

NISHAD KOLHE

Jersey City, NJ 07306 | nishadk1504@gmail.com | (779) 240-7306 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

Master of Science (MS) in Information Systems, Pace University, New York, NY	GPA 4.0/4.0	May 2025
Bachelor of Engineering (BEng) in Electronics, Mumbai University, India	GPA 3.8/4.0	May 2022

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, TypeScript, JavaScript, Node.js, C, C++
- **Frameworks & Backend Development:** Spring Boot, Django, Flask, FastAPI, Express.js, AWS Lambda
- **Frontend Development & Web Technologies:** React, Angular, Next.js, HTML5, CSS3, SCSS, Jinja, AJAX
- **Databases & Data Tools:** PostgreSQL, MySQL, MongoDB, SQL
- **APIs & Integration:** REST, GraphQL, End-to-End Web Application Development, Swagger (OpenAPI)
- **Testing & QA:** Selenium, JUnit, Postman, Pytest, JMeter, Robot Framework, Unit Testing, Regression Testing, System Integration Testing, UI Testing, Smoke Testing, Sanity Testing
- **CI/CD & DevOps:** GitHub Actions, Jenkins, Kubernetes, Docker, PythonAnywhere, Render, Netlify, Vercel
- **Cloud & Collaboration Tools:** AWS, GitHub, Bitbucket, Jira, Confluence, Figma
- **Software Development Life Cycle (SDLC):** Agile, Scrum, Waterfall

PROFESSIONAL EXPERIENCE

FilmyAI – Software Engineer	August 2025 – Present
● Developed and optimized RESTful APIs using Spring Boot, reducing average response time by 30% and enabling seamless integration with React-based client-facing applications and third-party services. ● Designed and normalized relational database schemas in PostgreSQL to handle high-volume transactions, improving query efficiency by 25% and ensuring data integrity across multiple modules. ● Automated end-to-end testing with Selenium and JUnit in CI/CD pipelines (GitHub Actions), covering both backend APIs and React UI workflows, reducing manual testing effort by 40% and accelerating release cycles. ● Implemented DTO patterns, exception handling, unit testing, and API testing with Swagger, increasing code maintainability and achieving 90% + test coverage, which reduced production defects effectively. ● Built React +TypeScript pages with reusable components for the FilmyAI platform, integrating REST APIs with dynamic, interactive UIs, and improving page load by 15%.	
Trivia Software's - Software Engineering Intern	November 2022 – June 2023
● Contributed to the customer base with 40 new users, developing and managing web applications for a private educational institution using Django framework and implementing CSS media queries, ensuring mobile accessibility. ● Designed and implemented REST APIs in Django, performing validation and defect resolution with Postman to ensure business logic accuracy and reliable data exchange across modules. ● Streamlined development by creating distinct, manageable components using Django's MTV architecture, reducing 3 development days per sprint. ● Collaborated with a team of six to work on bug resolution and provide hotfixes for UI components during the deployment phase, resulting in an 89% error-free deployment.	
OneRoof Technology LLP - Associate Software Engineer	July 2020 – June 2022
● Built secure RESTful APIs in Spring Boot (Java, JDBC, MySQL/PostgreSQL), implementing JWT authentication and query optimization to reduce API latency by 25% and database latency by 15% and strengthening data access security across applications. ● Architected Python microservices with FastAPI and GraphQL, enhancing query flexibility and improving API efficiency by 35% compared to REST endpoints. ● Built asynchronous Node.js services for real-time processing, improving responsiveness and throughput of client-facing applications. ● Deployed microservices on Kubernetes clusters with auto-scaling, ensuring high availability and zero downtime during 50% traffic spikes.	

PERSONAL PROJECTS & EXPERIENCES

[Calm Care](#) - Built a wellness management platform using Django and React frameworks with JWT authentication, interactive dashboards for stress tracking, deployed on Render & Netlify.

[Poll Application](#) - Developed a live, interactive poll app using Django with real-time voting, user authentication, and mobile responsiveness.

[Stress Prediction Web Application](#) - Built a mental health prediction tool using NLTK and Bernoulli NB, deployed globally on PythonAnywhere.

CERTIFICATIONS

Python with Data Structures, Data Bases, and Data Science	December 2022
Django Web Framework & REST API	February 2023
Machine Learning (ML) & Flask Deployment	March 2023
React	August 2025
Springboot	August 2025
