

.Net Developer

Name: Nithin Sai

Email: cnithin108@gmail.com

Phone: +1 (913)-933-2646

Linked-in: www.linkedin.com/in/nithin-sai

Professional Summary:

Nearly **5** years of IT experience in Software development life cycle and architecture with Open/Distributed System platform using ASP.NET Frameworks and Technologies.

- Experience in **.NET framework** with a focus on creating both web and windows Desktop applications using Microsoft Technologies like **C#, .NET core, ASP.NET, MVC, Blazor, ADO.NET, Web API, Web Services**.
- Proficient in Test-Driven Development (TDD), ensuring software reliability and maintainability through comprehensive test suites.
- Demonstrated proficiency in both front-end and back-end technologies, including AngularJS, ASP.NET MVC, Entity Framework, Node.js, and SQL Server. This allows for end-to-end development of dynamic and interactive web applications, ensuring a seamless user experience. Successfully migrated a large-scale Angular 11 application to Angular 15, ensuring compatibility with the latest features and libraries.
- Developed Micro services to utilize **.Net Core REST web services** in the client's environment.
- Proficient in Rust and Go programming languages, with a strong foundation in computer science principles.
- Led the integration and customization of the Sitecore CMS, enhancing content delivery and personalization capabilities which resulted in a 30% increase in user engagement and a seamless digital experience. Integrated ARM templates with Azure DevOps, achieving seamless Continuous Integration (CI) and Continuous Deployment (CD) of infrastructure components, streamlining deployment processes and bolstering team productivity.
- Continuous learner in the rapidly evolving field of blockchain, staying updated on the latest industry trends and developments.
- Proficient in TypeScript, with over 4 years of experience, specializing in developing robust and scalable software solutions.
- Experience in building Continuous Integration (CI) & Continuous Deployment/Delivery (CD) pipeline as an iterative process using Azure **CICD Pipelines**.
- Experienced in developing ASP.NET, ASP.NET AJAX, JavaScript, jQuery, RESTful, Bootstrap, Angular, VBScript, XML, HTML, XHTML, and CSS.
- Experienced in developing web-based applications using Angular, XML, CSS, HTML, JavaScript, and jQuery.
- Good understanding of **Object-oriented Analysis** and Design (OOD & OOPS), **Dependency Injection**, UML, RDBMS Principles & concrete Interfaces.
- Good in **creating stored procedures, Triggers, Functions** and **Optimizing Queries** for performance by looking at execution plan using Microsoft SQL Server 2008/2012/2016/2019.
- I have extensive experience designing and implementing scalable, cost-effective solutions on AWS cloud infrastructure. This includes optimizing resource allocation, setting up auto-scaling groups, and leveraging AWS services like EC2, S3, RDS, and Lambda to ensure high availability and performance for our applications.
- Experienced in creating responsive and user-friendly web interfaces using HTML, CSS, and JavaScript.
- Successfully integrated Windows Communication Foundation (WCF) services into applications, enabling efficient communication and data exchange between different components.
- Skilled in developing server-side logic and RESTful APIs using technologies like Node.js, Python, or Java.
- Good report creation skills using **Microsoft Reporting Services (SSRS)**, **SSIS** with proficiency in using Report Designer as well as Report Builder.
- Experience in developing Restful services using **REST, SOAP** and **ASP.NET Web API's**. And performed Crud operations Such as POST, GET, PUT, PATCH and DELETE.
- Experience on different version control systems like **MS Visual Studio TFS, Git, SVN**
- Experience in creating **CI/CD release** pipelines using **Jenkins/GitLab** and deploying the applications to **Microsoft Azure** cloud environments and configure CI build jobs.
- Experience with container-based development using docker, Kubernetes and Azure.
- Experience working with JIRA, TFS, DevOps ADO and Confluence.
- Followed best practice development processes including rapid sprints, Kanban, TDD, Agile SCRUM methodologies.

TECHNICAL SKILLS:

Programming Languages	C, C# -.NET,
User Interface	JavaScript, jQuery, Bootstrap, CSS, XML, HTML, Blazor, Prime NG and Kendo UI, HTML5, AngularJS
Web Development	.Net Core 3.1, .NET Core 5, Angular with NgRx, P.NET, ADO.NET, MVC, MVVM, Web Services, Entity Framework, LINQ, Restful, Microservices, Web API, Kubernetes, Docker, AWS, Azure
Databases	Microsoft SQL Server 2008, 2012, 2016, 2019
Message Queues	Rabbit MQ, Active MQ
Version Control Tools	SVN, Team Foundation Server 2010/2008, Azure DevOps, GIT, Bitbucket
Dev Tools and IDE	Team Foundation Server, Visual Source Sage, GIT, Jira, Source Tree, Visual Studio, Android Studio, Visual Studio Code, Git Bucket,nodeJS
SDLC Methodologies	Agile and Scrum

PROFESSIONAL EXPERIENCE:

Client: CVS health, Providence, Ri

March 2022 – Till Date

Role: Dot Net Developer

Responsibilities

- Designed and developed dynamic user interfaces utilizing AngularJS, enhancing the user experience, and enabling seamless interaction with web applications.
- Involved in full Agile, Scrum methodology to produce high quality software model.
- Developed strongly typed Views in ASP.NET MVC as per the requirements.
- Worked with the Entity Framework to create the update model from Code First approach.
- Implemented the Layers (Data access layer, Business Logic Layer, UI layer), Core Libraries, Helper methods, Utilities, Dynamic Settings, Extended Methods.
- Implementation of client-side validations using jQuery and ASP.NET MVC validations implemented at Controller level.
- Utilized the latest features in Angular 15 to build dynamic and highly interactive forms, providing users with a seamless data entry experience.
- Developed user interface using ASP.NET, Bootstrap, JavaScript, CSS3 and HTML5 for responsive websites.
- Involved in migrating SQL Server databases to SQL AWS Database using SQL AWS Migration Wizard.
- Used triggers, stored procedures using T-SQL. Developed certain features of the application functionality i.e., CRUD (Create, read, update, delete) features using AngularJS and Responsive Design.
- Developed Web API using Node JS and hosted on multiple load balanced API instances.
- Imported and migrated data from old legacy systems into Microsoft SQL Server using C#, SQL Server Integration Services (SSIS) packages.
- Used **Azure DevOps** for development tracking and to maintain different versions of source code.
- Managed and administered Oracle databases, overseeing tasks such as installation, configuration, backup, recovery, and performance tuning for optimal system operation.
- Implemented and consumed Web Services (SOAP, WSDL and UDDI) for automatic dump in SQL server.
- Created and consumed NUGET packages for the references in the project.
- Experience in providing support and maintenance for existing multiple applications using **C#, .NET Core, ASP.NET 4.7, MVC 5**, and maintaining UI web pages using **JavaScript, jQuery** and **Prime NG and Kendo UI**.
- Hands on Experience designing single page Application using **Angular**, creating **components, Services** to bind response data to the **UI** using **Prime NG and Kendo UI**.
- Built reusable **Blazor** components that can be used on multiple pages for easier maintenance.
- Wrote complex **Stored procedures/Queries** to retrieve large datasets from database. Creating tables, indexes using **SQL Server**
- Implemented **Dependency Injection** for reusability & injection of mock objects while writing unit test cases using Nun it.
- Maintained the monitoring and alerting of production systems in **Azure cloud**.

- Experience using **DevOps & ADO**, for issue tracking and reporting.
- Used **Azure DevOps** for development tracking and to maintain different versions of source code.
- Integrated Alerts, Metrics and Monitoring to notify error count related to critical pools using **Prometheus, GraphQL**.
- • Architected and automated cloud infrastructure deployments in Azure using ARM templates, streamlining provisioning processes and ensuring consistency across development, staging, and production environments.
- Provided **Production support** for .NET applications in a 24/7 environment, resolving issues.
- Hands on experience using **GIT** as version control system, creating Pull/Merge retests.

Environment: C#, Angular, ASP.NET Core, REST, Microservices, LINQ, Nun it, Blazor, SQL Server, GIT, Prometheus, GraphQL, Docker, Kubernetes & Azure,react.

Client: Vanguard INC, Raleigh, NC

MAY 2020 – DEC 2021

Role: Dot Net Developer

Responsibilities:

- Developed and maintained web applications using **ASP.NET Core MVC, Angular, C#** and **Entity Framework**.
- Worked on **ASP.NET Core MVC** such as Models and Providers, Filters used for developing backend technology.
- Architected and deployed scalable infrastructure in Azure using ARM templates, ensuring environment consistency and reducing manual provisioning errors by 40%.
- Experience using **DevOps & ADO**, for issue tracking and reporting.
- Implemented and managed Oracle databases in Oracle Cloud Infrastructure (OCI), leveraging cloud-based services for scalability, security, and cost-effectiveness.
- Implemented Redux architecture in a large-scale Angular 11 application, streamlining state management and ensuring predictable data flow, resulting in significantly improved application performance and maintainability.
- Developed end-to-end web applications using ASP.NET, including designing user interfaces, implementing business logic, and integrating with databases.
- Proficient in Google Cloud Platform (GCP) services for cloud-native application development and deployment.
- Integrated Alerts, Metrics and Monitoring to notify error count related to critical pools using **Prometheus, GraphQL**.
- Experience in providing support and maintenance for existing multiple applications using **C#, .NET Core, ASP.NET 4.7, MVC 5**, and maintaining UI web pages using **JavaScript, jQuery** and **Prime NG and Kendo UI**.
- Implemented **C#.NET, MVC** and Object-Oriented Programming concepts and created general Class Library, Partial Class, Generics using **C#.NET**.
- Hands on Experience in creating **REST** Services using **ASP.NET Web API** and **C#** to expose analytics data to the clients and hosted them in IIS, **AWS**.
- Created **SQL, T-SQL** programming, Stored Procedures, Triggers and Query Optimization, also written queries for insert, update and modification operations.
- Hands on working on Infrastructure with docker containerization using **Kubernetes**.

Environment: Visual Studio 2019, C#, SQL Server,Redux REST, Microservices,AWS, Kendo UI, Bootstrap, CSS, HTML, GIT, JIRA, Docker, Kubernetes, Azure, Git.

Client: Karvy Technology India Pvt LTD, India

MARCH 2019 – APRIL 2020

Role: Dot Net Developer

Responsibilities

- Analyzed the code and its corresponding logic to update the already developed code to meet the client requirements in both Front end & Back end.
- SQL generated reports and views for Front end display (Preview, Dashboard reports, etc..).
- Developed new web application Templates (model) according to Client requirements.
- Developed web pages using **HTML, CSS, Bootstrap, JavaScript, jQuery, Ajax, SQL**.
- Experienced in using **Jira** (Bug tracking Tool) for any Stories, bugs for resolutions.
- Experienced in Writing Procedures, Views, and Queries to the requirement on **MS SQL Server**.
- Experienced in Integration and Migration of Databases from SQL Server
- Implemented flight booking functionality using **Amadeus and Galileo** is a computer reservation system.
- Used configuration manager in **SSIS** to dynamically move packages between environments, performed error handling for SSIS packages.
- Debugging and writing the Code on Visual Studio, .NET FRAMEWORK.
- Designing Web Pages using ASP .net and writing client-side validations using JavaScript.
- Implemented **OAuth** Token based authentication to secure the ASP.NET Core Web API and provide authorization to different users.
- Extensively used Angular JS UI for ng-grid and UI components and responsible for making AJAX Calls for the UI Interactions to the Controller Actions using jQuery and getting the data back as JSON and parsing it onto the UI.
- Led the integration and customization of the Sitecore CMS, enhancing content delivery and personalization capabilities which resulted in a 30% increase in user engagement and a seamless digital experience.
- Analyzed the code and its corresponding logic to update the already developed code to meet the client requirements in both Front end & Back end.
- Implemented AJAX controls for partial page updates and to decrease the response time on the pages.
- Worked on .NET security features such as Form-Based Authentication and Role-Based Authorization.
- Experienced in the Design, Coding, Testing and Implementation of Web applications.
- Designing of the web pages using Visual Studio.
- Developed Single Page Applications (SPA) using JavaScript Framework Angular, jQuery, Blazer, Web Assembly, React and Bootstrap CSS.
- Setup development environment using latest Blazor.Net with Asp.Net Core
- Used ASP.NET, HTML and CSS to design the presentation layer of the website.
- Graphical User Interface (GUI) was designed using ASP.NET.

Active certifications.

Certification title:

Microsoft Certified: Azure Administrator Associate

Certification number:

AE4Z43-98E501

EDUCATION:

Masters in computer science from University of Missouri-Kansas City (2022-2023)

Bachelors from Vignan Institute of Technology and science (2016-2020)
