EXPERIENCE

VML, Technology Specialist – Data Operations

May 2022 - Present

Utilized data analytical skills to create marketing strategies and optimize campaign performance. Collaborated with cross-functional teams & clients to implement data-driven solutions, increasing business growth, and engagement. Collected, analyzed, and interpreted large raw data sets, turning them into polished reports. Created data visualizations reports to communicate complex data insights for our clients. Worked across teams to implement data governance policies and ensure data quality and compliance.

Key Accomplishments:

- Improved marketing campaign engagement through data-driven optimization strategies
- Developed data visualization reports that increased stakeholder engagement.
- Collaborated across teams launching targeted marketing campaigns resulting in increased performance.

Martin Retail Group, Data Analyst Reporting Specialist – Digital Reporting

2021 - 2022

Utilized various software to collect, analyze, and report on various marketing projects. This position consisted of gathering raw data and uploading them into various software such as Microsoft Excel, Tableau, and Power BI where coding, formulas, and formatting can be used to create professional reports. Helped the team, clients, and various departments understand how various projects performed & what needed to be investigated. Other duties consist of addressing various technical, mathematical, or software related issues to continue the reporting cycle efficiently.

Key Accomplishments:

- Able to address and fix errors that enable our reporting cycle to be completed faster while assisting in various team projects to help create a new reporting format deemed favorable for our clients.
- Creating a Tableau Prep chart to enable manually done excel reports to being completed in minutes.
- Trained new members in using various software to assist in the reporting cycle.

Coca Cola Bottling Company United, Fleet Coordinator

2018 – 2021

Tasked with overseeing the fleet purchasing operations of thirteen plants across four states. This position provided administrative, procurement, logistical, and analytical support to the Fleet Department. Other duties consisted of assisting in inventory audits, SAP MRP, Asset Management, investigating and correcting inventory/purchasing discrepancies. Converting raw data through various software to develop weekly reports enabling the upper leadership to understand our department's purchasing habits, pricing, and obtaining updates on our performances.

Key Accomplishments:

- Created Departments first "Vendor Ecommerce Information Database" by importing raw data from Excel. Allowing employees to view vendor information resulting in an organized information gathering system.
- Created the "Inventory Management Manifesto" data base that resulted in vender accountability by ensuring they carried our products, decreased back orders, and an open line of communication between us and our vendors.
- Placed in charge of tackling our department's outstanding invoices and through working with procurement and our vendors. This resulted in roughly \$300k+ being paid or allocated back to the department's budget.
