PROFESSIONAL SUMMARY

- Over 5 years specializing in **Java**, **J2EE**, **Spring Boot**, **Hibernate**, **AWS** and optimizing database performance.
- Extensive years of experience in all phases of SDLC including design, development, testing, implementation and support using **Python** and java technologies.
- Experienced Full Stack developer skilled in building complete web applications from start to finish. Effective communicator of solutions to peers, business stakeholders, and superiors.
- Proficient in developing web-based applications using Java and J2EE technologies, including **Servlets**, **JSP**, **JDBC**, **Java Beans**, and **JSTL**.
- Skilled in various Spring frameworks (**Spring Boot Framework**, **Security**, **ORM**, **Spring MVC**, **MVVM**, **IO**, **Redis**, **Microservices**), **Django** and **hibernate**.
- Expertise in **MySQL**, **NoSQL**, **TSQL** databases, achieving significant improvements in query performance.
- Strong foundation in **Object-Oriented Programming** principles and design patterns, ensuring code review reusability and maintainability.
- Experienced in modern frontend development technologies such as **Javascript**, **Angular**, **React**, **HTML**, **XHTML**, **ES6**, **CSS**, **jQuery**, **MobX**, **Ajax**, and **Bootstrap**.
- Expertise includes abstracting and quantifying the computational aspects of the problems, designing and applying new statistical algorithms, as well as systems - level software design and implementation in different platforms e.g. R, sas, Python, Spark.
- Developed and documented **RESTful APIs** using **Node.js**, implementing secure authentication and authorization mechanisms.
- 4years + of development experience in cloud computing infrastructure such as Amazon web services (**AWS**). Experience in integrating code quality tools such as SonarQube, in CICD pipelines.
- Experience in handling messaging services using Kafka.
- Proficient in deploying applications using tools like **Jenkins**, **Maven**, **Docker (Containerization)**, **Kubernetes**, and **AWS Cloud services (EC2, S3, RDS, ELB, EBS)**.
- Experienced in using Java Networking like TCP/IP, UDP, FTP, and SMTP protocols to ensure reliable and efficient communication in networked applications.
- Experience in Developing Java/J2EE applications using Java, JSP, Spring MVC, Web Services and Groovy.
- Developed various Responsive Single Page Applications (SPA) using React.js and Closely worked with Application using react.js and Node.js libraries NPM, gulp directories to generate desired view and redux to root the URLs properly
- Demonstrated proficiency in problem-solving, troubleshooting, capable of functioning both autonomously with communication skills, work collaboration within teams.

PROFESSIONAL EXPERIENCES

GEICO | Maryland

June 2023-Present

Java Developer

- Engineered and optimized **Java 8** stored procedures, leveraging **Jenkins** to improve order-invoice reconciliation by 30%.
- Very strong experience writing API's/ and Web Services in **Python**.
- Designed and developed **REST** based Serverless microservices using SpringBoot along with **Apache Camel** and **GraphQL**.
- Used **J2EE** for developing web and distributed applications, utilizing **JSP**, **Servlets**, and **Java Beans**.
- Developed web applications using **Spring MVC**, **jQuery**, and **Bootstrap**. Implemented the Hibernate framework in the persistence layer for mapping an object-oriented domain model to a relational database.
- Strengthened system security through the implementation of robust authentication and authorization using Spring Security and **JWT**.
- Successfully coded and implemented an Ajax-based application infrastructure, fetching data from **RESTful APIs** and processing it as **JSON**.
- Contributed to front end web development using **HTML**, **CSS**, Front End Framework using **Angular**, **Angular CLI**, **React.js**, **TypeScript**, and **JavaScript**.
- Built and maintained server-side applications using **Node.JS** and **Express.JS**, handling complex backend logic and database interactions to deliver high-performance web services using UX Design principles.
- Managed **Mongo DB** documents, including upgrading and migrating across platforms, and designed custom **Mongo DB** applications tailored to specific client needs.
- Worked on **Mongo DB** for distributed storage and Processing.
- Deployed testing frameworks like **Mockito**, **JUnit**, **JMeter**, and **Mock MVC** to achieve Test-Driven Development (TDD) and BDD for Spring Boot applications.
- Worked with Jenkins under the CI/CD pipeline providing continuous improvement to agile software development teams.
- Drools Expert and browsing capability using Apache Solr with JBOSS.
- Worked extensively with **AWS Lambda**, **Amazon Connect**, **S3**, **DynamoDB**, **IAM**, **Secrets Manager**, **CloudFormation**, **AWS CLI**, **CloudWatch**, and **EC2**, optimizing cloud resources for efficient application deployment.

Environment: Java, Python, Perl ,Spring, MVC, Spring Boot, Hibernate, MicroServices, Rest, Apollo GraphQL, Jboss,Yarn, Node.JS, Npm, React JS, React native, HTML, HTML5, CSS, JavaScript, Angular 6, Angular.JS, AWS, Docker, Jenkins, SOAP, EJB, IBM MQ, Loh4j, JUnit, Wcag, Webpack, Mongo DB, Solr, SQL, IAM, Relation Databases, Teradata, Linux/Unix.

Mobileum Technologies

AT&T | Texas

September 2020 – July 2022

Java Developer

- Enhanced code readability by 20% through the application of **Spring Core** annotations for Dependency Injection.
- Applied **Microservices** architecture with **Spring Boot**, facilitating interactions through **REST** endpoints and Apache Kafka, Apache Spark message brokers.
- Experienced with **IBM MQ**, **Apache Kafka**, **Amazon SQS**, **Azure Service Bus**, **Google Cloud Pub/Sub**, and **RabbitMQ** to build reliable and scalable messaging systems for distributed system applications.

- Used Kafka streams as a message-bus and deployed data pipelines to ingest data to NoSQL data-stores like Cassandra.
- Developed applications using various Spring Framework modules, including core container, application context, **AOP**, **JDBC**, **ORM**, and web modules.
- Fortified API security by 35% by integrating **RESTful** services with **Spring Security** OAuth 2 and **JWT** tokens.
- Engineered a user-friendly interface through the development of the application front end with **HTML** forms, Java Page base Bean classes, and Java Server Pages.
- Experience in developing and deploying a Microservices application utilizing almost of the AWS Stack including **DynamoDB**, Kinesis, **SNS** and **SQS**.
- Created an AWS Lambda function to send notifications to slack from CloudWatch logs.
- Ensured efficient debugging, issue resolution by generating precise log files using **Log4j** and data protection and user authentication.
- Used **GCP** (Google Cloud Platform) to design, build, and optimize cloud-based solutions, ensuring efficient deployment and scalability while actively contributing to the enhancement of Java applications on the cloud.
- Developed and optimized Relational Databases Stored Procedures, Triggers, Functions, and Cursors to efficiently handle data from **MySQL** Databases. Designed **macros** inside the **Teradata** database that hold multiple **T-SQL** statements.
- Defined **Angular** routes using a Router module, enabling lazy loading for modules and components, and optimizing application performance. Expedited bug identification and resolution through test case documentation.

Environment: Java, Spring (Core, Security, ORM, MVC, Boot, Batch), JavaScript, JQuery, JSP, Servlets, Angular JS, React, HTML, CSS, IBM MQ, Log4j, SOAP & Restful Web Services, Eclipse Mars, Linux, Unix, Bash ,PL/SQL,Big data, GCP, Dynamo DB, Oracle Database, Teradata, DataDog, NewRelic, SVN Eclipse plugin, Unix Shell Scripting, Linux, Hadoop(Hbase, Oozie).

Mobileum Technologies

Kroger | Ohio

May 2018 – August 2020

Software Engineer

- Designed and developed a **Java** application for optimizing supply chain logistics, reducing waste, and improving delivery times.
- Integrated **Spring Boot** microservices architecture design for scalable and efficient service deployment. Implemented security best practices using **Spring Security** and OAuth 2 for secure data transactions.
- Employed **AWS** services like **EC2**, **S3**, and CloudFormation for scalable infrastructure management.
- Used **Hibernate** ORM for efficient data management and retrieval from relational databases and Utilized Hibernate for efficient database interactions with MySQL and **Mongo DB**.
- Involved in software architecture, detailed design, coding, testing and creation of functional specs of the application.
- Developed a clear Java-based real-time inventory tracking system leveraging IoT devices and AWS cloud services.
- Developed a data analytics and reporting system using Java, Spring Boot, and Apache Kafka.
- Developing application using WebSockets to provide full duplex communication between client and server.
- Implemented real-time data processing using **Apache Kafka** and Spring Boot for seamless integration with IoT sensors.
- Achieved a 25% reduction in inventory discrepancies through real-time monitoring and alerts.
- Integrated with various data sources and implemented **ETL** processes for data transformation and loading.
- Employed **JUnit** and **Mockito** , **Firestore** for unit testing and achieving Test-Driven Development (TDD). Implemented integration tests using **Spring Test framework** for end-to-end automated testing.

Environment: Java, Spring Boot, Spring Core, Spring ORM, Spring MVC, Spring Cloud, Visual Studio, Hibernate, JSP, Servlets, AngularJS, React js, & Restful Web Services, Web Sockets , Eclipse Mars, Linux, MacOS, Unix Shell Scripting, UI UX, MySQL, PL/SQL, Oracle Database.

TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript, SQL, Php, XML, Shell Scripting, Go, R, Elixir, Swift, HTML, CSS,C++.
- **Frameworks:** Spring Framework (Spring Boot, MVC, Security, JPA, AOP), Hibernate ORM, jQuery, Vue, React, AngularJS , Express.js, Cypress, Jest, FLink.
- **Web Technologies:** JSP, JSTL, Thymeleaf, ASP.net , Bootstrap, Apigee.
- **Database Management:** PostgreSQL, MySQL, SQL Server, NoSQL, Mongo DB, Dynamo DB, Data Modeling and Database Optimization.
- **Application/Web Server:** Apache Tomcat , WMS , Nginx
- **API Schema and Integrations:** RESTful Web Services, PayPal API, WebSocket.
- **Devops and CI/CD (Continuous Integration/ Continuous Development) :**Docker, Kubernetes, Helm, Jenkins, Jetty, AWS(EC2, S3, ECR, ECS, IAM), DataDog, Azure, SaaS, NewRelic, Google Cloud Platform(GCP).
- **Testing and Quality Assurance:** JUnit, Mockito, Selenium WebDriver, Playwright , Postman, Jasmine , Regression Testing, System Integration Testing, Test Automation, Software Quality.
- **Version Control and Collaboration:** Git, GitHub,Gitlab, JIRA (JIRA 8.19), Confluence, BitBucket , Agile Methodologies (Scrum,Kanban).
- **Security:** Spring Security (Spring Security 5), HTTPS, JWT.
- **Documentation and Reporting:** Technical Proficiency, Swagger (API Documentation), Lucid chart (Diagramming), Technical Documentation.
- **Software Development Life Cycle (SDLC):** Waterfall Methodology, Agile Software (Daily Scrum Calls, Sprint Planning).
- **Soft skills:** Leadership, Monitoring, Time management, Trouble Shooting, Supportive team member, Teamwork, Continuous Learning.
- **Mobile :** React Native, Android Studio, Xcode.

EDUCATION

- **Western Illinois University**, Illinois, United States.
Master of Science in Computer Science GPA 3.45/4 August 2022 - May 2024
- **K L University**, Andhra Pradesh, India.
Computer Science and Engineering GPA 7.36/10 August 2014 - May 2018
- **Coursework:** Artificial Intelligence Methods, Data Structures &Algorithms, Core Java, Object Oriented Programming, Database Design and Administration, Information Technology, Ruby, Information Security, Advanced Artificial Intelligence (GEN AI), Information Science, Computer Engineering, Computer Architecture, Software Engineering, Computer Stimulation
