EDUCATION

The George Washington University Washington, DC Master of Science, Computer Science Relevant Courses: Distributed Systems, Big Data, AI, ML, Computer Vision	May 2025 GPA: 3.6
University of Mumbai (TCET) Mumbai Bachelor of Engineering, Electronics Engineering Relevant Courses: Python Programming, DBMS, RTOS	Jun 2022 GPA: 3.5

SKILLS

Programming/Scripting Languages: Python, Java, Spring Boot, C++, C, JS, TS, PHP, SQL, HTML, CSS.
Framework/Libraries: ReactJS, Node.js, Express.js, Angular, PyTorch, NumPy
Cloud & DevOps: AWS (S3, EC2, Lambda), GCP, Docker, Version Control (GitHub, GitLab), CI/CD.
Core Areas: Agile, Requirements Gathering, SDLC, QA, Stakeholder Management, Process Mapping, Gap Analysis, User Story Development, LLM Evaluation, Data Pipelines, Performance Testing, Automation.

WORK EXPERIENCE

GET SUPERSTARS INC. Software Engineer Intern	Albany, NY Jun 2025 – Present
- Developed Angular-based UI modules using component-driven design and functional UI logic with minimal state. - Integrated REST APIs into data grids and refactored UI layers using clean, maintainable abstractions. - Enhanced static data visualization by developing interactive, dynamic charting dashboards that transformed complex metrics into clear, actionable insights, improving stakeholder and investor decision-making efficiency. - Modernized UI/UX with responsive, standards-compliant design patterns. - Deployed and managed application builds on AWS, ensuring scalable, secure, and reliable cloud integration. Skills Used: Angular, TypeScript, REST APIs, GraphQL, AWS, GitLab, PR Workflow, Modular Code.	
AXIS BANK Deputy Manager, IT- Business System Analyst	Mumbai, India Sep 2022 – Aug 2023
- Ensured 99.9% ATM uptime by managing nationwide ATM server operations. - Executed biannual data migrations between Mumbai and Bangalore city servers with zero downtime. - Supported Citi Bank to Axis Bank migration, transitioning for thousands of customers with service continuity. - Delivered overnight RBI-compliant ATM system update disabling ₹2000 notes with zero service disruption. - Strengthened security by managing vendor IDs, SFTP access, and access controls, reducing operational risks. - Coordinated with vendors for UAT testing & deploy error-free rollouts and timely project delivery. Skills Used: SQL, JavaScript, Agile, QA Automation, Customer Analytics, Prototyping	
PERCIPERE PVT. LTD. Associate Software Developer	Mumbai, India Jun 2022 – Sep 2022
- Engineered 7 automated workflows using UiPath and Python, saving 200+ monthly employee hours. - Developed REST APIs to improve backend process automation, increasing system uptime to 99.9%. - Authored technical documentation to reduce future bugs by 40% and increase automation ROI by 20%. - Resolved 95% of reported bugs within SLA using structured debugging and logging systems. Skills Used: Python, UiPath, Automation, Documentation, Debugging, SLA	

PROJECT-BASED EXPERIENCE

Finance Tracker – AI Powered Insights	Summer 2025
- Developed a responsive finance tracking web app with monthly summaries and modular architecture. - Implemented modular Angular components, secure user authentication, and persistent state management. Technologies: React, TypeScript, Firebase, HTML/CSS, Chart.js, RESTful APIs.	
AI Agent for Fire Evacuation Simulation	Spring 2025
- Implemented reinforcement learning for AI simulation achieving 85% accuracy, 40% evacuation time reduction. Technologies: Python, PyTorch, NumPy, Reinforcement learning algorithms.
