insights for model interpretability using OpenAI SDK.
- Enabled safe sandboxed execution using E2B with multi-model support.

## EDUCATION

### Northeastern University

Graduated: Mar 2025

Master of Science, Computer Science (GPA - 3.9/4.0)

### IIT Tirupati

Aug 2017 - Apr 2021

Bachelors of Technology, Electrical Engineering

## ACTIVITIES

**AI Blogs** - Published 10+ blogs on AI, Data Engineering and Cloud Tools

Feb 2025 - Present

**AI Hackathon** - Received Silver Medal for leading a team of 5 to build an AI-powered ITSM classification tool

Dec 2024

**Kaggle Competition** - Gold Medalist - achieving 92% accuracy in dropout prediction modeling

Nov 2024
