

Joseph Miranda

Data Analyst

Joseph.V.Miranda@pm.me | 619-787-0530 | [LinkedIn](#) | [Github](#)

Summary

Data analyst leveraging 12+ years of healthcare operations experience to drive analytical solutions. Delivered \$60K in revenue recovery and 20% cost reductions through statistical analysis and predictive modeling. Proficient in SQL, Python, and Tableau with strong foundation in healthcare data, regulatory compliance, and operational workflows.

Skills

Data Visualization and Analysis: Tableau, R, Python visualization engines (Matplotlib, Plotly, Seaborn), Statistical Analysis, Advanced Excel

Programming Languages: Python, R, SQL, NoSQL, Shell Scripting

AI & Automation Tools: Enterprise AI Platforms (Claude), Local LLM Implementation (Ollama, AnythingLLM), Prompt Engineering, AI-Assisted Development

Databases & Tools: MySQL, MongoDB, PostgreSQL, Excel, Jupyter Notebook

Certifications: [Coding Temple - Data Analyst](#)

Projects

Predictive Inventory Management System (Python, Excel, Tableau, Statistical Analysis)

[https://github.com/mirjo3/projects/tree/main/inventory_par_level_optimizer]

- Built Python predictive models analyzing usage patterns across 60+ locations, optimizing inventory levels using statistical analysis
- Created Excel and Tableau visualizations presenting inventory recommendations, achieving 20% cost reduction while maintaining service levels

Workforce Distribution Optimization (Excel, Statistical Analysis, Data Visualization, Workforce Analytics)

[https://github.com/mirjo3/projects/tree/main/workflow_optimization]

- Analyzed workforce activity data across 16 shifts to identify workload imbalances and optimize job distribution
- Redistributed duties to lighter-activity shifts, achieving balanced productivity across all locations

Medicare Opioid Treatment Program Analysis (Python, Tableau, API Integration, Statistical Analysis)

[https://github.com/mirjo3/projects/tree/main/coding_temple_capstone]

- Analyzed Medicare treatment programs via Python APIs, identifying underserved regions through demographic analysis
- Built data processing pipeline combining treatment center and census data for geographic analysis
- Developed interactive Tableau dashboard showing per capita treatment ratios by state for policy planning

Experience

Sharp Healthcare (Memorial Hospital, Mary Birch Hospital)

Inpatient Pharmacy Technician (San Diego, CA)

JUN 2024 – PRESENT, JAN 2011 – APR 2023

- Led Unit Practice Council process improvement initiatives, standardizing workflows across multiple units
- Reduced inventory costs 20% while maintaining service levels through statistical optimization analysis

UC San Diego Health East Campus Medical Center

Inpatient Pharmacy Technician (San Diego, CA)

JUN 2024 - PRESENT

- Optimized inventory par levels through statistical analysis, reducing carrying costs while ensuring medication availability
- Automated medication rotation tracking, reducing waste through 90-day usage analysis

Coding Temple

Data Analyst Trainee (Remote)

MAY 2023 - JUL 2023

- Developed proficiency in Python programming, data cleaning, and statistical analysis
- Built data visualizations and dashboards using Pandas, Matplotlib, Plotly, and Tableau
- Mastered SQL fundamentals and complex query writing for database analysis
- Learned R programming for data manipulation using dplyr and tidyr

Sharp Healthcare (Memorial Hospital)

Inpatient Pharmacy Technician Lead (San Diego, CA)

JUL 2022 – APR 2023

- Supervised 16 direct reports and managed scheduling for 60+ staff across 26 daily shifts
- Identified \$60K in missed revenue through billing data analysis and workflow pattern recognition
- Redesigned workflow processes across 14 shifts, optimizing staff productivity through data analysis

- Developed training programs for technician onboarding and career advancement, improving retention
 - Forecasted staffing needs using historical data analysis to ensure operational coverage
-

Education

Coding Temple, Data Analytics Certificate

Product School, Product Management Certification

Ashford University, Healthcare Administration
Bachelor of Arts, Magna Cum Laude (3.7 GPA)
