SUMMARY

Business Analyst with 3 years of experience translating complex business needs into actionable solutions. Proficient in requirements gathering, stakeholder collaboration, and data-driven decision making using analytical tools and visualization platforms. Proven ability to optimize operational processes, drive cost efficiencies, enhance system performance, and deliver measurable results through strategic analysis and cross-functional leadership.

SKILLS

Methodologies & Frameworks: SDLC, Agile (Scrum, Kanban), Waterfall, UML Modeling

Programming Languages: Python, SQL

Database Management and Data Analysis: MySQL, SQL Server Reporting Services (SSRS)

Business Analysis: Requirements Gathering, FRD/BRD Documentation, UAT Testing, User Stories, Process Modeling, Stakeholder Management, Use Case Development, Risk Assessment & Mitigation, Change Management, Quality Assurance, Business Process Analysis, Test Planning

Stakeholder Management: Cross-Functional Collaboration, Training Programs, End-User Support, Stakeholder Communication

Data Visualization Tools: Tableau, Power BI

Project Management: Jira, Confluence, MS Visio, Lucidchart, MS Office (Excel, PowerPoint Outlook), Salesforce

Analytical Techniques: Cost-benefit Analysis, Impact Analysis, GAP Analysis, Risk Analysis, SWOT Analysis, Root Cause Analysis, Budget Analysis, Financial Modeling, Customer Relationship Management (CRM) Analysis

Cloud Platforms: AWS, Azure

Soft Skills: Critical Thinking, Problem Solving, Attention to Detail, Strategic Planning, Analytical thinking, Adaptability

EDUCATION

Master of Science in Data Science | Florida Atlantic University, Florida

May 2025

Bachelor of Technology | CMR Institute of Technology, India

May 2022

PROFESSIONAL EXPERIENCE

Business Analyst | Humana, Florida

January 2025 - Current

- Execute **Python** data mining on member demographics databases, extracting insights from 25,000 records that identified enrollment pattern trends supporting targeted marketing campaign development and member retention strategies.
- Design **business requirements** specifications using **Agile** sprint planning methodologies, coordinating with 8 stakeholders through **JIRA** workflows to define system enhancements for automated prior authorization processing improvements.
- Build comprehensive **risk assessment** frameworks using **Excel** modeling techniques, evaluating operational vulnerabilities across 4 service departments that enabled proactive mitigation strategies reducing compliance audit findings by 14%
- Orchestrate **quality assurance** validation cycles for provider directory updates, managing **test case** execution across 3 system modules resulting in 96% data accuracy improvement before quarterly CMS reporting deadlines.
- Establish **process documentation** standards using **MS Visio** flowchart creation, standardizing workflow procedures for 12-person operations team that decreased onboarding time by 6 days through structured training protocols.
- Implement **Tableau** visualization solutions for executive reporting dashboards, transforming complex claims analytics into actionable insights that support strategic decision-making for network optimization and cost containment initiatives.

Business Analyst | Citus Infotech, India

January 2021 – July 2023

- Architected **use case development** frameworks for mobile application features, translating customer journey requirements into 67 detailed scenarios that guided development sprints and improved user experience testing protocols.
- Conducted **SQL Server** performance analytics on e-commerce transaction databases, identifying peak usage patterns from 180,000 daily transactions that optimized server capacity planning and reduced downtime incidents.
- Managed **stakeholder communication** strategies using **Confluence** documentation platforms, facilitating requirement consensus among 15 cross-functional team members that accelerated project delivery timelines by 3 weeks consistently.
- Delivered **budget analysis** assessments for software licensing renewals using **PowerBI** cost tracking dashboards, negotiating vendor contracts that achieved 28% reduction in annual technology spending while maintaining service levels.
- Coordinated **change management** rollout initiatives for **ERP system** implementations, training 45 end-users through structured **MS Office** curriculum that achieved 92% adoption rates within implementation timelines.
- Performed **financial modeling** calculations for ROI projections on automation investments, utilizing **Excel** advanced functions to demonstrate 18-month payback periods that secured executive approval for process digitization projects.

PROJECTS

CareFlow360: Optimizing Healthcare Claims Through Process Intelligence and BI Automation:

- Led process optimization of 50K+ healthcare claims using SQL and BPMN modeling, reducing claim processing time by 23% and rejection rates by 18%.
- Developed interactive PowerBI dashboards to track claim statuses and operational KPIs, enabling proactive decision-making and saving \$200K annually in admin costs.
- Collaborated cross-functionally on EHR integration and HIPAA-compliant automation, driving a 15% increase in patient enrollment and resolving 90% of UAT defects pre-launch.
