EDUCATION

The University of Chicago

Sep 2024 - Dec 2025

Master of Science, Applied Data Science

GPA 4.0/4.0

- **Coursework:** Data Engineering, Machine Learning, Statistical Modeling, Time Series, Cloud Computing, AI/ML
- **Projects:** [BureauBot Agentic AI](#), [Tumor Detection & Classification](#), [U-3 Unemployment Rate Forecasting](#)

University of Minnesota - Twin Cities

Aug 2017 - May 2021

Bachelor of Arts, Strategic Communications and Psychology (Honors)

Summa Cum Laude

PROFESSIONAL EXPERIENCE

Data Analyst Intern | ISACA (Chicago, IL)

Jun 2025 - Aug 2025

- **Reshaped Q4 acquisition investment strategy and budget allocation** by building a Markov chain-based multi-touch attribution model (Python) **across 320K+ user journeys** spanning multiple marketing platforms, **surfacing \$2.5M in previously under-credited channel contribution**.
- **Built the analytics foundation** using SQL and Python to validate event tracking, **wrangle 20M+ sessions** from GA4 and CRM systems, and automate data quality checks through dbt models, producing standardized funnel metrics for attribution analysis.
- **Translated attribution and funnel analysis into executive decision** by developing Looker dashboards **covering 20M+ sessions**, enabling weekly budget reallocation and pipeline prioritization across paid channels.

Graduate Research Associate / Product Analyst | BIP Lab (Chicago, IL)

Jan 2025 - Sep 2025

- Defined and benchmarked **core product metrics** for **Chat2Learn**, an AI-enabled early childhood learning app, using behavioral data from **school pilots** to identify friction points and inform **pilot-ready product changes**.
- Partnered cross-functionally with engineering and product teams to examine **user progression across pilot cohorts**, translating findings into specific product changes that improved pilot readiness and rollout decisions.

Data Analyst | Dentsu (Vietnam)

Mar 2023 - Jul 2024

- **Owned performance forecasting and optimization across six client accounts**, developing marketing mix (MMM) and mixed-effects models in Python to project **channel ROI** and **paid social performance** under different budget scenarios, **reducing underperforming spend by 15–20% QoQ**.
- **Managed campaign operations and budget optimization** by **developing** and maintaining executive-facing **Power BI dashboards** that tracked performance across Paid Search, Paid Social and Display, supporting \$10.8M+ in annual media spend and enabling real-time reallocations that **reduced wasted spend by 20–25%**.
- **Scaled analytics from reactive to production-grade** by automating ETL pipelines (Rivery + SQL), adding data quality checks and governance that improved accuracy and reduced reporting turnaround from days to hours.

Business Analyst Intern | McKinsey & Company (Vietnam)

Nov 2022 - Feb 2023

- **Diagnosed root causes of stalled new-account growth** for a retail bank by synthesizing **200K+ account-opening records** into a stage-level onboarding funnel, isolating structural breakpoints.
- **Informed executive prioritization of system and process improvements** by translating analysis into branch-level performance views and scenario modeling, supporting **two initiatives projected to deliver ~\$5M in incremental monthly revenue**.

Brand Strategist | Performance Art (New York, NY)

Sep 2021 - Sep 2022

- **Shaped go-to-market and channel strategy** for multiple clients by synthesizing CRM data, market intelligence, and platform analytics, delivering recommendations that generated **20M+ in media value** and improved allocation efficiency by **10–15%** across key metrics each campaign.
- **Led campaign performance reporting**, analyzing creative, media, and audience metrics into executive-facing reports that guided optimization decisions and finance planning discussions.

CORE COMPETENCIES

- **Data Programming:** SQL (MySQL, PostgreSQL), Python (pandas, NumPy, PyTorch)
- **Data Stack:** GCP, Azure, Snowflake, dbt, AWS, Docker, Tableau, Looker, Power BI, Databricks
- **Tools:** GA4, SFMC/Salesforce, HubSpot, JIRA, Confluence, Git, Amplitude, PowerPoint, Advanced Excel
