Meaza Kidane

Summary

Enthusiastic computer science graduate with experience in software development, testing, and automation. Skilled in manual and automated testing, cloud platforms, and continuous integration. Seeking to contribute and grow in a dynamic team environment.

Professional Experience

TATA Consultancy Services - Software Developer

Cincinnati, OH

06/2022 - Current

- Conducted manual and automated API testing using Parasoftware Virtualize to emulate unavailable services and test integrations
- Developed and maintained virtual assets and test data for consistent functional and performance testing
- Automated build, testing, and deployment processes, reducing release cycle times and increasing efficiency
- Tested gas and electric meters in CyberArk servers and validated data in MDMS
- Collaborated with QA and development teams to create virtualized environments for faster testing
- Managed version control using Git, with expertise in tools such as GitHub, Jira, Confluence, and Bitbucket
- Built CI/CD pipelines using Azure DevOps, improving continuous integration and software delivery

DCHR, Building Blocks DC & Mayor's Office Of Community Relations Service - Fellowship, District Leadership Program

Washington, D.C.

10/2021 - 05/2022

- Optimized Salesforce systems and managed integration upgrades to improve workflow efficiency
- Installed new Salesforce releases and facilitated the import of sales leads and contact data
- Documented processes and managed Salesforce roles, profiles, workflows, and reports for senior leadership
