Profile

A motivated technology professional with fundamental knowledge and demonstrated passion for the area of data analysis. Possesses a solid understanding of data analysis principles and techniques, with developing proficiency in BI tools such as Power BI, Tableau, and data manipulation using SQL, Excel and Python to identify patterns and extract insights from information. Seeking a position as a Data Analytics Specialist to utilize my educational background & experience with excellent analytical, technical and programming skills aiming to thrive as a dynamic top notch Data Analyst.

Data Analysis & Testing Skills

- Proficient in creating interactive and visually aesthetic dashboards and reports using Tableau and Power BI to visualize complex datasets and communicate insights to diverse audiences.
- Expert in developing and customizing reports to track key performance indicators and support business decisions.
- Expertise in using SQL to query, manipulate, and extract data from relational databases systems including MYSQL, SQL Server for data storage, retrieval, and management. Solid understanding of relational database concepts, including normalization, data integrity, and schema design.
- Proficient in Python, and SQL for data analysis, automation, and scripting.
- Develop working knowledge of Python Language for data cleaning, transformation, and preparation for analysis using Pandas and Numpy.
- Have skills in utilizing Python Libraries, Microsoft Excel spreadsheet to perform data wrangling and data mining.
- Ability to design and implement ETL processes to integrate data from multiple sources and translate business requirements into effective data models.
- Adept at working with large datasets, conducting statistical analysis to analyze data, identify trends, patterns and implement meaningful data-driven solutions.
- Strong skills in critical thinking, problem-solving, data interpretation to analyze complex problems, identify root causes, and develop effective solutions, perform root cause analysis and debug data-related issues.
- Expert in writing effective reports, creating and maintaining technical documentation, presenting data finding to both technical and non-technical stakeholders, and collaborating effectively with cross-functional teams.
- Extensive knowledge in creating Test Automation Script using Selenium Web Driver with Java and Python.
- Good understanding of the overall workflow of the software development life cycle.
- Solid knowledge on Object-Oriented Programming (OOP) concept and Java language.

Technical Skills

Programming languages Python, JavaScript, Java

Data Visualization tools Power BI, Tableau

Database MySQL, MongoDB

Libraries Pandas, NumPy, Matplotlib, Seaborn, React.js, Redux.js, React-Bootstrap UI

Web Technologies HTML5, CSS3, SASS, JSON, Ajax

Web Development Frameworks Bootstrap, Express.js, Node.js

Test Automation Tools and Frameworks Selenium Web-Driver with Java and Python, Cypress, Jest, REST-Assured, TestNG

Testing Types Functional, UI, System, End to End, Smoke, Sanity, Regression, UAT etc.

Project Management Methodologies Agile(Scrum), Waterfall, Trello

Source Code Management Tools Git, Github

IDE Jupyter Notebook, IntelliJ IDEA, PyCharm, Eclipse

Technologies Microsoft Office 365, Excel, AWS, REST API

Tools VS Code, MySQL workbench, Postman, MongoDB Compass

Operating Systems Windows, Linux

Experience

Samsung R & D Institute Bangladesh Ltd

SOFTWARE ENGINEER

Dhaka, Bangladesh

Jun. 2016 - Nov 2016

- Developed a mobile app using Tizen web for showing weekly Load shedding Schedule of Nepal. It alerts users about upcoming load shedding. There is a torch functionality which users can use during load shedding.
- Developed front end of Sales Force Automation system for a Bangladeshi chain shop business
- Wrote detailed documentation for the projects I worked on.
- Deployed APKs in a large number of Samsung tablet devices
- Did some comparative business analysis on behalf of my team lead.

Data Analysis Projects

Walmart Sales Data Analysis: End-to-End SQL + Python Project An end-to-end data analysis solution designed to extract critical business insights from Walmart sales data. Python is used for data processing and analysis, SQL for advanced querying, and structured problem-solving techniques to solve key business questions, data manipulation and data pipeline creation. Used the Kaggle API to download the Walmart sales datasets from Kaggle.

Technologies used: Python (Pandas, Numpy), SQL(MySQL), JupyterLab

Github Link: https://github.com/iffat-ara-nadia/walmart_sales_analysis

Netflix Data Analysis: End-to-End ETL Project An end-to-end data analytics project using Python and SQL. Used Kaggle API to download the dataset and to data processing and cleaning using Pandas and load the data into MySQL to find some interesting insights about Netflix shows and movies using SQL.

Github Link: <https://github.com/iffat-ara-nadia/Netflix-Data-Analysis-Python-SQL->

E-Commerce-Sales: Microsoft-Power-BI Created a dashboard to track and analyze their sales across a specific area using Microsoft Power BI, Power Query Editor.

Github Link: <https://github.com/iffat-ara-nadia/E-Commerce-Sales---Microsoft-Power-BI>

SQL-Pizza-Sales-Project Analyzed pizza sales of Pizza hut using SQL queries.

Technologies used: SQL, MySQL database.

Github Link: <https://github.com/iffat-ara-nadia/SQL-Pizza-Sales-Project>

HR Analytics Created a dashboard to help an organization to improve employee performance and retention (reduce attrition) by creating a HR Analytics dashboard.

Technologies used: Microsoft Power BI

Github Link: <https://github.com/iffat-ara-nadia/HR-Analytics>

Hotel Booking Exploratory Data Analysis (EDA) and Data Cleaning of hotel booking cancellations as well as other factors that have no bearing on their business, yearly revenue generation giving some business advice to these hotels so that they can solve this problem.

Technologies used: Pandas, Matplotlib, Seaborn, Jupyter Notebook

Github Link: <https://github.com/iffat-ara-nadia/Hotel-Booking->

Earthquakes Tableau Dashboard Created an interactive dashboard for data analysis of Earthquakes between 1900 -2013 using Tableau Public.

Github Link: <https://github.com/iffat-ara-nadia/Earthquakes-Dashboard-by-tableau>

Web Development Projects

MERN E-Commerce platform: An e-commerce platform where a customer can browse and search for products, add those to a cart, create an account and place an order. Payment via PayPal and Credit Card was also implemented. An admin can manage products, users and orders from the admin panel.

Technologies used: React, Redux, React Bootstrap, Node.js, Express.js, MongoDB

Github Link: <https://github.com/iffat-ara-nadia/e-commerce-platform>

Video Rental App: A DVD rental shop application developed using Node.js to design the backend, React for frontend and MongoDB for data store. I used Express.js to design the REST APIs. I wrote unit and integration tests using Jest. I also addressed different authentication, authorization, data validation issues.

Github Link: <https://github.com/iffat-ara-nadia/video-rental-app>

Education & Certification

Google IT Support Professional Certificate**JUNIOR IT ANALYST PROGRAM****NPower Canada**

14-week intensive online class training on the fundamentals of computer technology and project management.

*Calgary, Alberta, Canada**Aug 2023 – Nov 2023***University of Dhaka****BACHELOR OF SCIENCE IN COMPUTER SCIENCE AND ENGINEERING***Dhaka, Bangladesh**2010 - 2015*

Extracurricular Activity

- Volunteered at Inclusion X non-profit organization. Helped Autistic Children to learn basic computer activities. Dhaka, Bangladesh July-September 2015
- Attended Bangladesh ICT EXPO- 2015 Innovation Zone
- Participated as WHO Delegate in Dhaka University National Model United Nations (DUNMUN) 2015 Conference
- Painting
