

SAI NITHIN MANDALAPU

United States • +1 (857) 334 5163 • mandalalaou.sa@northeastern.edu • [LinkedIn](#)

Business Analytics graduate with a master’s from Northeastern University and hands-on experience in internships and academic projects across supply chain, operations, and data analytics. Skilled in Python, SQL, Tableau, Power BI, and SAP S/4HANA, with a proven ability to analyze complex datasets, build predictive models, and deliver real-time dashboards that improve decision-making. Adept at requirements gathering, KPI reporting, and cross-functional collaboration, with a track record of reducing inventory waste, optimizing pricing strategies, and supporting S&OP processes. Highly adaptable early-career analyst with strong problem-solving, communication, and stakeholder engagement skills.

EDUCATION

Northeastern University, Boston, MA

Dec 2024

Master of Science in Business Analytics

Relevant Coursework: Data Analysis, Machine Learning, Information Visuals and Dashboards for Business, Consumer Markets

SKILLS

Programming and Data Tools: Python (Pandas, NumPy, Scikit-learn), R, SQL, MySQL, SQL Server, Alteryx, MS Excel (Advanced)

Data Analysis and Modeling: Exploratory Data Analysis (EDA), Predictive Modeling, Time-Series Forecasting, Regression, Clustering (K-Means), Decision Trees, Hypothesis Testing, Principal Component Analysis (PCA)

Visualization & Reporting: Power BI, Tableau, Real-Time Dashboards, Visual Studio, KPI Tracking, UI/UX, Figma, Executive Presentations

Business & Process Analytics: Requirements Gathering, Root Cause Analysis, Process Optimization, Pipeline Automation, Inventory & Supply Chain Analytics, Pricing Strategy, Forecasting, UAT Support

ERP & Project Tools: SAP S/4HANA (Fiori), Oracle Cloud EPM, Jira, Confluence, Agile/Scrum, Waterfall

Soft Skills: Stakeholder Collaboration, Communication, Problem-Solving, Critical Thinking, Team Leadership, Adaptability

PROFESSIONAL EXPERIENCE

The Quinn House

Sep 2024 – Dec 2024

Business Analyst

- Conducted data analysis across six restaurant locations, integrating inventory, sales, and competitor pricing data to identify trends and operational gaps.
- Developed a flexible beverage pricing model using sales benchmarks and market data, enabling consistent and competitive pricing decisions.
- Recommended inventory optimization strategies after identifying waste in wine stock, improving shelf-life utilization and reducing carrying costs.
- Designed and deployed interactive Tableau and Power BI dashboards to monitor KPIs (pricing consistency, sales trends, inventory turnover), enhancing visibility for management.
- Documented business requirements, workflows, and variance reports, ensuring alignment between operations, procurement, and finance teams.
- Collaborated with cross-functional stakeholders and presented actionable insights to senior leadership, directly influencing pricing strategy, procurement planning, and inventory operations.

Mu Sigma

Jun 2022 – May 2023

Business Analyst

- Collaborated with Fortune 500 clients to gather requirements and define KPIs, ensuring business needs were translated into analytics solutions.
- Performed data wrangling, EDA, and predictive modelling (clustering, regression, forecasting) to uncover trends and support strategic decisions.
- Built interactive dashboards in Tableau/Power BI for campaign, supply chain, and pricing insights, cutting manual reporting by 35%.
- Automated recurring reports with SQL & Python pipelines, improving efficiency and accuracy.
- Supported Agile sprints and UAT cycles, documenting workflows in Jira/Confluence and ensuring timely project delivery.

ZS Associates

Sept 2021 – May 2022

Decision Analytics Associate Consultant

- Analyzed Salesforce data to optimize sales strategies, boosting Ozempic drug prescriptions by 15% in Q2 2022 by targeting Key Opinion Leaders (KOLs).
- Developed Python scripts and VBA-based automation workflows, saving 12 hours weekly per associate and improving team efficiency by 25%.
- Built the first-of-its-kind automation ETL which interactively took user inputs based on process requirements; achieved overall average of 12 hours of timesaving per week per associate across the team; increased team efficiency by 25%, enabling error-free result.
- Conducted in-depth internal testing, performed user acceptance testing, and troubleshooting to ensure workflows integrated seamlessly with Salesforce and other tools, improving overall operational accuracy by 30% in terms of delivery time.
- Directed a team to deliver 5 critical analyses in 3 months, facilitating effective coordination with onshore teams and delivering actionable insights.

Digi Bros

Jun 2020 – Apr 2022

Co-Founder/Business Analyst

- Co-founded and managed a digital consulting firm, delivering data-driven solutions for clients in banking, retail, and e-commerce.
- Conducted SQL and Python analyses on customer acquisition, retention, and campaign performance, improving ROI and targeting strategies.
- Built Power BI/Tableau dashboards to track KPIs (engagement, leads, conversions), enabling real-time reporting and insights.
- Performed customer segmentation and predictive modelling (clustering, regression) to optimize campaign targeting and improve conversion rates.
- Partnered with design and marketing teams to implement UI/UX enhancements informed by analytics, boosting client retention.
- Applied Agile methodologies (Scrum, Jira) to manage deliverables and presented recommendations that influenced pricing, acquisition, and campaign strategies.

ACADEMIC PROJECTS

E-Commerce Market Optimization

Mar 2024

Tools: Python, SQL, Tableau **Methods:** Feature Engineering, Model Validation, ROC-AUC, Churn Modelling

- Engineered features from web/app and transaction data; trained purchase-likelihood and churn models (87% accuracy, 75% high-risk churn identified).
- Built self-serve dashboards for funnel metrics (AOV, CVR, RPR), enabling near real-time monitoring.
- Partnered with stakeholders to define requirements, success KPIs, and acceptance criteria documented data dictionary and model cards.
- Insights supported personalized offers and retention plays, contributing to +12% revenue and +8% retention.

Omni-Channel Marketing Optimization

Nov 2024

Tools: Python, SQL, Tableau, Power BI **Methods:** EDA, K-Means, Logistic Regression, Decision Trees, A/B Testing

- Integrated CRM, social and transactional datasets (5M+ interactions) and built a governed ETL pipeline for analysis.
- Performed customer segmentation (K-Means, 6 personas) and propensity modelling to prioritize high-value audiences.
- Delivered executive dashboards (Tableau/Power BI) for cross-channel KPI tracking (CPC, CAC, LTV, conversion, churn).
- Ran A/B tests to optimize creative and budget allocation; insights informed campaign planning and media mix.

Toyota Electric Vehicle Consumer Research.

Apr 2024

Tools: Python, SQL, Excel, Tableau **Methods:** Survey Analytics, Segmentation, Hypothesis Testing, Visualization

- Analysed 10,000+ survey responses created 4 market personas and mapped adoption drivers (range anxiety, TCO, charging access).
- Visualized persona-level journeys and pricing sensitivity in Tableau to support go-to-market and positioning decisions.
- Conducted statistical testing to validate differences across segments; translated findings into clear business requirements and roadmap inputs.
- Recommendations increased target-market appeal (+15%) and projected market penetration (+12% over 2 years).

Predictive Supply Chain & Customer Analytics

Apr 2024

Tools: Python, SQL, Tableau, Power BI, Excel **Methods:** ETL Pipelines, Forecasting, Segmentation, Churn Analysis, KPI Dashboards

- Built a unified ETL pipeline integrating sales, supplier, inventory, and survey data (4M+ records) to enable accurate, reliable analytics.
- Applied time-series forecasting (ARIMA, Prophet) and churn/segmentation models (K-Means, logistic regression, decision trees) to improve demand planning by 15% and identify at-risk customers.
- Developed Tableau/Power BI dashboards to monitor KPIs (forecast accuracy, inventory turnover, retention), reducing reporting effort by 35% and supporting S&OP decisions.
