

Kodi Manu Aithal

Marketing Data Analyst

NY | 708-789-9519 | kodimanu.a@mvtijobmails.com

SUMMARY:

Marketing Data Analyst with 4+ years of experience in BFSI, IT, and digital services. Skilled in Python, SQL, and R to build Marketing Mix Models, multi-touch attribution, and forecasting pipelines that optimize ROI and budget efficiency. Proficient in ETL development, geo-split testing, and data visualization using Tableau, Power BI, Streamlit, and Plotly. Adept at collaborating with cross-functional teams to translate complex models into actionable strategies, improving acquisition efficiency and customer engagement.

TECHNICAL SKILLS:

Programming & Data Analysis: Python (Pandas, NumPy, scikit-learn, PyMC, cvxpy, Prophet, ARIMA, Plotly, Streamlit), R (R Studio, Markov Chains, Shapley), SQL, Excel (PivotTables, VLOOKUP)

Marketing Analytics: Marketing Mix Modeling, Multi-touch Attribution, Forecasting & Time Series, Incrementality & Geo-split Testing, ROI Optimization, Customer Segmentation, Funnel Analysis

Visualization & Reporting: Tableau, Power BI, Google Data Studio, Streamlit, Plotly, Automated Dashboards

Digital Marketing Tools: Google Analytics (UA, GA4, Firebase), Adobe Analytics, Google Tag Manager, Microsoft Clarity, Shopify, Sprinklr, SEO/SEM, PPC, Social Media Analytics (Meta, LinkedIn), Mailchimp, A/B Testing

CRM & Automation: Salesforce, HubSpot, Marketo

Other Tools: Snowflake, Figma, Adobe Creative Suite, Canva, MS Office Suite

Methodologies: Agile, SDLC, Waterfall

EXPERIENCE:

Morgan Stanley, IL | June 2024 - Current | Marketing Data Analyst

- Engineered a Bayesian Marketing Mix Model in Python with PyMC and SQL for seven digital and offline channels, delivering cross-validated out-of-sample R-Squared of 0.84 on weekly qualified lead volumes.
- Implemented geo-split incrementality tests with scikit-learn and statistical modeling in Python to calibrate channel elasticities, reducing holdout MAPE by 18% and narrowing ROI confidence intervals by 22%.
- Built a marketing budget optimization engine in Python and cvxpy using adstock and concave saturation response curves, producing reallocation strategies that projected 11–14% growth in funded accounts under existing spend levels.
- Constructed a privacy-compliant ETL pipeline in Python and SQL to integrate campaign, advisor outreach, and macroeconomic data, applying PyMC for Bayesian causal inference aligned with internal compliance reviews.
- Developed executive-facing dashboards in Power BI, Streamlit, and Plotly to present ROI curves, elasticity forecasts, and budget scenarios, adopted by senior management for quarterly planning.
- Collaborated with marketing, finance, and advisor teams to translate advanced model outputs into actionable strategies, enhancing stakeholder communication and improving acquisition cost efficiency by 12%.

Acronotics Private Limited | June 2020 – March 2022 | Marketing Data Analyst

- Developed Marketing Mix Models in Python with adstocked regression techniques to evaluate channel effectiveness, improving budget recommendation accuracy (vs. holdout) by 25% and increasing Return on Ad Spend (ROAS) visibility.
- Built multi-touch attribution models in R using Markov removal effects and Shapley Value methodologies, informing budget reallocations that reduced customer acquisition cost (CAC) by 18%.
- Devised time series forecasting pipelines with Prophet and ARIMA in Python to simulate campaign outcomes and support scenario-based investment planning.
- Consolidated disparate marketing and web data through SQL queries and Google Analytics API data integration, enhancing reporting efficiency and aligning workflows with GDPR requirements.
- Constructed interactive Tableau business intelligence (BI) dashboards for near real-time performance monitoring, enabling stakeholders to identify ROI trends and optimization opportunities instantly.
- Directed cross-functional collaboration across marketing, finance, and data engineering to deploy an end-to-end marketing optimization platform, influencing reallocation of budgets exceeding \$2M annually.

Green Touch Technology, India | Dec 2018 – Feb 2020 | Marketing Data Analyst

- Orchestrated end-to-end web analytics tracking by integrating Google Analytics (Universal Analytics), Firebase, and Google Tag Manager, with migration to App + Web beta in 2019 for cross-platform visibility.
- Analyzed conversion funnel performance with SQL and Python to identify drop-off stages, delivering UX enhancements that improved conversion rates by 15%.
- Implemented multi-touch attribution models including first-touch, last-touch, and algorithmic approaches in Python, enabling accurate channel contribution analysis that optimized digital marketing spend by 20%.
- Developed Python-based predictive analytics models for lead propensity scoring, empowering marketing teams to prioritize high-value prospects and increase campaign ROI.
- Built interactive Power BI dashboards with automated reporting to visualize journey metrics, attribution insights, and A/B testing results, reducing reporting time by 30%.
- Partnered with design, development, and marketing teams to deploy user experience optimization initiatives such as page speed and navigation improvements, increasing session depth by 12% and reducing bounce rate by 9%.

EDUCATION:

Master of Science in Information Technology and Management | Illinois Institute of Technology, Chicago, IL

Dec 2024

Bachelor of Engineering in Information Science and Engineering | Visvesvaraya Technological University

Aug 2018
