

Professional Experiences

Product Manager – Business Enablement | Quantum Pulse Consulting., Detroit, MI

January 2024 - Present

- Playing a key role as a product owner for the 'Business Enablement' value stream.
- Own the design, development and maintenance of ongoing metrics, reports and dashboards to help determine key business conclusions.
- Recognize and adopt best practices in reporting, analysis and research, test design, validation and documentation.
- Collaborate closely with UX Design and Engineering teams to deliver high quality, end-to-end experiences in a fast-paced startup environment.
- Managing a team of 5 members – Senior interns, interns and consultants as direct reports.
- Improved and shipped 4 features for the corporate website upon collecting user feedback and translate them into user acceptance criteria.
- Built documentation and wireframes/flowcharts for product roadmaps and presented proposal decks for early-stage clients.
- Track product features and measure quantifiable progress. Assisted the founder generate innovative strategies around product development and GTM.
- Won 3 clients interested in receiving digital transformation services with total revenues ranging between \$20,000 - \$30,000.
- Contributed in team expansion by participating in interview drives for graduate students & hand hold them with product related trainings.

Product Owner - Delivery | Quantiphi Inc., Boston, MA

May 2022 – July 2023

- Worked within delivery and customer success team handling a portfolio of 5 high-impact North America based clients across Retail, CPG and Financial Services & Insurance.
- Documented user requirements and acted as a bridge between the business and technical teams. Successfully communicated complex business information into smaller chunks of developer action items.
- Prepared statement of work drafts and ran them through reviews by the portfolio head, legal team and other stakeholders.
- Drafted user personas and acceptance criteria from the end user's standpoint. Collaborated with the UX design and solution architects' team to create wireframes and assisted in building prototypes on Figma.
- Contributed to the product's platform vision and roadmap by deeply understanding internal and external customer's needs.
- Transformed feedback and opportunities into high-impact features to be included in the platform roadmap.
- Used A/B testing to design, analyze & identify customer preferences, feasibility checks to increase customer engagement & conversions.
- Evaluated CX technologies (CCaaS platforms like Google CCAI, AWS Connect) and Conversational AI platforms like Dialog flow, RASA, Watson to identify gaps and areas of improvement.
- Appreciated for being successfully and constantly able to juxtapose my creative edge with Mathematics, Statistics and Tech to encode the questions underneath, break problems into smaller solvable chunks, identify interconnected spaces of opportunity to tap and deliver timely consumable insights.

Business Analyst - GTM | Quantiphi Analytics Pvt. Ltd, Bangalore, Karnataka, India

Oct 2021 – May 2022

- Played roles within the Delivery and Customer Success team across CPG, Retail, Healthcare, Financial Services & Insurance enabling data driven decision making.
- Built and maintained sales pipelines using CRM tools like Pipedrive and Salesforce CRM.
- Lead stakeholder level presentations showcasing customized AI/ML solutions solving the customer's problem.
- Researched the customer's background to understand their pain points and helping them identify the right data driven solutions.
- Broke down large amounts of data using data visualization tools like Power BI or Google Analytics to help customers have a better understanding of their problem.
- Helped clients uncover trends and draw meaningful interpretations from their unstructured data using SQL/Python.
- Worked on drafting RFPs (proposal decks) and proof of concepts with cloud-based AI/ML solutions - (AWS, GCP).
