

Neelam Singh

neelamsingh.reachout@gmail.com | (+1)2066083526 | Location : Seattle, WA, USA

Work Authorization: L-2 Spouse Visa – Eligible to work full-time in United States of America without sponsorship

SUMMARY

Software Engineer with 1.5+ years developing scalable ETL pipelines and 5G protocols, featuring Google infrastructure experience and expertise in C/C++, Python, and cloud technologies. Proven track record in data engineering and telecommunications with strong problem-solving abilities.

EDUCATION

M.SC. COMPUTER SCIENCE

UNIVERSITY OF DELHI, INDIA

CGPA - 8.0/10.0 | 2021 - 2023

B.SC. (H) COMPUTER SCIENCE

UNIVERSITY OF DELHI, INDIA

CGPA - 7.8/10.0 | 2018 - 2021

COURSEWORK

- Data Structures and Algorithms
- Object Oriented Programming
- Operating System, Networking

SKILLS

- C, C++, Python.
- Git, GitHub, GitLab, Jira, GDB, Linux.
- AWS Lambda, DynamoDB, GCP, Cloudwatch.
- TCP/IP, UDP, 5G PHY Layer, IMS.
- ETL Processes, Knowledge Graphs, Path Queries, NETCONF.
- Network Management Systems, Software Testing & Debugging, Troubleshooting, Agile.

EXPERIENCE

VACO BINARY SEMANTICS LLP

Associate Software Engineer

Jun 2024 – Nov 2024 | India

- Developed ETL processes for Google's Tugela, platform as part of core development team, implementing data reconciliation strategies to ensure data accuracy and consistency
- Built Python-based data processing solutions for large datasets, enabling fast information retrieval that reduced manual work by 60% and streamlined data verification workflows.
- Improved data pipeline efficiency by approx. 30% by optimizing C++ ETL components, including transformation logic and reconciliation checks, enabling faster data validation
- Skills : C/C++, knowledge graph, ETL, path query, Python(basics), debugging.

AMANTYA TECHNOLOGIES

Software Engineer | Aug 2023 – Dec 2023 | India

SDE Intern | Feb 2023 - Aug 2023 | India

- Optimized the 5G Physical (PHY) layer for PUBSUB, developed features to align with architectural changes. Evaluated and implemented various networking protocols such as TCP/IP, UDP within existing solutions.
- Developed TTCN-3 test scripts for Client's 5G IMS procedures with the help of Auto Certification Platform (ACP).
- Skills : C/C++, 5G call flow, IMS, TTCN-3 language, GDB.
- Developed a Network Management System (NMS) dashboard, handling both frontend design and backend integration to display useful information under a single dashboard.
- Designed the data model capable of interfacing with multiple internal modules. Language used was YANG, and data was exchanged via NETCONF.
- Implemented the backend logic to extract information like memory utilization, CPU Utilization etc. and passed it to the NMS frontend.
- Skills : C, Linux, Github, Gitlab, Jira, GDB, Networking Skills : NETCONF, YANG,.
