SUMMARY

Detail-oriented Business Intelligence Analyst with 2+ years of experience supporting data-driven decision-making across workforce planning, reporting automation, and dashboard development. Proficient in data cleaning, validation, and visualization using tools like Tableau, SQL, Excel, and Alteryx. Proven ability to streamline manual processes, maintain documentation, and collaborate with cross-functional teams.

EXPERIENCE

Bank of America, Business Support Lead II

Oct 2024 - Apr 2025

- Created an automation and SQL process guide to support an Excel-heavy team, enabling self-service access to clean, structured data.
- Automated manual reporting and data transformation workflows using ETL/ELT method using tools like Alteryx, Quartz Desktop, and SQL, significantly reducing repetitive tasks and improving accuracy.
- Collaborated cross-functionally with stakeholders, data engineers, and SQL leads to lead and executed portfolio projects such as headcount projections, aged requisition alerts, and job fail monitoring.
- Practiced project management by setting timelines, coordinating file handoffs, tracking progress, and ensuring successful automation handover.
- Delivered Tableau dashboards and documentation for recurring use, supporting leadership visibility and long-term scalability of automated reports.

Bank of America, Business Intelligence Data Analyst I

Sep 2023 - Oct 2024

- Designed and maintained Tableau dashboards to support performance reporting, quarterly reviews, and strategic initiatives.
- Conducted data governance and validation checks to ensure accuracy and alignment across organizational metrics.
- Partnered with stakeholders to streamline manual reports and metrics into Report Hub, a centralized reporting platform accessible across the organization.
- Utilized SQL script to detect Job Runner failures and troubleshoot issues in collaboration with technical leads.
- Supported Quartz Desktop automation for scheduled data imports, including light use of Python for job configuration.
- Managed Tableau Server capacity by conducting quarterly audits and coordinating workbook cleanup with dashboard owners.
- Authored process documentation covering dashboard publishing, report hub workflows, automation steps, and governance standards.

Road to Hire, Business Analytics Apprentice

Mar 2023 - Sep 2023

- Designed and presented dashboards in Tableau and Excel, using SQL for data extraction and trend analysis.
- Completed individual and team-based projects using Excel, Google Sheets, Tableau, and SQL to deliver business insights.
- Strengthened both technical and professional development skills through workshops, mentorship, and real-world business scenarios.
- Successfully passed rigorous technical and professional assessments required to complete the program.
- Developed confidence in stakeholder communication, dashboard storytelling, and translating data into actionable insights.
