

Michael Roland Gary

Fredericksburg, VA | (571) 210-7689 | rgary.michael@gmail.com | [LinkedIn](#) | [Github](#) | [Portfolio](#)

Summary

Software Engineer with full-stack development experience using Java, C++, and C#. Developed an in-house library system in an IT internship, streamlining data management with Angular, PostgreSQL, and Java-based technologies. Demonstrated strong problem-solving skills and effective collaboration in agile team settings. Ready to leverage technical expertise to drive innovative software solutions.

EDUCATION

George Mason University

Bachelor of Fine Arts, Computer Game Design

Aug 2025

Fairfax, VA

Northern Virginia Community College

Associates of Science, Computer Science

Aug 2024

Wakefield, VA

WORK EXPERIENCE

MGTA (Mason Game & Technology Academy)

Teaching Assistant (Intern)

Jun 2025 - Jul 2025

Fairfax, VA

- Assisted in teaching multiple classrooms of ~30 high school students game development using Unity/C# and machine learning with Python, thereby reinforcing agile development principles.
- Led small group mentoring sessions and provided individual debugging help during lab exercises, emphasizing practical application of C# programming.
- Fostered student engagement in coding concepts and encouraged teamwork on final game projects.

SNI Companies

Temp Receptionist

Oct 2022 - Present

Tysons Corner, VA

- Assisted in administrative assignments for various organizations in Northern Virginia, enhancing overall office efficiency.
- Managed front desk operations, directed calls, and assisted clients and residents.
- Supported leasing and property operations through data entry and resident record management.
- Delivered outstanding customer service by addressing inquiries and resolving issues efficiently.

DevTechnology

IT Intern

Jun 2019 - Jul 2019

Reston, VA

- Assisted the business operations and IT team by resolving support tickets and updating documents, improving team efficiency and reducing response time.
- Developed an in-house library system/framework using Angular, PostgreSQL, Springboot, and Java, streamlining data management and enhancing user accessibility in an agile environment.

PROJECTS

Runnin' Dry — Unity | C# | Team Project

Co-Producer/Lead Programmer

- Led a 15-person team in developing a card-based rogue-lite over one year.
- Built procedural map generation and combat systems; managed daily scrums and bug tracking.

Campus Cook-Off — Unity | C# | Team Project

Programmer

- Developed player controller logic and item storage mechanics.
- Identified, tested, and resolved gameplay bugs during development sprints.

TikTok Trends App — C++

- Designed a JSON parser to analyze TikTok trends and generate HTML reports.
- Built algorithms to rank trending hashtags/sounds by engagement data.

Rideshare App — C++

- Engineered functionality to match riders with drivers using geographic data.
- Handled ride requests, cancellations, and persistent data updates.

SKILLS AND INTERESTS

- **Technical Skills:** Java, C++, Python, C#, Unity, PostgreSQL, Basic HTML/CSS, Microsoft Office, Agile Development
- **Interests:** Streaming (OBS/Twitch/YouTube), Building PCs, Chess
