SUMMARY

Python Full Stack Developer with 4+ years of experience engineering scalable, secure, and high-performance web applications and data pipelines. Expert in backend Python frameworks Django, FastAPI, Flask modern frontend stacks React, Next.js and cloud-native architectures AWS Lambda, ECS, Terraform. Proven ability to accelerate delivery, reduce latency, and optimize costs while mentoring teams on clean code and best practices.

SKILLS

Languages: Python, JavaScript, TypeScript, SQL, Shell

Scripting, C, C++

Backend: Django, FastAPI, Flask, Celery, Node.js, REST,

GraphQL, WebSockets

Frontend: React.js, Next.js, Redux, Tailwind CSS, Material UI,

AngularJS, Bootstrap

Cloud & DevOps: AWS (Lambda, ECS, EKS, S3, SQS,

CloudWatch, API Gateway), Docker, Kubernetes, Terraform,

GitHub Actions, Jenkins

Databases: PostgreSQL, MySQL, MongoDB, Redis,

DynamoDB, NoSQL

Testing & Security: Pytest, Playwright, Selenium, Postman, OAuth2, JWT, Burp Suite, SonarQube

Monitoring & Logging: Prometheus, Grafana, ELK Stack (Elasticsearch, Logstash, Kibana), Loki

Data Engineering: Pandas, NumPy, ETL pipelines, XML parsing, Excel Macros

Methodologies: Agile Scrum, TDD, BDD, DDD, Clean Architecture, Microservices, SOLID Principles

EXPERIENCE

Python Full Stack Developer | Northern Trust | Rolla, Mo

Aug 2024 – Present

- Engineered event-driven microservices with FastAPI, Kafka, and AWS Lambda to process 20M+ API requests/month at 99.999% uptime and sub-100ms latency.
- Orchestrated migration from legacy monolith to containerized microservices deployed on ECS Fargate with Terraform, reducing infrastructure costs by 35% and improving scalability.
- Designed and implemented an internal GraphQL API gateway, unifying multiple services and reducing integration overhead by 45%, accelerating frontend development.
- Automated CI/CD pipelines using GitHub Actions, Terraform Cloud, and Jenkins, doubling deployment frequency and improving release reliability.
- Collaborated closely with frontend engineers on React and Next.js dashboards, improving SSR performance and boosting First Contentful Paint by 30%.
- Secured APIs with OAuth2 and JWT, implementing OWASP best practices and rate limiting to protect sensitive data.
- Established robust monitoring and alerting using Prometheus, Grafana, and AWS CloudWatch, reducing mean time to resolution by 60%.

Backend Developer | Mahindra & Mahindra | Mumbai, India

Jan 2022 – Jul 2023

- Engineered manufacturing workflow dashboards using Flask and React, improving data reporting lag by 45% across multiple production plants.
- Refactored backend data ingestion pipelines with Django, Celery, and PostgreSQL, increasing asynchronous throughput by 35% while maintaining PHI compliance.
- Built fully containerized CI/CD pipelines with Jenkins and Docker, reducing deployment times by 50% and boosting release confidence.
- Automated analytics workflows using Pandas, NumPy, and Excel Macros, saving 25% analyst time and reducing errors.
- Applied Clean Architecture and Domain-Driven Design principles to modularize core services, improving maintainability and scalability.
- Implemented real-time monitoring with Prometheus and Grafana, reducing system downtime and accelerating incident response.
- Partnered with cross-functional teams including operations and QA to ensure seamless deployment and feature rollout.

Junior Backend Developer | Wipro | Pune, India

Jan 2020 – Dec 2021

- Developed and maintained RESTful APIs using Django and Flask, powering logistics and service portals for 200+ branches.
- Built real-time event ingestion pipelines with Kafka, ensuring traceability and reliability for operational alerts.
- Automated asynchronous tasks using Celery, improving job processing throughput by 30% and reducing failure rates.
- Integrated third-party APIs (FedEx, Shippo) for real-time package tracking and SLA monitoring.
- Secured APIs with JWT and RBAC, adhering to best authentication and authorization practices.
- Collaborated with QA teams to build automated testing suites using Postman and Pytest, reducing bug detection time by 50%.

EDUCATION

Missouri University of Science and Technology | M.S. Computer Science | Missouri, US

May 2025
