Education

COOP Careers

New York, NY

Data Analytics Fellow

Expected June 2025

- Engaged in a 16-week fellowship program, acquiring expertise in data cleaning, transformation, analysis, and visualization using SQL, Tableau, alongside continuous professional development
- 200 hours of instruction time with a hands-on mastery of data tools, communication training, networking, and client work with actual companies

New York City College of Technology

Brooklyn, NY

Bachelor of Technology in Database System, Minor in Business

May 2024

- **Coursework:** Big Data Technologies, Business Analytics Project Management, Data Visualization, Java, Data Warehouse, Project Management, Database Design, Database Administration, Quality Database Implementation.

Projects

NYC Department of Health – Restaurant Violation Analysis (Excel, Tableau)

April 2025

- Analyzed NYC restaurant inspection data to identify trends in health code violations by borough and cuisine type using Excel and Tableau.
- Created interactive visualization to highlight risk areas; found Manhattan led in critical violations (64,000+), supporting targeted public health strategies.

Capstone - Data Visualization And Analyses (Excel, Tableau)

- Analyzed and integrated multiple marketing datasets using Tableau to identify high-performing and cost-effective audience segments based on key performance metrics (CPA, CVR, CTR, CPM).
- Created visualizations (bar charts, scatter plots, heatmaps) aligned with stakeholder goals and audience expectations, enhancing decision-making clarity.

Technical Skills, Certifications, Languages

- **Languages:** Bengali, Hindi
- **Certifications:** Coursera Google Data Analytics Certificate
- **Programming Languages & Visualization:** Excel, SQL, Tableau, Java, HTML, Oracle

Work Experience

NYC Department of Buildings

Manhattan, NY

Operations Intern

July 2024 - August 2024

- Designed, developed, and maintained databases using Oracle, handling over 10,000 datasets resulting in a 40% reduction in data retrieval time and significantly improving overall system responsiveness.
- Reduced Elevator and Boiler report preparation time by 50% by downloading and filtering weekly data sets based on corporate needs, and generating customized Excel reports.
- Executed 20+ weekly SQL data queries and built 10+ dynamic Excel pivot tables to support compliance and maintenance reporting. This reduced report preparation time by 50% and significantly improved inspector access to critical Elevator and Boiler data.

P.S. 47 John Randolph

Bronx, NY

Tech Support

October 2023 - June 2024

- Responded to 50+ weekly tech support requests as the school's primary First Responder, reducing downtime for instruction and admin tasks by 30% through prompt troubleshooting.
- Managed and tracked over 1,000 DOE devices, including iPads, computers, and printers. This supported reliable tech access for 500+ students and staff, minimizing disruptions.
- Inspected and maintained over 100 smart boards and A/V systems to ensure proper classroom functionality. As a result, equipment uptime exceeded 95%, allowing teachers to deliver uninterrupted, tech-enhanced lessons.

New York City Police Department

New York, NY

Database Developer

July 2022 - August 2022

- Completed 5+ SQL database design projects, optimizing queries by up to 40% and developing 15+ stored procedures to improve data processing speed and system efficiency for end users.
- Collaborated with interns to develop internal NYPD record-keeping apps, contributing to design, testing, and documentation. Participated in daily stand-ups and used Git for smooth team workflow
