

Jainam Patel

Austin, TX — jainam1428@gmail.com — (919) 909-0177 — linkedin.com/in/Jainam-patel28

PROFESSIONAL SUMMARY

Epic Cogito Certified Reporting Analyst with analytics at Harvard Medical School and Massachusetts General Hospital. Skilled in Epic Cogito, Clarity, Caboodle, SSIS ETL, SQL Server, Power BI (DAX, Power Query, Data Modeling), AI Builder, business requirements gathering, and HIPAA-compliant healthcare analytics. Holds **Epic Cogito** and **Microsoft Power BI (PL-300)** certifications.

WORK EXPERIENCE

Northeastern University – Roux Institute

Research Assistant

Mar 2026 – Present

Boston, MA

- Developed AI-powered healthcare research workflows using **Microsoft AI Builder**, Python, OCR, and REST APIs to automate document processing and clinical data extraction
- Built intelligent document processing solutions integrating AI Builder with machine learning models and healthcare datasets, improving research workflow efficiency and reducing manual processing

Harvard Medical School & Massachusetts General Hospital

Data Analyst

Jan 2025 – Jul 2025

Boston, MA

- Built and delivered **SlicerDicer sessions, Radar dashboards, and Reporting Workbench reports** supporting clinical and **Revenue Cycle** analytics, resolving Epic Cogito reporting requests within defined SLAs
- Developed **10+ Power BI dashboards** embedded in Epic Radar using **Power Query, DAX**, and dimensional data models, improving access to operational and financial reporting for clinicians and business users
- Wrote advanced **Clarity SQL** queries using **CTEs, multi-table joins, and subqueries** across Epic Clarity encounter, account, and department tables to support operational and Revenue Cycle reporting
- Queried **Epic Caboodle** fact and dimension tables, validated ETL outputs, and ensured HIPAA-compliant data quality for enterprise reporting solutions
- Collaborated with clinicians and operational stakeholders to gather reporting requirements, validate business rules, perform report testing, and translate business needs into technical reporting solutions

Kaplife Healthcare

Business Intelligence Analyst

May 2024 – Aug 2024

Ahmedabad, India

- Created **Power BI dashboards**, SQL reports, and interactive reporting solutions to monitor production KPIs, supply chain performance, and operational metrics, supporting business decision-making
- Collaborated with business stakeholders to gather reporting requirements, document workflows, and automate regulatory ETL processes, reducing audit preparation time by **40%** while ensuring **WHO and EU GMP compliance**

Rushkar Technology

Data Analyst

Jan 2022 – Aug 2023

Ahmedabad, India

- Designed and developed **SSIS packages** using **Control Flow, Data Flow, Execute SQL Tasks, Lookup transformations, Derived Columns, and Conditional Splits** to manage ETL processes across SQL Server databases, flat files, and third-party business applications
- Gathered business requirements, created functional documentation, and collaborated with stakeholders to develop and test BI and ETL solutions, ensuring accurate data delivery and successful implementation
- Created interactive **Power BI dashboards** using **Power Query, DAX**, dimensional data models, and advanced conditional formatting by integrating AWS Redshift, Google Analytics, and CRM systems
- Engineered **SQL Server objects** using **stored procedures, CTEs, window functions, and indexing strategies** to optimize query performance across datasets exceeding **2 million records**

PROJECTS

Epic Cogito Resource Manager Dashboard

Epic Caboodle, Clarity, SlicerDicer, Reporting Workbench, SQL, Power BI

- Built an **Epic Cogito Resource Manager Dashboard** with **7 components**, delivering analytics on **surgical costs, OR utilization**, performance, and rescheduling trends
- Gathered reporting requirements, designed Revenue Cycle dashboards, Reporting Workbench reports, and SlicerDicer sessions, translating business needs into technical reporting solutions using Power BI, DAX, and Power Query

NYC Taxi Data Warehouse Analytics Pipeline

AWS S3, Mage, Amazon Redshift, SQL, Looker Studio

- Architected an end-to-end **ETL pipeline** using AWS S3, Mage, and Amazon Redshift to ingest and transform trip data into a **dimensional warehouse** with **7 dimension tables** and a central **fact table**
- Configured analytical dashboards from a **star-schema model** optimized for scalable querying and reporting performance

EDUCATION

Master of Science in Data Analytics Engineering

Northeastern University

Dec 2025

Boston, MA

TECHNICAL SKILLS

Healthcare Analytics: Epic Cogito (Caboodle, Clarity, Revenue Cycle, SlicerDicer, Reporting Workbench, Radar)

Healthcare Standards: HIPAA, PHI, IRB, EHR/EMR, HL7, FHIR, ICD-10, CDM

Data Visualization & BI: Power BI, Tableau, MS Excel, Crystal Reports

Business Analysis: Requirements Gathering, Workflow Analysis, Stakeholder Management, Report Testing

Programming & Databases: SQL Server, PostgreSQL, Python, R, SAS, REST APIs

ETL & Automation: SSIS, SQL Server Agent, Azure, Microsoft Power Platform, Power Automate (Cloud Flows), Data Connectors, AI Builder, Snowflake, Databricks

Certifications: Epic Cogito, Microsoft Power BI (PL-300), AWS Cloud Foundations
