SUMMARY

Dynamic Software Developer with 3+ years of experience in full-stack development and a strong IT background in system and network support. Proficient in Node.js, Express.js, MongoDB, React, and Python. Enhanced application scalability and reliability using backend tech stack, while validating API performance to ensure robust integration. Passionate about leveraging both software development and IT expertise to deliver reliable, client-focused solutions

EXPERIENCE

03/2023 – Present

Software Developer, Land Of Studies Group (Hybrid)

- Engineered and tested backend features utilizing Node.js, Express.js, and MongoDB to improve system scalability and reliability
 - Executed comprehensive API testing with Postman to validate system performance and ensure seamless integration
 - Synchronized backend data with frontend displays, enhancing the functionality and accuracy of internal tools
 - Formulated custom features for client projects using React, Node.js, and MongoDB
 - Completed training in Python, Django, and Tkinter to augment customer project functionalities
-

09/2020 – 03/2023

Frontend Developer and Freelancer, Bright World Group

- Facilitated meetings to analyze business requirements and outline deliverables
 - Collaborated closely with backend teams to model and construct RESTful APIs
 - Crafted and developed complex user interfaces and logic from the ground up using HTML/CSS and PHP integration
 - Produced user interfaces leveraging the Ionic Framework
 - Designed custom graphics for web and print media utilizing Adobe Photoshop
 - Executed code refactoring to enhance code maintainability and performance
 - Mentored and coached junior developers to elevate team skills
-

07/2018 – 08/2020

Computer Hardware and IT Support, Dual Brain Technologies

- Delivered hardware troubleshooting and maintenance support
- Developed WordPress-based web solutions for small businesses
- Created and printed visual materials (flyers, banners, etc.) using various Adobe Creative tools
- Instructed clients in fundamental IT skills

EDUCATION

2018 – 2022

University of Buea

Bachelor's Degree, Software Engineering

SKILLS

JavaScript (ES6)	Django	Debugging
TypeScript	MongoDB	Software Standards
HTML	MySQL	Troubleshooting
CSS	SQLite	Networking (TCP/IP)
Python	Postman	Security Concepts
PHP	Git/GitHub	Communication
React	WordPress	CNO Development Concepts
Node.js	VS Code	Software Analysis
ExpressJS	Adobe Photoshop	Atlassian Products
Ionic	Software Development	Work Under Pressure
C++	Debugging	Analytical Thinking
		Critical Thinking
