

Md Shahidur Rahman

Los Angeles, CA 90020 | Contact: 213-214-9476 | Email: shahidatwork2@gmail.com

Professional Summary

Analytical Data Analyst with expertise in data mining, ETL pipelines, predictive modeling, and dashboard development. Skilled in Python, SQL, Tableau, Power BI, and advanced Excel to deliver actionable insights, optimize business workflows, and improve decision-making. Strong background in statistical analysis, data visualization, and forecasting. Adept at collaborating with cross-functional teams to drive process automation, KPI reporting, and cost optimization.

Education

Master of Science – Engineering Management

WESTCLIFF UNIVERSITY, IRVINE, CA | January 2023 – Present

Bachelor of Engineering – Mechanical Engineering & Automation

CHONGQING JIAOTONG UNIVERSITY, CHONGQING, CHINA | September 2017 – September 2022

Experience

Data Analyst | FREELANCE / ACADEMIC PROJECTS

REMOTE | January 2023 – Present

- Delivered end-to-end analytics solutions including data cleaning, SQL querying, and dashboard creation for simulated and case-study datasets.
- Designed Tableau and Power BI dashboards for sales, HR, and supply chain data, reducing decision-making time by up to 30% in case analyses.
- Applied predictive modeling in Python to forecast employee turnover with 78% accuracy and optimized demand planning with time-series forecasting.
- Partnered with professors, peers, and cross-functional project teams to simulate real-world business scenarios across healthcare, finance, and logistics.

Quality Inspection Engineer

SEAGLORY SHIPPING AGENCY – CHITTAGONG, BANGLADESH | June 2022 – October 2022

- Built data-driven inspection procedures that reduced process cycle time by 15%.
- Analyzed inspection data from 100+ vessels, improving compliance and increasing audit pass rates by 20%.
- Developed reporting dashboards that accelerated leadership decision-making and boosted customer satisfaction.

Key Projects

- Business Analytics Dashboard (Power BI, Tableau, SQL)
 - Designed interactive BI dashboards improving decision-making speed by 30%.
 - Evaluated data visualization tools (Power BI, Tableau, QlikView) for scalability, cost, and performance.
- Health Guidance System (Python, SQL, Visualization)
 - Built prototype data analytics solution for healthcare engagement, improving user satisfaction by 25%.
 - Designed SQL queries and Python scripts for cleaning, integrating, and visualizing healthcare data.
- Sales & Customer Insights Dashboard (Tableau, SQL, Excel)
 - Analyzed 10,000+ customer transactions to uncover purchase patterns and seasonal trends.
 - Applied customer segmentation (RFM analysis) to enable targeted campaigns, simulating 12% revenue growth.
- HR Analytics & Employee Retention Study (Python, Power BI)
 - Processed 1,500+ employee records and applied predictive modeling (logistic regression) to forecast attrition with 78% accuracy.
 - Visualized turnover patterns with Power BI dashboards, helping HR teams design data-driven retention policies.
- Supply Chain Optimization (SQL, Python, Excel)
 - Modeled inventory and logistics data, reducing simulated lead time by 18%.
 - Implemented time-series forecasting using Python to improve demand planning and resource allocation.
- Financial Data Analysis (Python, Excel, Visualization)
 - Collected and cleaned stock market datasets for analysis.
 - Built Python automation scripts (Pandas, NumPy, Matplotlib) to evaluate moving averages, volatility, and ROI.

Core Skills & Tools

- Languages & Databases: Python (Pandas, NumPy), SQL, MATLAB
- Data Analytics & BI: Power BI, Tableau, Excel (Power Query, PivotTables, Advanced Formulas)
- Data Management: ETL, Data Cleaning, Data Warehousing, Forecasting, KPI Tracking
- Methods: Statistical Analysis, Predictive Modeling, Machine Learning (Regression, Classification), A/B Testing
- Project Tools: Jira, Confluence, Miro, Gantt Chart
- Other: Business Intelligence, Dashboard Creation, Data Storytelling, Data-Driven Problem Solving
