

KARTHIK REDDY KARANGULA

Full Stack Developer

Location: NY | Phone: (607) 548-0190 | Email: Karthikreddy180202@gmail.com | [LinkedIn](#)

SUMMARY

- Results-driven Software Developer with **four plus** years of extensive experience in **Java** (including Java 11 features), **Python**, and **C**, delivering high-performance and scalable applications.
- Demonstrated expertise in backend development, building robust applications using **Spring Boot**, **Spring MVC**, **Spring Security**, **Hibernate ORM**, and **Dependency Injection**.
- Adept at developing dynamic and responsive frontend interfaces using **React.js**, **Angular**, **Vue.js**, **JSP**, **HTML**, **CSS**, **Bootstrap**, **jQuery**, and **UI/UX** principles.
- Skilled in API development, designing and integrating **RESTful** and **SOAP APIs**, with experience in Swagger for API documentation and micro services architecture.
- Strong experience in cloud computing, working with **AWS** (EC2, S3, Lambda, VPC), **Azure**, **Kubernetes**, and **Docker**, optimizing deployment and scalability.
- Hands-on expertise in **CI/CD** pipelines, utilizing **Jenkins**, **GitLab CI**, **GitHub Actions**, and **Bitbucket** to automate development workflows.
- Proficient in database management, with in-depth knowledge of **MySQL**, **PostgreSQL**, **MongoDB**, and **Oracle**, ensuring efficient data storage and retrieval.
- Experienced in Big Data processing using **Apache Spark** and **PySpark**, enabling real-time analytics and large-scale data computations.
- Skilled in testing and debugging, using **JUnit**, **Mockito**, **Cypress**, and **Mocha** to ensure application reliability and performance.
- Proficient in version control using **Git**, **GitHub**, **GitLab**, and **Bitbucket**, ensuring seamless collaboration and code integrity.
- Hands-on experience with development environments such as **NetBeans**, **IntelliJ IDEA**, **Eclipse**, **VS Code**, and **PyCharm**, enhancing productivity and code quality.
- Adept at **Agile** and **DevOps** methodologies, excelling in cross-functional collaboration, automation, and delivering high-quality, secure, and scalable software solutions.

TECHNICAL SKILLS

Programming Languages:	Java (including Java 11 features), Python, C,C#
Frameworks:	React.js, Angular, Vue.js, JSP, HTML, CSS, Bootstrap, jQuery, UI/UX, Spring Boot, Spring MVC, Spring Security, Hibernate ORM, Dependency Injection,ASP.Net
API Development:	RESTful APIs, SOAP APIs, Swagger (API Documentation)
Cloud Technologies:	AWS (EC2, S3, Lambda, VPC), Azure, Kubernetes, Docker, Jenkins, GitLab CI, GitHub Actions, Bitbucket
Database:	MySQL, PostgreSQL, MongoDB, Oracle
Big Data & Data Processing::	Apache Spark, PySpark
Testing & Debugging Tools:	JUnit, Mockito, Cypress, Mocha
Version Control:	NetBeans, IntelliJ IDEA, Eclipse, VS code, PyCharm
Operating Systems:	Git, GitHub, GitLab, Bitbucket

PROFESSIONAL EXPERIENCE

MCKESSON

NY

Java Full Stack Developer

Jan 2023 – Current

- Designed and developed healthcare-focused backend systems using **Java 11** features, including Stream API, Time API, and Multithreading, enhancing data processing efficiency and system performance.
- Developed and optimized **RESTful APIs**, enabling seamless integration between internal and external healthcare systems, improving data exchange efficiency and system interoperability.
- Implemented **Spring** Framework with advanced dependency injection techniques, improving application modularity and maintainability across multiple projects.
- Applied **Spring Boot** dependency injection and auto-configuration features to streamline the setup and configuration of applications, resulting in faster development cycles and increased efficiency by 20%.
- Managed healthcare data using **Hibernate ORM**, optimizing database transactions for improved performance and data integrity.
- Improved application performance and expedited data retrieval processes by employing effective **NoSQL** database techniques to manage large volumes of unstructured data in **MongoDB**. This led to a notable 40% improvement in data retrieval speed.
- Ensured code quality and reliability by performing unit tests using **JUnit** and utilized version control systems such as **Git** for code repository management, while implementing continuous integration practices using **Jenkins**.

- Conducted over 5000 API tests using **Postman** to verify API performance and compliance with specifications, enhancing system integration and functionality across different scenarios.
- Built dynamic **Single Page Applications (SPAs)** with **Angular 8**, streamlining workflows for healthcare professionals and enhancing user engagement.
- Implemented **Agile methodologies**, leveraging **Apache Kafka** for real-time data streaming and event-driven architecture, ensuring seamless communication between distributed systems and enhancing system scalability.
- Orchestrated cloud deployments using **AWS** (EC2, S3, Lambda), ensuring secure, scalable, and HIPAA-compliant environments.
- Established **CI/CD** pipelines with **Jenkins** and **GitHub Actions**, accelerating release cycles and reducing deployment errors.
- Leveraged data-driven insights to refine **requirements**, identify potential risks, and optimize business processes during requirement-gathering meetings.

**State University of New York
Graduate Research Assistant**

NY

Aug 2021–Sep 2022

- Led research on **blockchain technologies**, focusing on secure digital identity management solutions and their applications in cybersecurity.
- Designed and maintained relational databases using **SQL**, supporting extensive data analysis for academic projects.
- Contributed to peer-reviewed publications through data modeling, experimental design, and statistical analysis.
- Presented research findings at academic conferences, promoting interdisciplinary collaboration and innovation.

Adani

India

Java Full Stack Developer

Dec 2020 - Jul 2021

- Spearheaded the development of enterprise-grade applications for the energy sector using **Java** and **J2EE**, improving operational workflows through optimized business logic and automation.
- Engineered **RESTful APIs** for real-time communication between IoT devices and centralized energy management systems, facilitating seamless data exchange and enhancing monitoring capabilities.
- Optimized large-scale data processing with **SQL** and **MongoDB**, significantly improving query performance to support real-time analytics for energy consumption and resource management.
- Developed comprehensive dashboards using **Angular** and advanced data visualization libraries to track energy metrics, identify trends, and support strategic decision-making.
- Applied **Hibernate** ORM to streamline data management processes, ensuring efficient data synchronization across multiple platforms and systems.
- Enhanced system reliability and security through rigorous unit testing with **JUnit**, identifying performance bottlenecks and implementing robust solutions.
- Collaborated with cross-functional teams, including product managers and data engineers, to **gather requirements, design solutions**, and ensure seamless **deployment of applications**.
- Facilitated cross-functional business requirement meetings to gather, analyze, and document stakeholder needs, ensuring alignment between business goals and technical solutions.

KPMG

India

Java Developer Intern

Aug 2019 - Apr 2020

- Contributed to the development of financial advisory applications by designing and implementing scalable web solutions using **ReactJS**, **NodeJS**, and **AngularJS**.
- Enhanced financial reporting tools through the development of reusable **UI** components and optimization of front-end performance for improved data visualization.
- Led data migration projects involving sensitive financial data, ensuring compliance with regulatory standards while utilizing **Azure** for secure data transfers.
- Automated **CI/CD** pipelines using **Jenkins**, streamlining deployment workflows and reducing the risk of manual errors in production environments.
- Conducted unit testing using **JUnit** and **Mocha** to verify the accuracy and reliability of critical financial modules, improving overall code quality.
- Created detailed **API** documentation using Swagger, enabling efficient integration with third-party services and supporting developer collaboration.
- Worked closely with stakeholders to understand business requirements and translated them into technical solutions, contributing to project success and client satisfaction.

EDUCATION

State University of New York Polytechnic Institute

Utica, NY

Master of Science in Computer and Information Science

Aug 2021 –May 2023

Jawaharlal Nehru Technological University

India

Bachelor Electronics and communication Engineer

Jun 2016 –Nov 2020
