Temple, TX | +19105844559 | nicolekida@msn.com | <https://www.linkedin.com/in/nicole-kida>

Professional Summary

Meticulous Data Analyst with 2 years of experience in Human Resources analytics, delivering executive-level dashboards in Power BI and Domo that provided visibility into turnover, safety, and compliance, enabling informed leadership decisions. Automated HR reporting pipelines, significantly reducing manual effort while improving data accuracy. Leveraged expertise in People Analytics, visualization, and compliance monitoring, to translate workforce statistics into actionable insights that strengthened operational performance.

Work Experience

Temco Logistics | Temple, TX (Remote)

Data Analyst | November 2024 – Present

- Design interactive Power BI and Domo dashboards, consolidating employee data to enhance leadership visibility and drive proactive workforce planning
- Streamline recurring personnel reporting workflows through automation tools, minimizing manual processing by 20% and accelerating report generation
- Produce recurring workforce intelligence briefings in collaboration with HRBPs and operations management, facilitating staffing strategy and local decision execution
- Evaluate transportation safety and regulatory adherence indicators, identifying exposure trends and strengthening organizational readiness
- Validate human capital system datasets by reconciling Paycom records and multi-source reports, improving data reliability and boosting confidence in organizational analytics
- Translate complex workforce analytics into clear executive-level narratives and visual reports, fostering informed, people-centered strategic decision-making by leadership

KBR, Human Performances and Research Division | Killeen, TX

Donor Specialist | January 2024 – December 2024

- Cultivated relationships with over 50 veteran organizations, expanding brain injury research outreach and driving a 20% growth in study enrollment
- Managed donor communications and consent processes, enabling the successful, compliant completion of 10+ tissue donations
- Obtained, processed and dispatched tissue specimens, ensuring timely delivery and adherence to strict procedural standards
- Developed and distributed targeted educational resources, boosting program understanding by 25% and promoting participant engagement
- Created structured project reports and visual dashboards, enhancing tracking efficiency by 70% and driving faster management decision-making

Department of State Health Services | Austin, TX

Microbiologist | August 2023 – October 2023

- Verified 300+ newborn screening samples daily in LIMS, maintaining 100% data precision and reliable lab reporting
- Oversaw incoming specimen intake and quality control checks on 200+ daily samples, preserving integrity across high volume processing procedures
- Optimize workflow efficiency through 4 laboratory software platforms, ensuring accurate management of 50+ weekly analytical reports
- Contributed to continuous specimen processing through adaptation of laboratory procedures, minimizing workflow disruption during emergencies and disastrous situations

Grifols Pharmaceuticals | Clayton, NC

Biologist | May 2023 – August 2023

- Conducted weekly collection and analysis of 100+ environmental specimens, performing 250+ quality assessments to maintain GMP/GLP adherence throughout 5+ initiatives
- Performed 50+ utility system evaluations each month and validated 30+ airflow assessments, enhancing cleanroom performance and production line standards
- Maintained cleanliness of 200+ laboratory instruments weekly, upholding safe management of biological fluid and a contamination-free environment
- Adhered to SOPs in collaboration with interdepartmental teams, translating technical procedures to improve lab workflow

The Science House | Raleigh, NC

Program Assistant | September 2021 – May 2023

- Facilitated STEM outreach initiatives for 200+ underrepresented students, expanding program accessibility and promoting diversity in science education
- Instructed 200+ participants in data collection and analysis techniques, improving practical STEM skills and experiential learning outcomes
- Evaluated data across 50+ projects and 15+ program sessions, generating insights that drove curriculum effectiveness and student results
- Oversaw program logistics including website management, inventory control, and communications for 50+ initiatives and 3 summer camps, ensuring smooth execution
- Created structured learning materials and procedures for 10+ STEM classes, achieving a 95% program completion rate and enhanced participant understanding

The Science House | Raleigh, NC

Lab Manager | September 2021 – January 2023

- Led 20+ laboratory assistants by coordinating assignments and enforcing safety protocols to ensure effective task execution
- Designed hands-on mentorship for 20+ undergraduate researchers, promoting precision and consistency in experimental procedure
- Administered specimen tracking systems and inventory management for 300+ samples, optimizing research accessibility and timely project completion
- Developed and applied imaging analysis techniques, improving measurement precision by 20% and enhancing specimen retrieval processes
- Established strategic partnerships with local science organizations, expanding outreach programs and fostering collaborative research opportunities
