

## PROFESSIONAL HIGHLIGHTS

Over the past decade, I've built a career in web development, IT support, and information security, with a strong foundation in resolving technical issues, managing user access, and maintaining secure systems. My approach is rooted in continuous learning and proactive problem-solving, whether assisting users with login issues, deploying MFA, or streamlining onboarding workflows. At the Michigan House of Representatives, I supported my department by troubleshooting software problems, provisioning accounts, and implementing secure configurations to protect sensitive data and ensure operational continuity.

## EXPERIENCE HIGHLIGHTS

### Michigan House of Representatives (2014-2024)

Lansing, Michigan

Web Developer (Security Operations & Technology Advisor)

Provided front-line technical support for website and communications systems used by the Democratic Caucus and individual legislators. Managed updates, resolved access and formatting issues, and ensured consistent uptime across multiple platforms. Oversaw the organization's e-newsletter system, troubleshooting distribution errors and maintaining accurate contact lists to support timely outreach to constituents statewide. Built and maintained secure micro-sites for advocacy campaigns, prioritizing accessibility, data integrity, and user experience.

- Upgraded legacy systems through routine maintenance and secure configurations, reducing downtime and improving system performance for end users.
- Managed three servers and as primary point of contact for 60+ lawmakers and their staff, ensuring secure information delivery to 80,000+ subscribers and implementing website updates and new features based on user feedback, ensuring accessibility and functionality aligned with legislative needs.
- Recognized by management for initiative in researching and deploying innovative IT solutions that improved user experience and operational efficiency.
- Led vendor research and selection in partnership with Michigan House of Representatives central information technology to onboard new technologies and provide support for both House Majority and Minority leaders.
- Evaluated and recommended Google Drive as a collaboration platform. Configured permissions, alerts, and folder structures to support secure file sharing and team workflows.
- Identified and remediated vulnerabilities, including clear-text password exposure, by implementing access controls and documenting mitigation strategies.
- Trained 20+ staff on Multi-Factor Authentication setup and usage, enhancing login security and reducing unauthorized access incidents.
- Provisioned and deprovisioned user accounts during onboarding and offboarding, ensuring accurate access controls and minimizing insider threat risks.
- Performed log analysis to detect anomalies and potential threats, enabling proactive response and system hardening.
- Documented troubleshooting steps and created handover notes for continuity.

### Michigan Senate Communication Department (2013-2014)

Lansing, Michigan

Intern

At the Michigan Senate Communication Department, I worked on a set of diverse projects from creating websites focused on mobile first, optimizing images to ensure they don't hinder web performance, learning more about various content management systems and server configurations.

- Worked with senior developers and graphic artists to gain hands-on experience in creating mobile-friendly and adaptive layouts using HTML and CSS.
- Gained comprehensive knowledge of content management systems and their applications.
- Learned about server configurations to maintain high uptime and reliability for websites.

## VOLUNTEER EXPERIENCE

### Board of Directors & Governance Committee Care Free Medical (2019-2021, 2022-current)

Lansing, Michigan

#### Executive Board Member

As a member of the Board of Directors for Carefree Medical, my role is to strengthen the organization's capacity, contribute to strategic planning and ensure its ongoing operational effectiveness.

- Collaborated with fellow board members from diverse backgrounds to successfully develop and secure approval for organizational budgets.
- Volunteered time to support organizational events and manage the website, ensuring its security and smooth operation.

## HOME LAB & TECHNICAL PROJECTS

### Wazuh TheHive Shuffle Integration Home Lab

- Deployed Wazuh SIEM across a virtual machine and cloud environment with agents on Windows 10 and Ubuntu to monitor endpoint activity and detect malicious behavior.
- Identified and responded to credential dumping attacks via Mimikatz and brute-force SSH attempts, using Wazuh rulesets to automatically block IPs and reduce threat exposure.
- Simulated SOC workflows using Wazuh and TheHive to triage alerts and automate case creation.
- Configured Shuffle to generate real-time email notifications, improving situational awareness and accelerating alert response.
- Mapped Mimikatz credential dumping to MITRE ATT&CK T1003.001, reinforcing detection coverage and playbook alignment.

## SKILLS

- **Threat Detection & Response:** Log Analysis, Threat Detection, Server Hardening, SIEM (Wazuh), Alert Triage (TheHive), Case Automation (Shuffle), Threat Intelligence Enrichment (VirusTotal)
- **Access Management:** Multi-Factor Authentication Configuration, User Provisioning & Deprovisioning, Least Privilege Enforcement
- **Systems & Platforms:** Linux Server Management, Windows/macOS Troubleshooting, WordPress, Drupal
- **Frameworks:** MITRE ATT&CK
- **Collaboration Platforms:** Google Workspace, SharePoint, Teams, Slack

## EDUCATION

CompTIA Security+  
Lansing Community College  
Michigan State University
