Professional Summary

Data & Marketing Analyst with 3+ years of experience turning complex data into actionable business insights. Skilled in SQL, Tableau, and Python to develop automated dashboards and optimize marketing performance. Proven success in improving campaign targeting, streamlining workflows, and supporting cross-functional teams in digital strategy and analytics. Passionate about data-driven storytelling and marketing operations optimization.

Work Experience

Data Analyst & Digital Marketing Specialist

Arizona State University

Tempe, AZ

May 2023 - Present

- Developed comprehensive data reporting systems for PRIEC's digital engagement efforts, enabling real-time tracking and segmentation analysis to refine marketing tactics and improve user retention.
- Leveraged SQL and Python for data extraction, transformation, and analysis, incorporating ETL processes, schema management, and advanced query language functions to uncover key insights into user behavior and campaign performance.
- Conducted A/B testing on outreach campaigns; strategic recommendations led to a 15% increase in audience engagement.
- Configured Google Analytics and Tag Manager for accurate funnel tracking, optimizing user journey insights.
- Utilized Python for predictive segmentation models, enhancing targeting accuracy and campaign performance.

Data Analyst

Y- Creators Media

Hyderabad, India

Jun 2022 - Dec 2022

- Partnered with campaign teams to extract voter behavior insights, driving a 30% lift in targeted outreach effectiveness.
- Built interactive Tableau dashboards and used Looker for data storytelling, streamlining reporting for 15+ political campaigns.
- Automated campaign performance tracking via Python and ETL pipelines, increasing data reliability by 40%.
- Conducted root-cause analysis to improve segmentation strategy and enhance campaign targeting accuracy.

Marketing Analyst Intern

Worket Media

Ahmedabad, India

Dec 2021 - May 2022

- Led marketing ops data audit and revamped workflows, reducing audience list errors by 25%.
- Designed dashboards in Excel and Tableau for campaign performance, enabling strategic insights used in SEO strategy refinement.
- Enhanced retention by conducting cohort analysis and A/B tests, leading to a 12% boost in organic traffic.
- Supported email marketing and customer experience projects, providing cross-functional teams with performance metrics and recommendations.

Education

Arizona State University

MS Data Science Analytics and Engineering

Tempe, AZ

Charotar Institute of Science and Technology

BSc Computer Science

India

Projects

Retail Merchandising & Product Performance Analysis

- Developed data-driven insights on product performance using Excel, SQL, and Power BI, tracking category trends and identifying top-performing items. Conducted pricing and promotional analysis, evaluating sales trends and customer purchasing behavior to optimize future merchandising strategies.

Survey Insights and Spotlight Report (ASU)

- Independently analyzed survey data for a regional outreach project, identifying key differences across demographic groups using cross-tabs and stratifications. Drafted a spotlight-style research report presented to university leadership.

SQL Database Management and Analysis for Ecommerce Platform

- Designed and implemented a relational database schema for a simulated e-commerce platform using MySQL, ensuring optimized query performance, and built reporting dashboard in Power BI to visualize sales performance.

Certification

- Foundations of Data Analytics - [Google](#), [Coursera](#)
- Visualization with Tableau – [Coursera](#)
