

Michael Salamone-McDevitt

Data Analyst | SQL Expertise | Power BI Dashboards | Enhancing Decision-Making

631-645-3763 | mike.salamone.mcdevitt@gmail.com | [linkedin.com/in/ mike-s-mcdevitt](https://www.linkedin.com/in/mike-s-mcdevitt) | US Citizen

Professional Summary

- Detail-oriented Data Analyst with 4 years of experience in leveraging SQL, Power BI, Tableau, and Python to transform complex data into clear, actionable insights.
- Skilled in cleaning, validating, and analyzing large datasets across multiple sources, improving data accuracy and integrity.
- Expert in developing interactive dashboards and KPI reports using DAX and advanced visualizations to monitor performance, uncover trends, and support strategic decision-making across departments.
- Collaborated with stakeholders to gather business requirements and deliver dynamic BI solutions, significantly enhancing reporting efficiency and decision-making.
- Built predictive models using Python (Pandas, NumPy, Scikit-learn) to forecast trends, assess risk, and drive customer engagement strategies.
- Regularly performed data profiling, created source-to-target mappings, and optimized ETL pipelines using SQL and SSIS to streamline workflows.
- Adept at presenting complex findings to non-technical audiences and supporting cross-functional teams with data-backed recommendations.

Technical Skills

- Data Analytics – Data Cleaning, Manipulation, Visualization, Normalization, and Profiling
- Reporting Tools – Power BI, Tableau
- Programming Languages – SQL, T-SQL, Python
- Data Science – Regression, Exploratory Data Analysis (EDA)
- Databases – MySQL, SQL Server, Oracle, Flat Files (CSV, Excel)
- Python Libraries – Pandas, NumPy, Matplotlib
- ETL Tools – SQL Server Integration Services (SSIS)
- Development Environment – SQL Developer, SQL Server Management Studio
- Graphic Design – Adobe Illustrator, Photoshop, InDesign; Skilled in visual storytelling, layout design, and creating infographics and dashboard aesthetics

Professional Experience

Power BI Developer | Caterpillar | May 2024 - Present

- Extracted and integrated data from diverse sources, performing advanced statistical analysis to generate predictive models and actionable business insights.
- Developed clear documentation outlining data analysis steps and methodologies for stakeholder transparency.
- Monitored and optimized Power BI report performance through SQL query tuning and visual load enhancements.
- Collaborated with cross-functional teams to design interactive dashboards and visualizations focused on KPIs and trend analysis.

- Cleaned and pre-processed data using Python (Pandas) to improve accuracy of machine learning models.
- Utilized Python libraries (Pandas, NumPy, Matplotlib, Scikit-learn) to support analytical tasks and model development.
- Trained machine learning algorithms using Python and R to forecast business outcomes and optimize decision-making.
- Built regression models to estimate project-based fundraising outcomes and financial performance.
- Participated in project review meetings, daily standups, and stakeholder walkthroughs with project managers and technical leads.

Junior Data Analyst | Air BnB | March 2022 – April 2024

- Assisted in collecting, cleaning, and validating structured and unstructured datasets from diverse sources using SQL, Excel, and Python (Pandas).
- Supported business units by creating KPI dashboards and performance reports in Power BI and Tableau to track sales, marketing, and operational metrics.
- Wrote and optimized SQL queries to retrieve data for ad hoc analysis and long-term reporting needs.
- Participated in requirement gathering sessions with stakeholders to understand business problems and translate them into analytical tasks.
- Conducted exploratory data analysis (EDA) and trend analysis to identify performance gaps and growth opportunities.
- Developed visualizations including bar charts, line graphs, heat maps, and drill-down dashboards for management review.
- Maintained report documentation and ensured timely data refresh schedules across dashboards.
- Collaborated with senior analysts and cross-functional teams to deliver data-driven insights that supported strategic decisions.
- Contributed to internal QA by validating data integrity and reviewing existing reports for consistency and accuracy.
- Gained exposure to ETL processes, data modeling basics, and machine learning concepts during project shadowing and training sessions.

Data Analyst Intern | Alliance Tek | June 2021 – Feb 2022

- Collaborated with stakeholders and business leaders to gather requirements and translate them into actionable analytical solutions.
- Developed and maintained analytical data models to support reporting, visualization, and KPI tracking using charts, graphs, and geographic maps.
- Conducted data analysis using Excel and MS Access to address ad hoc business needs and reporting requirements.
- Enhanced the data warehouse by identifying and refining reporting logic and performance.

- Designed and executed complex SQL queries, created database tables, views, and stored procedures to support BI initiatives and dashboard optimization.
- Generated financial reports to highlight growth areas and trends, supporting data-driven decision-making in finance.
- Published dashboards to Power BI Service, managed scheduled refreshes, and configured user access and subscriptions.

Education

Data Analytics Bootcamp – **Syntax Technologies**

Associates of Arts in Graphic Design – **Suffolk County Community College**

Developed a strong foundation in visual communication, layout, typography, and storytelling. Gained experience using Adobe Creative Suite and translating complex ideas into clean visuals.
