## PROFESSIONAL SUMMARY

Results-driven Full Stack Java Developer with 5+ years of expertise designing scalable web applications, building robust RESTful APIs, and deploying microservices on AWS and Kubernetes. Proficient in React.js, Spring Boot, and modern DevOps practices. Adept at integrating complex systems, enhancing security with OAuth2 and JWT, and automating CI/CD pipelines. Passionate about optimizing user experience, accelerating release cycles, and delivering high-quality, data-driven business solutions across diverse industries.

## TECHNICAL SKILLS

**Frontend Development:** React.js, Redux, Next.js, Angular, NgRx, PrimeNG, Angular CLI, JavaScript (ES6+), TypeScript, HTML5, CSS3, SASS, Bootstrap, Tailwind CSS, Material UI, Styled Components, Context API, RxJS, Responsive Design, Chart.js, D3.js

**Backend Development:** Java, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Node.js, Express.js, RESTful APIs, GraphQL, Microservices Architecture, JWT, OAuth2, RBAC, Session Management, API Gateway, Server-Side Rendering, Asynchronous Programming, Spring Security, Apache Kafka, RabbitMQ, WebSockets, RESTful Services, SOAP Web Services

**Database Technologies:** MySQL, PostgreSQL, MongoDB, SQL Server, AWS Aurora, Firebase, SQLite, Sequelize, Data Modeling

**Testing & Quality Assurance:** JUnit, Mockito, Jest, Jasmine, Karma, Cypress, Mocha, Chai, React Testing Library, Postman, Swagger

**Others:** Git, GitHub, GitLab, Jira, Chrome DevTools, Webpack, HTTPS, Helmet.js, API Security, Role-Based Access Control, AWS

**Architecture & Methodologies:** Microservices, Component-Based Architecture, OOP, MVC, Agile, Scrum, TDD, Design Patterns

## PROFESSIONAL EXPERIENCE

### Full Stack Java Developer, DXC Technology

Jan 2025 – Present | Remote, USA

- Architected a cloud-based policy renewal platform using Java Spring Boot and AWS Lambda, enabling automated risk assessments, expediting policy processing, and reducing manual intervention by insurance agents across global DXC clients.
- Managed modernization of legacy claims intake system by developing microservices with Java, Docker, and Kubernetes, enhancing modularity, improving reliability, and cutting system downtime by 38% for healthcare insurance customers.
- Implemented real-time notifications and alerts in financial operations dashboards using WebSockets and React.js, increasing user engagement and operational responsiveness for DXC's enterprise banking customers.
- Enhanced payment reconciliation accuracy by integrating third-party APIs, designing robust validation workflows with Spring Boot, and delivering audit-ready transaction reports for regulatory compliance in financial sector projects.

### Full Stack Java Developer, Oracle

Sep 2021 – Jul 2023 | Hyderabad, India

- Engineered a scalable contract management platform using Spring Boot and Angular, automating end-to-end contract approvals, e-signatures, and audits, which reduced processing delays for Oracle's legal operations by 40%.
- Designed and deployed REST APIs with Spring Boot for Oracle Cloud integration, enabling secure data exchange and real-time updates across finance, HR, and procurement modules supporting 8,000+ concurrent users.
- Developed a multi-tenant reporting dashboard with React.js, Redux, and D3.js, visualizing complex business metrics and empowering Oracle customers with actionable insights and on-demand analytics.
- Implemented microservices architecture with Java, Docker, and Kubernetes, optimizing resource allocation and improving fault tolerance for Oracle's SaaS offerings used by Fortune 500 clients.
- Automated regression, integration, and load testing pipelines using JUnit, Postman, and Jenkins, ensuring high reliability and zero-downtime deployments across Oracle's cloud-based ERP solutions.
- Enhanced user authentication and data security with OAuth2, JWT, and RBAC, ensuring strict compliance with global data privacy regulations across Oracle's enterprise platforms.

### Full Stack Java Developer, HCL Technologies

Jun 2019 – Aug 2021 | Remote, India

- Developed an end-to-end employee onboarding portal using Spring Boot and React.js, automating document verification workflows and reducing HR processing time by 45% for HCL's internal workforce management division.
- Designed RESTful APIs with Spring Boot for integrating legacy ERP systems, ensuring secure real-time data synchronization, and enabling seamless migration of over 10 million records across global HCL business units.
- Built a microservices-based inventory tracking system using Java, Docker, and Kubernetes, improving scalability and reducing infrastructure downtime for HCL's supply chain management projects supporting large enterprise clients.
- Implemented Single Sign-On (SSO) authentication using OAuth2 and JWT, enhancing user access security across multiple HCL internal applications while simplifying credential management for more than 6,000 employees.
- Managed the modernization of customer support dashboards by rebuilding UI with React.js, Redux, and Material-UI, delivering real-time analytics and increasing client satisfaction scores by 18% in post-launch feedback.

## EDUCATION

### Master of Science, Southeast Missouri State University

Aug 2023 – May 2025 | Missouri, USA

Computer Science

### Bachelor of Technology, Gitam University

Jun 2014 – May 2018 | Visakhapatnam, India

Mechanical Engineering
