

Nikhil P

Data Analyst

San Ramon, CA, USA | +1 (551) 235-9086 | nikhilparvatapuram001@gmail.com | [LinkedIn](#)

SUMMARY

Results-driven Data Analyst with 3+ years of experience leveraging **SQL, Python, Tableau, Power BI, AWS, Azure, Snowflake**, and **dbt** to deliver financial and retail analytics reporting solutions. Skilled in transaction analysis, customer behavior analytics, dashboard reporting, KPI analysis, forecasting, and data visualization. Experienced in transforming operational datasets into actionable insights supporting portfolio monitoring, fulfillment optimization, operational reporting, and data-driven business decisions across enterprise analytics environments.

TECHNICAL SKILLS

Languages	Python, Scala, R, SQL, SAS
Packages / Libraries	NumPy, Pandas, Matplotlib, Seaborn, ggplot2, SciPy, Scikit-learn, TensorFlow
Visualization Tools	Tableau, Power BI, Advanced Excel (Pivot Tables, VLOOKUP)
IDEs	Visual Studio Code, PyCharm, Jupyter Notebook
Database Management	MySQL, PostgreSQL, SQL, Oracle, Snowflake, dbt
Cloud Technologies	AWS, Azure
Methodologies	SDLC, Agile, Waterfall, Predictive Modeling
Version Control	Git, GitHub, Bitbucket
Other Skills	SSIS, SSRS, Machine Learning Algorithms, CI/CD, Probability Distributions, Confidence Intervals, ANOVA, Association Rules, Clustering, Advanced Analytics, ETL Processes, Informatica, Report Generation, Regression, A/B Testing, Forecasting & Modeling, Hypothesis Testing, Time Series Analysis, Root Cause Analysis

WORK EXPERIENCE

PayPal, USA | Data Analyst

Aug 2024 – Present

- Analyzed financial transaction and customer-risk datasets to identify spending patterns, monitor portfolio performance metrics, and support enterprise financial analytics and reporting operations.
- Optimized **SQL** queries and **Snowflake** warehouse tables processing **14 million** financial records, improving reporting performance by **24%** and strengthening operational visibility for business stakeholders.
- Automated **Python** and **Pandas** preprocessing workflows within **AWS** environments, streamlining transaction validation, customer verification checks, and financial data transformation processes across reporting pipelines.
- Forecasted financial utilization and customer-risk trends using **Scikit-learn** models across **3.6-million** customer records, improving demand planning accuracy and resource allocation efficiency by **21%**.
- Implemented **Tableau** dashboards tracking revenue leakage, portfolio performance metrics, customer transaction trends, and KPI analysis reporting supporting financial operations optimization initiatives.
- Evaluated financial operational performance through hypothesis testing and time series analysis, identifying abnormal transaction fluctuations and supporting workflow optimization across enterprise analytics initiatives.
- Developed **dbt** transformation models and scalable data-modeling workflows using **Git** and **Bitbucket** within Agile delivery environments, improving financial reporting consistency, stakeholder collaboration, and enterprise data warehousing efficiency.

Capgemini, India | Data Analyst

May 2021 – Jun 2023

- Analyzed customer transactions, fulfillment operations, and retail interaction datasets supporting inventory optimization, shipment visibility, customer-retention reporting, and operational performance monitoring across e-commerce business workflows.
- Optimized **SQL** and **MySQL** reporting queries processing **9 million** order records, improving retail dashboard performance by **19%** and accelerating fulfillment reporting for operational stakeholders.
- Streamlined **Python** and **NumPy** workflows within **Azure** environments, standardizing customer-order validation, transaction cleansing, and retail data transformation processes supporting enterprise operational reporting initiatives.
- Developed **Power BI** dashboards tracking cart-conversion metrics, fulfillment efficiency, inventory movement, and logistics coordination performance, improving operational visibility and retail KPI monitoring across supply-chain operations.
- Evaluated customer purchasing trends using **Matplotlib** and **Seaborn** visualizations, identifying seasonal demand patterns that improved promotional campaign engagement rates by **16%** across multiple product categories.
- Assessed retail sales and inventory datasets using **Advanced Excel** functions including Pivot Tables and VLOOKUP, supporting order reconciliation, operational analysis, and fulfillment performance reporting activities.
- Monitored fulfillment operations and shipment trends across **3.1 million** logistics events, conducting root cause analysis that reduced shipment-delay escalations by **18%** across retail operations workflows.
- Developed **SSIS** ETL pipelines and collaborative reporting workflows using **GitHub**, improving retail data integration consistency and supporting **SDLC**-driven analytics delivery across cross-functional business teams.
