

NAINCY CHOVATIYA

cxn0638@mavs.uta.edu | 682-298-9040 | <https://www.linkedin.com/in/naincy-chovatiya/> | Dallas, TX

SUMMARY

Experienced software developer with 2 years in designing and implementing innovative solutions. Proficient in Python, Java, SQL, and web technologies. Skilled in database management and framework utilization.

EDUCATION

University of Texas at Arlington

Master of Science in Computer Science (Cumulative GPA: 3.67/4.0)

Arlington, TX

May 2025

Gujarat Technological University

Bachelor of Engineering in Information & Communication Technology (Cumulative GPA: 8.66/10)

Ahmedabad, India

June 2023

SKILLS

Methodology: SDLC, Agile, Waterfall, SCRUM

Languages/ Databases: Python, Java, SQL, HTML, CSS, Java Script, C, MySQL, PostgreSQL, SQL Server, MongoDB

IDEs: Visual Studio Code, PyCharm, Jupyter Notebook, Google Colab, Git, Hibernate, IntelliJ, Eclipse

Packages: NumPy, Pandas, Matplotlib, SciPy, Math Library

Other Skills: Data Cleaning, Critical Thinking, Communication Skills, Presentation Skills, Problem-Solving

PROFESSIONAL EXPERIENCE

The University of Texas at Arlington

Research Assistant

Arlington, TX

February 2024 - Present

- Develop and implement strategies for extracting and analyzing large datasets, ensuring data integrity and reliability.
- Develop and maintain Python scripts to automate processes and workflows in the ATLAS Tier 2 project, improving efficiency and accuracy through streamlined, automated solutions and ongoing script optimization.
- Lead the migration of Python scripts and operating systems, ensuring seamless transitions with minimal downtime.
- Provide IT support for the project, troubleshooting and resolving technical issues to maintain project continuity.
- Work closely with team members, Dr. De, and other stakeholders to meet project goals and deliverables.

Botspot Infoware Pvt. Ltd

Junior Software Developer

Ahmedabad, India

April 2021 – May 2023

- Implemented a comprehensive Hospital Management System (HMS) integrating patient modules, appointments, billing, security, and compliance features. Achieved a 20% increase in user satisfaction and a 10% decrease in regulatory violations.
- Empowered by Odoo, team fueled staff training and cross-functional collaboration, fortifying healthcare operations. This ignited heightened efficiency and slashed costs, driving impactful improvements.
- Developed a comprehensive healthcare management system that integrates clinical care, appointments, and payments, resulting in a significant boost in operational efficiency and enhanced compliance with industry standards and regulations.
- Dynamically championed a small-scale project, spearheading the creation of an Employee Check-Out System. Exhibited versatile mastery in efficiently executing varied software development tasks with success.

Axisray Technology

Software Engineer Intern

Ahmedabad, India

November 2020 - March 2021

- Team developed a web-based product management system that automated tasks, significantly boosting productivity.
- Implemented an enhanced search function that reduces support queries by 50%, allowing users to effortlessly find and access detailed product information, extending beyond warranties, and significantly increasing user satisfaction.
- Leveraged Java and Java Stream API in the project to streamline the organization and maintenance of product data, cutting down the time spent by users by an average daily saving of one hour.
- Teamed up with diverse departments to comprehend user needs, converting requirements into streamlined and user-friendly software solutions, fostering effective cross-functional collaboration for optimal outcomes.

PROJECTS

CharityMiles Donation App | Java, Android, Firebase Realtime Database, Firebase Storage

- Developed an Android app using Firebase for donors to connect with charities. Features include category browsing, scheduling pickups, and efficient data and image handling for seamless interaction.
- Improved organizational responsiveness and transparency with real-time notifications and a comprehensive dashboard for tracking and reporting donations, improving overall efficiency and stakeholder engagement.

Online Food Ordering System | Python, Django

- Implementing online food ordering systems, similar to online takeout services, can enhance restaurant revenue by attracting more customers and streamlining the ordering process, thus reducing wait times and improving efficiency.
- QR code-enabled dine-in ordering simplifies the process by letting customers scan a code to instantly access the restaurant's menu and place orders directly from their smartphones. This reduces wait times, speeds up service, and improves the overall dining experience by making ordering more efficient and convenient.
