PROFILE

- Innovative and results-driven Software Developer with 1 year of experience in leveraging object-oriented programming to enhance code maintainability and deploying web applications on AWS to optimize performance.
- Proficient in developing full-stack web applications, RESTful APIs, and automated deployment processes.. Adept at improving user engagement through modern UI design and integrating third-party services for seamless data synchronization.

EMPLOYMENT HISTORY

Jan 2021 — Dec 2021

Summitworks, Prashant Gurav

New Jersey

- Utilized object-oriented programming (OOP) principles to improve code readability and maintainability
- Developed a full stack web application with a modern user interface that improved user engagement by 50%
- Developed a RESTful API that integrated with a third-party service, allowing for seamless data synchronization and improved performance

EDUCATION

Sep 2018 — Dec 2020

Bachelor of Science, University of California, Riverside

Riverside

Bachelor of Science in Computer Science | 3.0 GPA

SKILLS

MySQL	Expert	C++	Skillful
React	Expert	SQL	Skillful
Python	Expert	Flask	Skillful
Java	Expert	Django	Expert
JavaScript	Expert	Heroku	Expert
HTML/CSS	Expert	AWS	Beginner
AngularJS	Skillful	Vue.js	Beginner
Node.js	Beginner		

EXTRA-CURRICULAR ACTIVITIES

Sep 2024 — Sep 2024

Spotify

Los Angeles

- Created a full stack application where a user is allowed up to upload songs/download files and play songs. Instead of reading and writing the song files into a input stream and storing them, i got their paths directory and turn it into uris and converted them to url by encoding in front end react.js. Hosted on heroku backend java spring boot jpa and vercel front end react.js.

Jun 2024 — Jul 2024

Stock Prediction

Los Angeles

- Implemented a CRUD application where it allows users to buy register/sign up, buy stocks and sell them for profit.
- Utilized LSTM to predict stock prices for people to predict when the stock is trending or slowly declining
- Deployed through heroku.
- Usage of flask/sqlalchemy/python/css/html

Apr 2024 — May 2024

Blackjack W/ Prediction

Los Angeles

- Engineered a website where users are allowed to play blackjack but included a mathematical equation to allow users to predict the dealers next card.
- Users are able to split/double down and bet on various hands and win money
- Utilized React/Javascript and Heroku

Aug 2021 — Sep 2021

Canvas

- Developed an application similar to canvas aka online courses system platform where teachers are able to assign homework/test and record their lectures and grade students homework
- Basic CRUD application but also a dash of able to message other students.
- Deployed on Amazon EC2, usage of angular frontend and django backend
