PROFESSIONAL EXPERIENCE

Qualitest, supporting Google

Project Manager for Google Search

10/2020 – 06/2024 | Austin, TX

- Project Manager for Google Books vertical and the POC for training processes and knowledge transfers
- Collaborated with Program Managers, ENG team, and Solutions Consultants for process improvements, tooling changes, and product discussions
- Drove project deliverables, prepared launch docs, and removed roadblocks for team members
- Transformed existing procedures through automation and detailed guidelines to align with strategic goals
- Created configuration documents for requirement explanations, launching processes, workflows, and training/onboarding

Localization QA for Google Search

12/2019 – 06/2024 | Austin, TX

- Performed complex linguistic and functional testing of Google Assistant on localized products, debugged response failures and feature errors, and compiled quality reports, providing stakeholders with insights on where to focus
- Trained, tested, and launched localized data sets on the language models using proprietary NLP software, resulting in a significant improvement in precision and coverage
- Maintained, debugged, and improved the Smartbugs tool using JavaScript on Google Apps Script
- Worked with a wide range of systems, processes, and technologies to capture, document, analyze requirements, and solve problems from end-to-end using creative problem-solving skills
- Support UI and Product improvement, including help adjust the user interfaces to the local languages
- Performed code reviews, and provided constructive feedback to stakeholders and PMs and increase the quality of the software solutions deployed

Truno

Field Service Tech

07/2018 – 12/2019 | New York, NY

- Responded to an average of 5 technical support tickets per day, focusing on hardware and software issues
- Diagnosed and repaired critical system failures across 60+ client locations, minimizing downtime and restoring operations efficiently
- Installed, configured, and maintained POS equipment, desktops, printers and related hardware
- Provided support for software rollouts, updates, and patching in collaboration with engineering teams
- Implemented a feedback loop with end-users to better understand user issues, leading to a development of a FAQ section that decreased ticket volume by 20%
- Ensured compliance with company security policies and configuration standards

TECHNICAL SKILLS

Programming

Python, R, Java, C++

Database

MySQL, Google Cloud

Tools & Others

Microsoft Office
(Word, Outlook, Excel)

PROJECTS

Hand Motion Controlled Robotic Vehicle

- Self-Driving DC Motor Arduino Car || C++
- Utilized L293D motor shield to control 4 DC motors
- Detects and avoids walls using an ultrasonic sensor

EDUCATION

Bachelor of Science in Computer Engineering Technology | GPA: 3.90

05/2019 | New York, NY

Farmingdale State College

- Coursework: Data Structures, Digital Electronics, Electric Circuits, Amplifiers, Digital Electronics, Semiconductor Devices, Microprocessor Interfacing & Control, Advanced Networking
