Professional Summary

Data analyst with 2+ years of experience collecting, cleaning, and analyzing complex datasets to surface actionable insights that drive business decisions. Proficient in Python, SQL, R, Tableau, and Power BI; skilled at building interactive dashboards, developing predictive models, and translating raw data into clear reports for technical and non-technical stakeholders. Strong analytical, problem-solving, presentation, communication, and organizational skills with a proactive approach to learning the latest techniques.

Skills

Languages & Querying: R, Python, SQL, SPSS, SAS

Visualization & BI: Tableau, Power BI, Excel (Advanced: PivotTables, Filtering, VLOOKUP), Figma

Analytics: Data Analytics, Statistical Analysis and Modeling, Data Collection, Data Manipulation, Data Models, Machine Learning, Data Visualization, Data Mining, Time Series Forecasting, Business Analytics

Tools: Word, Excel, PowerPoint, Microsoft Access, RStudio, ArcGIS, Jira, Google Script

Languages: English, Thai, Mandarin

Work Experience

Data Analyst

October 2024 - June 2025

RollUp, Inc.

Woodland Park, CO

- Designed and deployed end-to-end data collection pipelines for the company's mobile application, improving data availability and accuracy across all downstream reports and dashboards.
- Built and maintained 10+ interactive Tableau and Power BI dashboards that enabled stakeholders to self-serve KPI monitoring, track operational trends, and surface anomalies in real time.
- Collaborated with product managers and engineers in cross-functional sprint reviews to define key metrics, identify performance gaps, and recommend data-driven process improvements.

Data Scientist

January 2024 - May 2024

Q2 Impact

VA, United States

- Collected, cleaned, and validated datasets from 10+ diverse sources, building a unified analytical pipeline to ensure data accuracy and consistency across all research outputs.
- Analyzed large datasets using Python to identify trends, patterns, and disparities across NYC's 5 boroughs, uncovering statistically significant findings that guided policy recommendations.
- Delivered end-to-end analysis—wrangling, feature engineering, variance analysis, and hypothesis testing—that produced the statistical evidence underpinning stakeholder policy recommendations.

Data Analyst

June 2021 - July 2022

C-Form

Bangkok, Thailand

- Analyzed large transactional datasets using Python and Excel to identify trends, optimize product placement, and refine marketing strategy—contributing to a 20% increase in sales revenue.
- Built demand-forecasting models in Python that reduced inventory costs by 15%, improving supply-chain efficiency and operational decision making.
- Standardized ETL and reporting documentation, making workflows repeatable and audit-ready and reducing onboarding time for new team members.

Significant Projects

Hit Songs Analysis | Python • Machine Learning (Clustering, Naive Bayes, Decision Trees, SVM, ARM, and Regression)

- Engineered features and conducted EDA to identify key attributes predicting chart performance; optimized model accuracy from 71% to 81% using RandomizedSearchCV and ensemble tuning.

Book Recommendation System | AWS • PySpark • ALS Collaborative Filtering

- Built a recommendation system processing 200,000+ user ratings on AWS using PySpark and ALS; achieved RMSE of 5.715, validating model reliability for large-scale personalization.

A Study of Factors Affecting Road Safety | R • Multilevel Regression • Statistical Hypothesis Testing

- Quantified a 23% rise in accident rates per 1,000 additional road miles using multilevel regression in R—a finding with direct transportation policy implications.

Education

Master of Science in Data Science – GPA: 3.86/4.00

August 2022 - May 2024

University of Colorado Boulder

CO, United States

Relevant Coursework: Data Structures and Algorithms, GIS Social and Natural Sciences, Unstructured Data and Distributed Data Modeling and Analysis

Bachelor of Science in Statistics – GPA: 3.13/4.00

August 2017 - May 2021

Chulalongkorn University

Bangkok, Thailand

Relevant Coursework: Database and Applications in Business, Data Warehouse and Business Intelligence System, Sampling and Survey Research Design

Certifications

- Intermediate Python
- Object-Oriented Programming in Python
- R Programming and Tidyverse
- SQL BootCamp: Learn SQL DATABASE Queries with SQL SERVER
- SAS Programming
- Machine Learning with scikit-learn
- Product Analytics
