

SUMMARY:

Senior Data Analyst with 7+ years of experience in collecting, organizing, interpreting and disseminating statistical information. Proficient in providing advanced analytics and business intelligence solutions for workstreams including Product, Marketing, E-Commerce, Sales and Operations. Built high-impact interactive reports and data engineering pipelines leveraging SQL, Python, Tableau, Snowflake and Alteryx to support performance monitoring and strategic initiatives for executive leadership.

EDUCATION:

Master of Science, Information Systems | University of Cincinnati, USA | GPA: 3.96/4 January 2021 - April 2022
Bachelor of Engineering, Electrical Engineering | Gujarat Technological University, India | GPA: 3.5/4 June 2012 - May 2016

WORK EXPERIENCE:

Senior Business Intelligence Analyst, Strategy & Product Analytics

September 2022 - Present

Grubhub Holdings Inc - New York, USA

- Led product strategy roadmap, collaborating with cross-functional teams, standardized **150+ product lifecycle** metrics
- Analyzed large-scale historical datasets (**1B+ rows**) using SQL scripts on **15+** products, optimizing **product usage** by 30%
- Performed market research analysis in **Source of Truth** Tableau reports, communicated actionable recommendations on customer shopping preferences in **product funnel** (Menu, Checkout), minimizing **churn rate** by 10% year-over-year
- Managed 10+ high-priority analytics projects and defined product requirements, translating them into **75** user stories that accelerated **development** by 20%, ensuring 99% **sprint readiness** based on business value
- Designed python-based models for marketplace inventory, facilitating **Go-To-Market** plans for expansion into 48 US states
- Drove A/B testing hypothesis and multivariate experimentation using Optimizely; designed tests, built frameworks, and iterated results in Python to make data-informed launch decisions, increasing **product page conversion rate** by 10%
- Collaborated with product management teams to optimize **product experience**, conducted **user and competitive research**, developed detail-oriented ad-hoc reports in Excel, leading to 15 **product improvements** enhancing **user satisfaction** by 25%
- Acted as SME to streamline key business processes, reinforcing **operational excellence** by 25% across B2B and B2C sectors
- Refined event tracking and workflows in Amplitude and Segment, driving 15% increase in **product feature adoption**

Data Scientist, Product

August 2021 - September 2022

Neofangle Solutions LLC - Montville, USA

- Transformed UX/UI interactions (SaaS) into cutting-edge data-driven trade-offs in SQL, uplifting **product growth** by 10%
- Built visually appealing dashboards for a **Self-Service** BI platform in Tableau and Looker; track trends, pain points, insights, opportunities to inform critical findings in jewelry sales (**E-Commerce**); accelerating **customer lifetime value (CLTV)** by 25%
- Utilized Python to build predictive models and forecasting, created machine learning algorithms (Regression, Segmentation, Clustering Analysis) to enhance personalization, growing **revenue per user (RPU)** by 10% and **user retention** by 15%
- Reported success metrics (Net Profit, ROI) in Excel, increasing **average order value (AOV)** for top-selling products by 20%

Data Quality Analyst

June 2019 - August 2020

Radixweb Technosoft LLP - Ahmedabad, India

- Applied analysis in MySQL (DDL, CTEs, Joins), boosting **product engagement** metrics (Session Duration, Daily Users) by 20%
- Provided data storytelling and presentations to senior stakeholders on customer traffic via Tableau and Power BI; improving **accessibility** for **growth KPIs** (Click-Through Rate, Add-to-Cart Rate) by 50%; cutting **decision-making** latency by 25%
- Developed models in Snowflake and DBT to allow data ingestion and integration, expanding **pipeline efficiency** by 15%
- Deployed efficient and maintainable ETL processes in Alteryx; ensured data quality, integrity, accuracy and consistency in CRM (Salesforce, SFDC, Dynamics) by partnering with engineers; raising event tracking in **Hive Big Data** warehouse by 20%

Data Analyst

January 2017 - May 2019

Accenture - Pune, India

- Executed exploratory data analysis in PostgreSQL to identify user behavior patterns; facilitated Marketing team to assess **subscriptions** and **transactions** with data wrangling and data mining; advancing **data preparation efficiency** by 35%
- Participated in requirements analysis and functional planning (Agile), analyzed digital marketing campaign effectiveness using Google Analytics, lowering **Customer Acquisition Cost (CAC)** by 20% across channels (email, social, paid search)
- Conducted rigorous analysis of user journey touchpoints in Python, identified friction points impacting 10% **drop-off rate**
- Integrated data pipelines from diverse sources in AWS Redshift and Databricks, enhancing **data availability** by 15%

SKILLS:

Programming Languages: Presto, Python (Pandas, NumPy, Scikit-learn), SQL, R, SAS, Hadoop, Spark, Java, .net, API, Linux

Analytics/BI: Tableau, Dataiku, Alteryx, Power BI, Excel, Databricks, Looker, Google Analytics, Amplitude, Segment, Workbench

Data Management: MySQL, MS SQL Server, Dataiku, Google Analytics, AWS Redshift, S3, Hive, DBT, Snowflake, Google Ads

Project Management: JIRA, Git, Google Sheets, PowerPoint, Agile, Scrum, VBA, Visio, Clickstream, Salesforce, SFDC, Dynamics
